To prevent motor damage when you

...drive slowly

...pick up quickly

...drive over 50

...you must have oil of high film strength!

DID YOU know that idling along at 10 miles an hour or picking up suddenly can cause as much motor wear as high-speed driving?

All three put extreme pressure on your connecting rod and crankshaft bearings. If your oil does not have enough oiliness and film strength to withstand these high pressures, your motor parts suffer damaging wear. That's why you need oil with the greatest possible oiliness and film strength.

Straight mineral oils have no more oiliness and film strength than they had 10 years ago. Some, because of over-refining, have less!

Conoco Germ Processed Motor Oil has more oiliness and 2 to 4 times more film strength than straight mineral oils! The Germ Process—adding concentrated oily essence to highly-refined, paraffin-base oil—puts into this oil more film strength

and oiliness than any oil possesses naturally, no matter what crude oil it is made from!

That extra film strength and oiliness enable Germ Processed Oil to stay on the job and prevent wear under the most extreme pressure and heat. It helps Germ Processed Oil give long mileage with greater motor protection, as proved by the famous Indianapolis Destruction Test.

Germ Processed Oil protects your motor another way. Because it penetrates and combines with metal surfaces, it forms a "Hidden Quart" that stays up in your motor and cuts down wear during the starting period.

Conoco Germ Processed Motor Oil is the oil you need in this day of slow city driving, speed on the highway and sudden acceleration everywhere. It protects your motor and saves you money!

CONOCO GERM PROCESSED MOTOR OIL

*MOTORISTS WHO KNOW THESE FACTS WILL SAVE MONEY!

Motor oils refined by the usual methods have some oiliness and film strength, but they may form carbon and sludge, which lead to expensive motor repairs.

Other oils may form almost no carbon and sludge, but are so over-refined that they are robbed of oiliness and film strength they need to prevent motor wear.

Germ Processed Oil is refined to eliminate carbon and sludge troubles and then the Germ Process adds extra oiliness and 2 to 4 times more film strength than any straight mineral oil, as tests on Almen and Timken machines have proved.

MYNARD TAKES OPENING GAME

From Wednesday's Daily
The kittenball season was opened last evening at Athletic park where a group of the rather chilled fans gathered to witness the battle of the Mynard Muleskinners and the Cohn Blue Ribbon boys.

The Mynard team proved the winners in a free hitting contest by the score of 14 to 13, the Mynard team massing fifteen hits off Casey while the Blue Ribbon team took thirteen safeties from Townner Livingston, Mynard hurler. The Mynard team had 12 errors checked to them to 5 for the beverage vendors.

The Mynard team built up a good lead that was never headed by the Blue Ribbons, altho they came close. Royal Smith was backstopping for Mynard in his old excellent form while Tom Kriskey, last year with the American Legion did the catching for the Cohn's.

The box score of the game was as follows:
