New Process Restores Life After 3 Days

Science Overcomes Death in Startling Experiment; May Aid in Curing Diseases.

Los Angeles, Cal., May 5.—Science overcame the enemy death in a Hollywood laboratory Sunday in a startling experiment as strange as it was successful.

Surrounded by tense assistants, Dr. Ralph Willard, 32, research chemist, revived to normalcy a small animal he had frozen to death three days previously.

Excitedly Dr. Willard announced success of his amazing experiment and revealed that during the past week he had restored life to three other guinea pigs after they had been kept on "ice" for from eight hours to four days.

Back of the experiment lay five years of quiet, patient work.

Revolutionary Process.

Dr. Willard conducted tests until the past week's experiments convinced him he has discovered a new process of revivification which he believes will prove revolutionary in the treatment of some baffling diseases.

Describing his method, Dr. Willard said:

"In beginning the experiment I injected sodium citrate into the animal for two hours to destroy the fibrogen which, when death occurs, causes the blood to coagulate.

"Then the animal is placed in a gas chamber into which first oxygen and then ether is pumped. When the animal is under the anesthetic, carbon dioxide is turned into the chamber to start the freezing process.

Death Made Sure.

"In about two hours the animal is frozen. Then I place it in a refrigerator to be left for at least eight hours so there can be no doubt of death.

"When ready to revive the frozen animal, I placed it back in the chamber and applied heat slowly until body temperature was normal. Then a blood transfusion brought the first faint heart action. Adrenalin-epinephrine injections quickened the heart beat.

Gland Treatment.

Object of the process, Dr. Willard explained, is to establish a method whereby disorders arising from defective glands may be corrected, since freezing results in a glandular stimulation which builds up wasted tissue.

Cass county residents should buy everything possible in their home town. If you can't be supplied there, come to Plattsmouth, your county seat and logical large town trading point.

Women Making Hooked Rugs.

Forty-five women attended two meetings held last week at Murdock and Mynard when the making of hooked rugs was demonstrated by Miss Rizzpah Douglass, Home Beautification specialist from the College of Agriculture. The morning hours were devoted to a discussion of suitable designs, colors and materials for rugs. In the afternoon the women put their rugs into frames, transferred their patterns and started hooking the rugs. Fifteen of the women went home well satisfied with the good start they had made toward the completion of a rug, while the remaining women, who had not brought their working materials, took off patterns suitable for use in making hooked rugs and chair seats which they expect to use later.

Another such rug making demonstration will be held at the Congregational church in Avoca, Friday, May 10th. If interested in attending get in touch with the Home Agent for information on materials to bring, etc.

Project Clubs Hold County Achievement.

About 400 members of the women's project clubs over the county assembled at the Congregational church in Weeping Water, Wednesday, May 1st for their annual County Achievement program. For the second time the event was in the nature of a May Day Tea and was a most enjoyable climax to a successful year's work.

Miss Evelyn Wolph, county chairman, presided over the program which opened with community singing, led by Mrs. John Fischer of Elmwood. John B. Kaffenberger, president of the Cass County Farm Bureau Board, and D. D. Waincoat, Agricultural Agent, were welcome guests, the latter addressing the assembly briefly to stress appreciation of the co-operation of the farm-homemakers in the agricultural adjustment program and the part they must play in the future if we are to make progress in agriculture.

Miss Jessie H. Baldwin, Home Extension Agent, conducted a very impressive recognition and installation service, using a candle lighting ceremony. This part of the program was for the recognition of the work done by county and group chairmen, club presidents and project leaders. Each of the county and group chairmen, Miss Evelyn Wolph, Nehawka, Mrs. Orill Allen, Eagle, Mrs. Everet Spangler, Murray, Mrs. Arthur Schoeman, Louisville, Mrs. Geo. Sheldon, Nehawka, Mrs. Oscar Zink, Murdock, Mrs. G. R. Eveland, Elmwood, and Mrs. Olive Murtey, Weeping Water, were presented with a corsage of sweet peas, and the presidents and project leaders for the past year each received a rose as an expression of appreciation for their work. Installation of new county and group chairmen, presidents and project leaders for next year followed.

During the remainder of the afternoon a continual musical program was presented in the auditorium of the church while refreshments were served in the dining room. Each of the seven project club groups was responsible for a part of the program which was varied and interesting.

The county and group chairmen presided in the dining room, serving in pairs from a lace covered table prettily decorated with a centerpiece of golden gleam naturnutms in a low green bowl, with green tapers in silver candlesticks on either side. A mint sherbet and waters were served, tiny paper jonquil standing in a bag of mints tied with cellophane and ribbon was used as a favor and made each plate very attractive.

Farmers Will Be Signing Corn-Hog Contracts Soon.

Cass county's listing sheets which contain all the information for the 1935 corn-hog contracts, will be presented to the state board of review about May 10th. If they are accepted immediately, the office will start typing the contracts and they will be ready for starting signing about May 25th.

Corn-hog contracts will be completed and signed by Nebraska farmers in a number of counties well in advance of corn planting time. First indications are that practically every man who signed an application will finish his contract.

In Wayne and Fillmore counties, where the first signups have been held, about ninety per cent of the applicants finished their contracts the first day they were offered to them by the corn-hog committeemen. With a few individuals away from home, a few landlords undecided, and

other delays, the ninety per cent sign up indicates that almost all the contracts will be finished.

About a fourth of the counties in the state are now finishing applications and contracts and will have the signing completed before the farmers get very far along with corn planting. Practically every Nebraska county will be able to offer contracts to farmers by the end of corn planting time.

About ten per cent of the applications are new ones signed for the first time this year which will cause a little delay but every effort is being made to finish these blanks as rapidly as possible. Each case is being considered by the corn-hog allotment committee and the state office on its individual merits.

Acceptance sheets have been received on \$90,000 worth of third payment checks. These checks represent the remaining \$2.00 per head payment on the hogs minus the local expense which was less than 4%. Notices will be sent when the checks arrive which is expected to be in about a week.

Time for Most Important of Fruit Tree Sprays.

The time is here for the application of the petal fall or calyx spray. As a rule this application is started when about 3/4 of the petals have fallen. Flowers in this stage of development have lost their attractiveness for the bees and there is little likelihood of poisoning many bees with the spray material applied.

The calyx spray should consist of a fungicide like lime sulfur of Bordeaux mixture and an insecticide like lead arsenate. The fungicide is used to control scab and black rot (frogeye) on apples and pears, shot hole fungus on cherries, brown rot on plums and cherry leaf spot on currants and gooseberries. As a rule we prefer lime sulfur to Bordeaux at the Calyx application because the latter has a tendency to resist the tender young fruits and cause a yellowing of the leaves particularly if the season be cool and wet. Lime sulfur may be used either in the liquid or in the dry form, the liquid form of lime sulfur being a little more effective for controlling scab after it has started. Any form of sulfur spray may cause burning of the leaves or russeting of the fruit when the air is humid and the temperature is about 85 degrees. Watch the thermometer and act accordingly.

Lead arsenate is used for codling moth, curculio, spring-canker worms on apples and pears, plum curculio on plums and cherries, imported currant worm on currants and gooseberries. Use 1 1/2 to 1 3/4 pounds of lead arsenate, 3/4 to 1 1/4 gallons of liquid lime sulfur or 3 to 4 pounds of dry lime sulfur to 50 gallons of spray mixture.

Do not spray peaches with the above mixture. For curculio on peaches use 1 pound lead arsenate and 1 to 2 pounds hydrated lime to 50 gallons of spray. For a fungicide use either wettable sulfur or self-boiled lime sulfur as described in Circular 26.

Carping Critics of Crop Control.

Extracts from the speech of Hon. Henry C. Luckey, of Nebraska, in the house of representatives, April 16, 1935:

"Every day the people of our country turn to their daily papers and their radios for information on current affairs. Every day their ideas are formed through these mediums as to what is going on in the government and in the country. Now, it is very easy for a newspaper or for a person who is quoted by a newspaper to give out a few facts which may be quite true in themselves but which give so small a part of the whole picture as to be absolutely false in their total effect.

"For more than a month I have been watching how certain facts are being used in just this way—facts having to do with imports of agricultural products into this country. I have seen how carping critics of crop control—both in the newspapers and right here on the floor of the house—have used these facts to give a totally wrong impression of the actual situation with regard to these imports. Listening to these critics you would think that the baby beef now being fattened in Iowa and Nebraska are being fed nothing but Argentine corn, and that every day our American school children are sitting down to Grape-Nuts made from Canadian wheat. Moreover, you would think that the secretary of agriculture had arranged with the United States Weather Bureau to cause a drought last year just so we could import rye from Poland and barley malt from Czechoslovakia.

"I do not say that the newspapers or the members of this house who are telling about all these oceans of imports flowing into the country are doing so with a malicious intent to

Charley Bryan Named Mayor of City of Lincoln

Former Governor Has Large Majority over Councilman E. M. Bair to Head City Government

Charles W. Bryan, veteran of many political campaigns and thrice governor of Nebraska, Tuesday night was returned to public office as mayor of Lincoln.

Unofficial returns from 72 of the 81 precincts in the municipal election gave him 11,747 votes. His opponent, Councilman E. M. Bair, had 6,679.

The vote indicated no member of the present city council would be returned. A mayor and four councilmen are to be elected.

Leads Ticket.

Andrew Johnson, former city water department employe, was leading the council ticket with 11,962 votes, Bryan was second, and Oren S. Copeland, coal dealer, third, with 10,729.

The other two candidates in the high five were J. Cass Cornell, retired business man, 9,999, and Cobe S. Verner, merchant, 10,059.

Other candidates and their votes: Chris Kuhner, 7,131; Councilman A. C. Harm, 6,081; John O. Chapman, 5,631, and Councilman Paul W. Doerr, 4,680.

I. G. Chapin was leading Gayle Casady 10,174 to 2,699 for cemetery trustee. One is to be elected.

deceive. But I do say that when they give these figures on imports and then fail to give the real reasons for these imports, and when they fail to tell the whole story about these imports, they are misleading the people.

"I am a farmer from a farming district, of a farming state. I think I know something about farmers' problems and about farmers' psychology. It is a very serious matter to me when I know that farmers in my state are being misled by statements they read in the papers or hear over the radio about agricultural imports. It is a very serious matter when I know that such statements are being used by carping critics of crop control to confuse the issues that face farmers and to lead them away from their own best interests. For example, a letter has come to me from a very intelligent and well meaning farmer, whom I know, which states: 'I heard over the radio last night that we have imported a million bushels of corn. Can this be true, especially at a time when the administration has been trying to cut down production?'

"That man has unwittingly been taken in by these carping critics of crop control. Someone has been holding up this fact of a little dribble of corn coming into this country to try to confuse this man about the problems that face him and other American farmers and lead him astray down an alley that goes nowhere."

"I am not defending the AAA or any other agency of government. But I do want to try to give you the whole picture about imports, how much they amount to, and what really caused them. Let us see what the facts are, and then you can judge for yourself what the facts mean.

"In the first place, let us ask this question: Have we ever imported agricultural products before? It may surprise some people who have been listening to the carping critics of crop control to learn that the United States has been importing certain amounts of agricultural products for years."

Mr. Luckey's speech contains a lengthy discussion of the imports on all commodities which in most every case he shows to be less in 1934 than the ten year average. Anyone interested in his complete speech can obtain it by writing him or getting a copy of export and import figures at the Farm Bureau office.

AVOCA NEWS

Dorothy Goline, who is employed in Omaha, was a visitor in Avoca at the home of her parents last Sunday.

Elmer J. Hallstrom and family were in Omaha last Sunday, where they visited with friends for the day.

H. M. Lum was looking after some business matters in Lincoln last Monday, driving over to the capital city in his car.

Oscar Zimmer was a visitor in Omaha last Sunday, where he went to call on a lady friend who is a student at Creighton university.

V. P. Sheldon, of Nehawka, was a visitor in Avoca on last Monday morning coming over to look after some interests which he has here.

Alfred Raper, from west of Avoca, was looking after some business matters in town and as well securing material for some work which he is having done at the farm home.

Banker Elmer J. Hallstrom and Senator Fred L. Carsten were in Omaha Monday, where they were looking after some business matters touching the interests of Avoca.

On account of sinus trouble, Mrs. Henry Neumeister has been at the hospital in Omaha, where she received treatment for the affliction and is reported as showing considerable improvement since going there.

The Avoca lumber yard last week unloaded two cars of lumber and are expecting two others this week, putting their stock in excellent condition for the spring building program that is now quite general over the country.

Carl Lenhart, who has been in the hospital at Omaha for some time and who underwent an operation for correction from appendicitis, has so far recovered that he was able to return home last Sunday and is continuing to improve.

A. Z. Coatsman, who resides seven miles west of Avoca, was in town last Monday getting some lumber and material with which to do some work at the farm home and now has the workmen at work on the repairs which he desires to have done.

Carl O. Zaiser, the garage man, and Verne Rawalt were over to South Bend last Sunday morning, where they went to enjoy a few hours' fishing, returning in time for dinner, although the noon-day meal was delayed until nearly two o'clock to serve their convenience.

Jack Betts has been busy painting at the home of Fred Nutzman for nearly a month, doing both interior decorating and outside painting, as well as applying a coat to all of the outbuildings. Mr. Nutzman knows well the benefit of this protective covering and is taking care to preserve them from deterioration.

Had Excellent Time The district meeting of the four lodges of the I. O. O. F.—Nehawka, Avoca, Weeping Water and Elmwood, proved to be an enjoyable occasion for all who attended. The meeting comprised the greater part of the day and evening Thursday and all were loud in praise of Avoca's hospitality.

Included in the fine program that had been arranged was work in the initiatory degree, which was conferred on two candidates, being followed by a splendid banquet. There were a

total of ninety-three registered for the meeting from the four lodges, and all were well pleased that they came.

Senator Carsten Gets Flowers State Senator Fred L. Carsten, who was sick a number of days last week, was compelled to remain home during the time of his indisposition and was confined to his bed. He enjoyed receiving a fine bouquet of roses which was sent to grace his sick chamber during his illness, sent by fellow senators. Mr. Carsten is now feeling much better and is able to be about again, and is very appreciative of the thoughtfulness which his friends in the state senate had for his welfare.

Building Two Bridges Just at this time the county commissioners have ordered the building of two bridges west of Avoca and work has been commenced on them. Part of the material has been delivered from the lumber yard of H. M. Lum and workmen are at work on the structures. One of the bridges is located near the farm of Henry Doddhoff town and a half miles southwest of town, while the other is to be built two miles west and three-quarters of a mile north of Avoca.

Much Better at This Time Otto Houschuld, who was so severely injured when struck by lightning which killed the horse he was working, a fortnight ago, has now recovered to such an extent that he is reported as being much improved and is so he can be up a portion of the time. The many friends will be well pleased to learn of his improved condition and hope it will not be long until he can be about again fully restored from the shock.

Many Attend Baccalaureate There was a large and very appreciative audience at the Congregational church last Sunday evening to listen to the Baccalaureate sermon delivered by the Rev. Fred W. Hall. In his excellent discourse, the speaker gave the graduates-to-be some good and timely advice which, if carried out, will help them to attain life's goal.

Commencement Tonight On Thursday night at the Avoca town hall is being held the commencement exercises of the Avoca high school, with Governor Roy L. Cochran as the speaker. Governor Cochran is a very pleasing and able speaker and it is a distinct tribute to Avoca, that the executive of the state consented to take time from his arduous duties to come here on such an occasion, his decision to do so being influenced in large measure by the fact that he was born here and spent his early boyhood days here.

DROWSY JUROR Omaha.—A prospective juror in District Judge Yeager's court asked to be excused from duty because he always became drowsy and sleepy if confined in one room, particularly when there is nothing of great interest to keep him awake. The prospective juror explained his business was that of a cemetery attendant. "We'll try and find interesting cases for you which may keep you awake," said Judge Yeager as he refused the excuse.

Bible School Lesson Study!

Sunday, May 12, 1935 By L. Neitzel, Murdock, Neb.

"The Christian Church

Acts 2:41-45; Eph. 4:1-7, 11-16.

In this lesson we deal with the greatest institution in the world; no other can compare with it. Its purpose, aim, origin, it is unlike anything ever attempted by man. The only conclusion that is possible and reasonable is that it must be divine—in origin, aim, purpose and scope. The proof is in its stability. No other institution has been assailed with fire and sword, calamity, villified and come through it all stronger, purer and more potent than the church. Her divine origin is attested to by her Founder, who calls it "My church" and gives it the promise of permanence. (Matt. 16:18).

Her foundation is laid deep and strong upon the "Rock of Ages"—Jesus Christ; the Apostles and Prophets are the foundation also.

The word "church" is found in the New Testament, only, twice in Matthew and 110 times in Acts and letters; it means, "Called out of a multitude to form a particular group." In the Old Testament it was the "Assembly of Israel." It is as eternal as Christ. Jesus did promise to Simon Peter, not the keys of the church, but of the Kingdom of heaven, i. e. the sphere of Christian profession. Apostolic history explains and limits this trust, for it was Peter who opened the door of Christian opportunity to Israel (Acts 2:33-42) and to the Gentiles in the house of Cornelius (Acts 10:34-45). There was no assumption by Peter of any other authority. The power of binding and loosing was shared by the other disciples. (Matt. 18:18; John 20:23). The growth of the church is simply phenomenal. No other institution can compare with its growth. Nominally one-third of the human race adheres to the church. Her growth is illustrated by the three seed parables (Mark 4:3-8; 20-26; 30-32). The first tells of the seed broadcast and taking possession of individual lives; the second tells the history of the word in the heart, and the third sets forth the fortunes and destiny of the Gospel in the world." (W. Graham Scroggie).

Observe the smallness of the seed when it is sown, with the comparative greatness of the tree, when it is grown. One grain of life is worth more than a universe of clay. Life must find a way. It will rend rocks and defy the ages.

The early church had certain characteristics. They (a) continued steadfastly in the apostles teaching; (b) fellowship; (c) breaking of bread; (d) prayer. That was the secret of

their power, and assured growth and the good-will and "favour of all men." The communistic idea of the early church had no divine origin or sanction, hence was short lived. It never has succeeded anywhere. The selling of possessions was a volunteer act, as giving of greater sums of money today by individuals, when prompted by "constraining love" is pleasing to God. The church is likened to a house in which God dwells; hence must be kept clean. Christ gave us an object lesson (John 2:13-16). Thus should our churches be kept clean from all worldly amusement and money-making schemes—it is God's Home." Holiness becometh this house." (Ps. 93:5). The church is farther compared to a "body," where Christ is the head, and individuals are the members of the body. A beautiful picture of harmony and helpfulness among the members of the body. So must there be complete harmony—unity—among the members (1 Cor. 12:12-31) is the best explanation that can be given. A careful study of this passage will reveal to the student the perfect harmony between the members in the body. So is the ideal church. Why the disharmony in the church today? Can the function properly without harmony?

The Glorious Destiny of the Church In Eph. 5:22-27, we have a picture of the church as Christ wanted her to be. The perfect life between husband and wife is used as a pattern. Here is orderly subordination; the husband the head of the house—he is the protector and provider—so is Jesus Christ both of these for the church. "Love" is the bond between husband and wife—the measure of love that Jesus has for the church, he has shown in that he gave his life for it—"greater love hath no man." Accepting protection implies submission. So will the church submit—surrender all to Jesus, because constrained by the overpowering love. He in turn sanctifies, cleanses, washes and purifies the "body" that he might present it to himself a "glorious church," "not having spot or wrinkle or any such thing," that it should be holy and without blemish. Such is the purpose and aim for which the church is in existence—to make saints out of sinners, and only through the church can this be accomplished. What a tremendous job! What a glorious aim! What a wonderful privilege to be a co-worker with Christ in transforming men, fitting them for the Mansions of heaven—and "who is sufficient for these things?" "Our sufficiency is of God." Think on these things!
