### VISIT ANCESTORS HOME

Wednesday there arrived in this city, Mrs. Daisy Duckward, of Centerville, Iowa, who for the first time was in the city that her grandfather, Samuel Martin had platted and designated as Plattsmouth, back in 1855.

Mr. Martin, a resident of Mills county, Iowa, with James O'Neill, another resident of that portion of Iowa, crossed the Missouri river as soon as the treaties with the Indians had been made and the creation of Nebraska territory. They were the first settlers and at once took steps to establish a trading post and a short time later to move to have the settlement, which then had a number of residents, incorporated.

Mr. Martin was not only the first settler in Plattsmouth, but he was the first member of the early settlers to pass away and was buried in the community that he had helped establish.

The family of Mr. Martin later moved to other localities and it was not until the granddaughter arrived here Wednesday that any word had been received of the whereabouts of the relatives of the city's founder.

Mrs. Duckward had the pleasure while here of meeting Mrs. A. L. Tidd, a granddaughter of James O'Neill, the associate of Mr. Martin in the establishing of the city. Mrs. Duckward was in search of information as to the grandfather and his early history that had so much to do with the developing of this part of the west.

### RETURNS FROM IOWA

S. S. Gooding, who has been enjoying a visit with relatives and friends in Minnesota and northern Iowa, has returned home. Mr. Gooding was at Minneapolis for some time and later stopped for a visit at Britt, Iowa, with a sister of the late Mrs. Gooding. He also stopped at Fort Dodge and where he met some cousins that he had not seen over a period of some fifty years.

## Federal Surplus Buying Plan on Long Term Basis

May Deliver Products to Relief Agencies Within a Week—Funds from Tax.

Washington, Sept. 22.—President Roosevelt's program for surplus farm commodities and distributing them to families on relief rolls will be organized on a long-term instead of a purely temporary basis.

This was disclosed today as the agricultural adjustment administration hastened establishment of an organization, determined to have it ready to turn over products to the federal administration within a week. George N. Peek, chief administrator of the farm act, said that substantial portions of the proceeds of processing taxes on basic farm commodities would be made available to finance purchases, supplementing federal relief funds.

### Plan Other Taxes.

These taxes are now being levied on wheat and cotton, but others are to be levied soon on swine, tobacco and possibly dairy products, corn and rice.

Instead of 75 million dollars in purchases, already planned, the outlay may greatly exceed this figure during the current fiscal year, officials said. They look upon the relief outlet as an opportunity to take up the slack in disposition of American farm products resulting from the fall in exports. Meanwhile, they will continue efforts to push increased sales abroad.

Secretary Wallace designated three men to direct the program—General W. I. Westervelt, director of marketing and processing; Chester C. Davis, production director, and Dr. L. H. Bean, economic adviser of the A. A. A.

The first surplus products to be distributed will be pork acquired by the farm agency in its emergency program for reducing the number of swine on farms.

The first pork shipments will go to Montana within a week.

### Other Shipments Soon.

Approximately 20 million pounds of pork will have been cured within the next two weeks. Shipments to other points will be started within 10 days. In all, about 100 million pounds of pork will be available.

Purchases of dairy products, beef and cotton products will be started as soon as arrangements for distribution are completed by Harry L. Hopkins, the relief administrator. A processing tax on dairy products is now under consideration, and some purchases from this fund may be made and coupled with production control plans now being worked out for that industry.

The long-range aspects of the program and its bearing on supplying an outlet for farm surpluses will be handled by Bean.—World-Herald.

### JANITOR FOR 34 YEARS

On this Thursday, Sept. 21, Wm. Hulfish passed the 68th milestone of his life. He also passed the 34th year as janitor of the Elmwood public schools. During that time he has seen a great deal. When he started it was in the old four room building that was later torn down to build the present building. Aside from school being held in this building the G. A. R. Hall was used for one school room and the room in the rear of the American Exchange Bank was also used for one class room. Miss Moon was teacher here. The salary of janitor then was fifteen dollars a week and coal had to be carried up from the cellar to keep the stoves going. Aside from this he had to keep fires going in the stoves at the hall and in the bank building. Coal for the school buildings was hauled cheap. It was said that during Bill's first winter as janitor, Clark Shreve, who was draying hauled coal from the depot for 17¢ per ton. Those were the great days and Bill has spent just half of his life at the present time as janitor of the Elmwood schools. This could never happen again no matter how old he should live to be.—Elmwood Leader-Echo.
