Take a glance at the stalk and see what you think of it.

Tribal Festivals Being Abandoned in Oklahoma

Famous Feasts Which Once Drew Thousands Are Seldom Held, Due to Modern Trend.

Seneca, Mo.—Indian gatherings, stomp dances, green corn dances and other tribal festivals, which in past years drew thousands of Indians from over Eastern Oklahoma, as well as other visitors from over a wide section, to the festival grounds west of here are passing from existence. Each year one or more of the festivals becomes a memory and one by one they have been discontinued by the Indian tribes of Oklahoma.

A few years back the picturesque tribal feast conducted in the summer months at Devil's Promenade, west of here near Quapaw, Ok., was an event that attracted thousands. One summer 2,000 persons attended each day and night to observe the Indians of the many Oklahoma tribes take part in the pony smoke and pow-wow held there. Food of all kinds was prepared for the tribe members and visitors. The vent lasted several days and attracted members of several tribes.

Green corn dances and a variety of other summer Indian festivals, held on the banks of Elk River and other picnic grounds in Delaware and Ottawa counties, Oklahoma, were staged yearly by Oklahoma Indians and were attended by persons from over a large section of Oklahoma, Kansas and Missouri.

In the last few years the interest in the festivals has dwindled. Many of the events will not be held this year. Modern ways of living and thinking, the motor car, commercialized amusements and lack of interest among the younger members of the Indian families, have about written "finis" on the summer celebrations.

While Orville Hennings was stepping into the car of Richard Cole preparatory to taking a drive, the car appeared to be on fire, with the result that it was considerably damaged before the flames could be extinguished. In a collision that occurred between a stone truck and a car driven by Harry Kunz of Avoca, and the other by Renold Switzer, both were more or less shaken up and Truman Kilburn, who was riding with one of the drivers was cut and bruised in the melee, but is able to be about though he has to have his face and head bandaged up until it gets well.

Mr. Wood in his recount of the trip says that the crops are very poor. However on the other hand he reports the improvement of the times there, resulting from the efforts made for the recovery to normalcy in the nation. Frank says that all the factories are in operation and the coal mines are working part time that have been closed down entirely for a long while. He was enthused with the business activity and the

feeling of returning prosperity which he witnessed while away. However Weeping Water looked good to him on his return.

Enjoy Family Dinner Sunday.

At the home of Mr. and Mrs. Eugene Colbert was gathered the members of the family on last Sunday, where they enjoyed the sociability and as well an excellent dinner which was served. There were there for the occasion and to add to the very fine time which was enjoyed by all, Lawrence Colbert and family, Leonard Doty and family, Mrs. Wm. JUNE WAS DRIEST AND HOTTEST ON RECORD

June, 1933, was the warmest and driest June on record in Nebraska, according to a summary of weather conditions issued by the weather bureau. Every temperature recording station in the state was warmer than normal, the average being 77.7, 2 degrees hotter than the previous hottest June, 1931. Every rainfall station was also drier than normal.

Sunshine for the month was much greater than usual, relative humidity much less and wind movement somewhat less. Only three Julys and two Augusts in the past fifty-seven years have had a higher average temperature. The absolute maximum of 113 equalled the previous record for June and was within 2 degrees of the record for all months.

The heat was excessive for the month in all parts of the state, but the departure from normal was greatest in the northeastern division and least in the western division. Temperatures were above normal all month except for the brief cool period from the 12th to the 14th, inclusive. Maximum temperatures were 100 or higher at every station except four of the more elevated stations in the northwestern part of the state.

The precipitation of 1.03 inches was unprecedentedly small. Only three previous Junes since 1876 have received less than two inches, the least being 1.76 inches in 1911. All parts of the state were dry, amounts ranging from 20 per cent of normal in the southwestern division to 32 per cent in the southeastern. Hail and high winds did considerable damage on the 7th and again on the 29th and 30th. Various crops suffered from lack of moisture, except corn.

mittee created consisting of Knute Jensen and Chris J. Elgaard to work in harmony with the business men of the city and with other places and on the same plan which was put forth at the county meeting which was held last week, arranging the hours and all other matters which were suggested by the president and were incorporated in the National Recovery Act.
