There resided with her two sons and one daughter, who, with Mr. White comprised the family.

**Rails Agree to Restore Wage Cuts by 1935**

**One-Fourth of 10 Per Cent Reduction to Be Returned July 1, Others to Follow.**

Washington, April 26.—Railroad labor and managers agreed Thursday on a restoration July 1 of one-fourth of the 10 per cent wage reduction which has been in effect two years. An additional fourth of the wage cut will be returned Jan. 1 and the final half April 1, 1935.

Railway labor's 10 per cent wage reduction is now in effect.

"We have joined in this agreement," said A. F. Whitney, chairman of the Railway Labor Executive association, "to comply with the wish of the President of the United States in the interest of national recovery."

"The agreement runs for one year and to this extent will stabilize wages on American railroads and give all concerned a breathing spell."

**Choice Explained.**  
W. F. Thiehoff, chairman of the conference committee of managers, said:

"We faced the choice of reaching a settlement with employees or of carrying the wage controversy to a conclusion under the law, with its attendant uncertainty and disturbing effects."

"In the interest of stabilizing the railroad situation now, so as to promote the national recovery program, we chose former. In so doing we have been mindful of the consideration of national welfare pressed upon us by the President, of the untiring efforts of the federal coordinator of transportation to compose the situation and of the forbearance of those who have represented the employees."

**Roosevelt's Statement.**  
The President issued the following statement:

"I am very glad that the railroads and their employees have been able to settle their wage dispute by mutual agreement."

"The country should be and will be grateful to them for this disposition of what might have developed into a troublesome controversy."

"I congratulate both sides on the wisdom and restraint which they have exhibited. They have set a good example."

A condensed statement signed by the managers and labor executives said in part:

**May Spread Jobs.**  
"With respect to employees in the lower paid brackets the agreement shall not be taken to prevent discussion and adjustment between individual carriers and organization with respect to spreading employment or of the matter of opportunity of increased earnings of part time employees, but changes in basic rates shall in no event be involved."  
"If, as and when, or on after May 1, 1935 notices of changes in basic rates shall be served by any of the organizations or carriers now represented . . . they recommend . . . the proceeding under such notices should be conducted nationally in pursuance to the railway labor act."

**RAILROAD ENGINEER FINED**

Nebraska City.—John Rutherford, of Falls City, Missouri Pacific railroad engineer, was fined \$75 and costs a police court Wednesday for not stopping a freight train at a crossing here in compliance with a new city ordinance.

He was arrested when he stopped the train in the railroad yards. The incident occurred recently, just a few days after the city council passed the ordinance, requiring all trains to stop at the crossing unless the railroad company keeps a flagman on duty there.

The railroad has had a flagman on duty at the crossing since the arrest of Rutherford. The crossing is the intersection of federal highway No. 75 and the railroad.
