

NO WASTED CURRENT . NO SCORCHED CLOTHES Coleman 🛭 Automatic

THE Coleman Automatic Iron *saves \$2 to \$5 a year on electric current.

LECTRIC IRON

When it reaches the temperature at which the thermostat is set, the current is automatically cut off. It "coasts" or "free wheels" on stored heat. 40% of the time it is in use it consumes no electricity. This saving on your electric bill goes on year after year as long as you use your Coleman! This same automatic action of the thermostat eliminates fire danger and scorching of clothes. Saves work . . . does more than the ironing.

The Coleman is beautifully designed and finished in super-chromium. Has long tapering point, but-ton bevel and glass-smooth ironing

Come in and see this beautiful iron. Let us prove our statements about the money it saves you.
