Certification of Cass Co. Labor Under the WPA

W. H. Andresen, Miss Beien Kouble and Miss Irma Suchy Here to Start Work on Projects.

The certification of Cass county residents on relief rolls for work under the new WPA projects was taken up Monday afternoon when Miss Helen Kouble of Lincoln, head of the district certification department with Miss Irma Suchy, who will have charge of the work in Butler, Cass and Madison counties arrived here to check the lists of those eligible for work. W. H. Andresen, of Syracuse, now attached to the Lincoln office of the re-employment and FERA service is also here to assist in getting the program arranged for the coming work period.

The new regulations that cover the expenditure of \$4,000,000,000 public relief funds provides that ninety per cent of those employed on the WPA projects be selected from those on the relief rolls in the counties.

Cass county is one of the counties of the state that did not enroll in the FERA but carried their own relief and now the governmental agencies are taking up the matter of covering the labor needs of these counties.

Miss Kouble and Miss Suchy, the latter to maintain offices here, will check and certify the Cass county labor on relief and refer these to the re-employment services who in turn will refer them to the WPA where labor is needed on the new projects that are opening under the new appropriations and certify the qualifications of the men.

The firm of Billhorn, Bauers and Peters, Inc. has a new contract to open in this territory and in which labor will be engaged from Cass county on the job. In this project there has been calls for men highly specialized in work that are not on the local relief rolls and these will be supplied from other counties, but the labor that is possible to be used will be from the local rolls and county.

The new ruling on labor from out the county is that they are certified from their own counties and must return there at the close of their work and not become a burden on the relief of the county where they may be working.

The representatives of the WPA and the commissioners will have a meeting at 4 p. m. today to discuss the certification as well as "cushion" projects that will care for the men that might be temporarily laid off other WPA jobs, which would provide projects where the labor force could be expanded or contracted as needed.

On the cushion jobs the security wage scale is prescribed, that of \$32 per month of 140 hours and \$44 for skilled labor. Under the rulings the man called on the \$32 job by reporting at the place of employment will be credited for his service whether the work is operated or not, but the higher class labor falling under another class will be paid for the actual labor.
