OBITUARY OF R. A. YOUNG

Robert A. Young was born in Virginia in 1848, and remained there until he was 19 years of age, when he journeyed to the great northwest, where he had a great part in winning Nebraska to productiveness, helping turn the barren plain and prairie to its present state. He arrived at Plattsmouth in 1867, and spent the remainder of his life in old Cass county.

On March 4, 1879, he was united in marriage with Miss Ida Stryder, and they spent 54 happy years together, before the grim reaper came and severed their companionship. To this union four children were born. Two of them have preceded their father in death several years ago. They were Madge Noel and Harry.

Mr. Young lived the life of a pioneer, standing the plagues, the disappointments of the early years of Nebraska history, but he lived to see the prairie blossom into a fertile land of productiveness.

He leaves to mourn his passing his wife, two children: Ernest of Guernsey, Wyo., and Janette Munkres of Casper, Wyo., eight grandchildren and five great-grandchildren, two sisters, Mrs. Casby Edwards, Alva Okla., and Mrs. C. R. Troop of Plattsmouth, Nebr., and a host of relatives and friends.

Two sisters and two brothers preceded him in death, Lewis Young having preceded him but a few weeks.

The funeral sermon was preached by Rev. E. S. Pangburn, pastor of the Methodist church at Weeping Water, Monday, Mrs. Herbert Rattour and Mrs. Henry Rugha sang very beautifully, accompanied on the organ by Mrs. Roy Haslam.

The pallbearers were Ben Noel, Parr Young, John Young, R. A. Noel, Neal Munkres and Arthur Troop. Interment was in Oakwood cemetery.

FUNERAL OF MRS. LONG

The funeral services of Mrs. A. N. Long were held Thursday afternoon at the Sattler funeral home and largely attended by the old friends who had known Mrs. Long in the many years of her residence here.

The service was conducted by Rev. H. G. McClusky, pastor of the First Presbyterian church, who gave to the sorrowing family words of comfort and hope and held to them the promise of life to come when separations will be no more and man will receive the crown of everlasting life.

During the service Mrs. Hal Garnett and Frank A. Clويد gave two of the favorite songs of the departed, "Going Down the Valley One by One," and "Jesus Lover of My Soul."

At the close of the service here the funeral cortege drove to Gretna where the interment was made at the cemetery east of that place and where other members of the family are at rest. Rev. McClusky conducted the services at the grave.

RETURNS FROM THE EAST

From Thursday's Daily
Attorney C. E. Tefft of Weeping Water, was in the city for a short time today, looking after some litigation at the court house. Mr. Tefft has just returned from the east where he and Mrs. Tefft were visiting with their sons. They enjoyed a short visit at Washington where they found the capitol city in the midst of the preparation for the change of administration. After a short stay there they went on to Nutley, New Jersey, where they visited with their son, Ralph, who is engaged in the laboratories of the U. S. Rubber Corporation at that place. This is one of the largest plants of its kind in the country and the visit there was most interesting. They also stopped at Chicago, where their eldest son, Sheldon Tefft, is one of the faculty of the University of Chicago in the college of law. Sheldon Tefft is an Oxford graduate and was for some time with the University of Nebraska, going from here to Chicago.

RETURNING TO NEBRASKA
George L. Berger, pioneer resident of Cass county, who for several years has resided in California, is again to make Nebraska his home. Mr. Berger arrived on Sunday at Elmwood with the body of his wife and who was laid to rest in the cemetery at that place. Mr. Berger has been visiting at Elmwood and Louisville and came on to this city today to visit with the relatives and old friends. Mr. Berger is returning to Orange, California, soon to arrange his business affairs and property interests there and is planning on returning to Nebraska to live among the familiar scenes and the friends of his younger days. He is planning on making his home at Elmwood.

HEARS FROM THOMAS FAMILY
Word has been received here by friends of the Walter L. Thomas family, stating that they have escaped injury from the Long Beach earthquake, altho they have had some property damage. The residence of the Thomas family was not injured but the family has not been allowed to remain at the home owing to the fact that a wall of the Masonic temple next door is liable to collapse and the authorities have ordered the Thomas family from their home. They are sleeping in their autos at night as are many hundreds at Long Beach. The garage building in the main section of Long Beach, is cracked by the earthquake but the full extent of the damage has not been determined by the inspectors.

RETURNS TO HOME HERE
Mrs. Alvina Roessler, who has been spending the winter season with her son, Karl and family at Chicago and with her daughter at McCook, returned home Wednesday. She has had a very pleasant time visiting the relatives and will now open the home here for the summer.

Farmers Guests of Local Industry and Civic Body

Get Together at American Legion Building on March 22nd to Be One of Great Interest.

Invitations have been sent out by the committee in charge, to the farmers of Cass, Sarpy counties and also Mills county, Iowa, inviting them to come to this city on Wednesday, March 22nd for the big get-together and social meeting that has been arranged by the Chamber of Commerce.

This will be held at the American Legion building where there will be ample facilities for the handling of the large crowd and the various entertaining stunts that are to be a part of the program of the evening.

There will be plenty of entertainment provided of all kinds, as well as a most instructive demonstration by the Norfolk Packing Co. of this city. The Packing plant is desirous of making a much larger output of their plant here the coming summer and accordingly they will need greater acreage of vegetables of all kinds and in which they can interest the farmers.

With the plan for the curtailment of the grain crops farmers can find a nice return by the raising of vegetables for the canning plant and at the same time add to the employment of labor in this city.

The farmers of the community are to be the sole guests of the evening as the residents of the city who are not owners of acreages will not be invited to participate in the evening of pleasure and profit.

Following the entertainment and showing of the Norfolk Packing Co. products, there will be luncheon served in honor of the visitors to the city from the nearby communities.

COLORED MAN CREATES STIR

From Saturday's Daily
Late Friday afternoon a colored man, carrying a shoe shining outfit as well as his personal equipment, wended his way up from the Burlington station and was soon in the midst of considerable excitement.

The man was apparently deranged or suffering from canned heat, and remarks that he addressed to parties along the street caused the police to be summoned and Chief of Police Libershal and Officer David Pickrel soon were on the scene. The man abandoned his equipment on the court house lawn and disappeared from the scene as the police appeared but was located near the county jail building. He stated to the officers that he was "one of the fighting black boys" and had served in France in the army and was tired of being shuttled around over the country.

The man apparently not being mentally sound was taken to the county jail by Chief of Police Libershal and Sheriff Sylvester and where he was fed and kept over night and this morning was sent on his way eastward.

REMOVE TRACKS IN PITTSBURG
The removal of the tracks in Pittsburg marks the passing of a once large interurban system serving several cities in Southeastern Kansas, and at one time having tracks to Joplin, Mo. In its heyday it handled thousands of passengers daily, but when its last passenger line was discontinued between Pittsburg and Frontenac, that number had dwindled to a bare 800.

Before the advent of the car, the street cars were used in many of the cities for pleasure, as well as the important task of getting workers to their offices and home again, the companies deriving a comfortable revenue in chartering their cars to parties.

Many Towns Drop Systems.
Among the cities in Kansas that have eliminated their street car systems completely are Atchison, Salina, Manhattan, Emporia, Leavenworth, Hutchinson, Pittsburg and Winfield. All but Manhattan now have busses, while the Joplin-Pittsburg line, which operated the line in Pittsburg still maintains a portion of its trackage outside of the city limits for freight business.

In only one instance has public opinion forced the continuance of a line after it had been abandoned. A Kansas City junk company purchased the interurban line operating from Kansas City to Merriam and Shawnee, Kas., with the intention of scrapping it. After it had dismantled the antiquated rolling stock, the former patrons of the line persuaded the scrap iron dealers to borrow some cars from the Kansas City street railway company and resume service.

TOPEKA TRACTION COMPANIES
Topeka.—Electric traction companies, once the backbone of every sizable community in Kansas, rapidly are nearing extinction in the state.

With workmen busy tearing up the last vestiges of the electric railways in the city streets of Hutchinson and Pittsburg, only four cities—Kansas City, Lawrence, Topeka and Wichita, still retain this form of transportation, considered indispensable to any thriving city during the first three decades of the century.

Busses Into Use.
In all of these cities except Kansas City busses are rapidly supplanting the street cars, and the rails of the once extensive electric railways are being removed as speedily as rubber-tired equipment can be conveniently substituted.

The Topeka railway company has inaugurated as an experiment a fleet of trackless street cars on one line, in an effort to utilize cheap electric current without the necessity of maintaining expensive tracks. These new conveyances are equipped with bus wheels and tires, but receive their power from an overhead trolley system in the same manner as did the familiar old type of tram car, with the exception that a second trolley and wire must be provided for the ground connection.

In the other cities gasoline busses have supplanted the electric systems, and in one instance, Manhattan, even these have been discarded.

80,000 Victims of the Quake District are Fed

Legislation Planned to Demand That Tremor Proof Buildings Be Constructed.

Long Beach, Calif.—Relief agencies were feeding 80,000 earthquake victims here and emergency mass feeding continued in Compton and Artesia, while state, county and civic officials formulated plans to make compulsory earthquake proof construction in southern California.

The zone death toll was 116, with the death to J. E. Brasted of shock. He was Long Beach's fifty-sixth victim.

Comfort and care of all those injured and frightened from their homes by Friday night's disaster were adequately provided and medical authorities said the health and sanitation was very good. The American Red Cross, directing rehabilitation work, started registration of families sheltered in the concentration camps at Bixby park and other recreation centers here, and in Compton, Huntington Park, Artesia and Bellflower. Thousands of persons have been "camping out" until they consider that the likelihood of another serious quake has passed.

Response from many cities on the Pacific coast to its appeal for a half million dollar fund for rehabilitating the earthquake victims was reported by the Red Cross. A careful survey of school buildings thruout the county and in Orange county was under way. School board officials reported that pupils will be permitted to return to their studies in those buildings in which there was not the slightest evidence of danger.

Officials charged with control of building operations met here and in Los Angeles and initiated plans for new building restrictions by revisions of the code to provide earthquake proof construction for all the area in reconstruction and new building construction. From Los Angeles state offices came the word that Colonel C. W. Huntington, state director of standards, is formulating plans for legislation to insure such protection in construction work. An exhaustive investigation is under way into the responsibility for the poor construction of a large number of schools in the zone.

HAVE FINE MEETING

The Social Circle club held their regular all day meeting at the home of Mrs. Ezra Albin with Mrs. Ben Albin assistant hostess.

After a short business meeting the remainder of the afternoon was given over to the project leaders. They gave a very interesting lesson the making of different kinds of cheese. There was a good attendance, with several visitors present.

The next regular meeting will be held March 28 at the home of Mrs. Albert Young, with Mrs. Metta Hanni assistant hostess.

The annual drama of the Babe Ruth salary isn't so absorbing as it was when it first trotted the boards. It still carries some suspense, but lacks the element of uncertainty.

United Customers Benefit Sale and Community Free Voting Game

LAST SATURDAY was a great day. More people visited our stores than one day than have been here for a long, long time. The organization representatives were a great boost to business. Everyone enjoyed seeing one of their own folks here in our stores and enjoyed having them as clerks to wait on them. A new interest in our stores is being built up in this "New Deal" and we feel closer to our friends and customers. We have never enjoyed anything so much in our lives as we did to have the church workers with us for this one day. So much mutual good resulted for the organizations and our stores that every church or organization interested in the contest may be permitted to have one representative in each of our stores every afternoon this week and all day again next Saturday. They may again solicit votes or sell merchandise just as you please and we want you to feel and know that you are most welcome.

Wednesday: Special Feature Stunt GROUP REGISTRATION

1300 extra votes given to the organization registering groups of 12 at one time. Everyone will be permitted to solicit votes in the store on that day. Wednesday is also Hosiery day at both stores—double the amount of votes now given with hose will be given you with every pair of hose you buy on Wednesday. This will run the vote value very high and you can use a pair or two of hose and you may help your church a lot. (Men's hose as well as the ladies' hose included at Fetzter's Shoe store.)

Thursday: New Voters' Day

A few people in Plattsmouth have not voted in this game and several of the out of town folks have never voted and to make it as nearly 100% as possible, we will for this one day give every new voter you may bring in 1000 votes for registering their first time. Of course, you will play the golden rule in this feature, as we will have to take your word for it in most all cases. You organization workers, bring in the shut-ins if they can come for one day, help them to enjoy this game that much, and go out on the highways and in the hedges and bring them all in once anyway. **Special Purchase Votes Thursday:** Double votes on every item of Lingerie at the Toggery this one day only. (Special items in this group already have large votes, but the number will be doubled just the same on Thursday. At Fetzter Shoe Company, double votes will be given on every pair of Enna Jettick shoes purchased that one day.

Friday: Surprise Day. That's All Don't be Afraid; It's Harmless

Fetzter Shoe Co. and Ladies Toggery
Plattsmouth, Nebr.

CUSTODIAN VISITS CITY

Lute M. Savage of Grand Island, grand custodian of the Nebraska grand lodge of the Masons, was here Friday afternoon and evening to conduct an inspection of the local lodge. The lodge had nine officers approved as proficient in their work.
