# Sees Television as Future Ace in Campaigns

While May Hear Speeches Today, Radio Firm Head Sees Great Future for Television.

"Although the national political campaign is going to be very much with us in 1936 and will have a distinctly beneficial effect on the sales of home radio receivers, I feel that we are yet at least two presidential campaigns removed from the time when the candidates for the country's highest command will come face to face with the householder on the home television screen," E. F. McDonald, Jr., president, Zenith Radio Corporation, says.

Consequently, while we lack practical home television, the factors that radio itself may add or subtract from personalities will play an important part in the coming campaign. Thousands will attend political meetings to see and to hear the candidates, but millions will be listening on the radio. "By their voices, ye shall know them and judge them," will most likely be the almost biblical injunction implied by every political broadcast, under whose influence many a vote will be finally cast.

Deprived of the potency of histrionic gestures, stripped of the accomplished orator's tricks of facial expression, unable to influence their public by the "cut of their jibs," the qualities of the speakers will actually rearrange themselves before the microphone according to the values of those things which are left in the voice alone. It becomes a question of how much of the magic of his personality, the speaker can pack into his voice. Thus, radio itself assumes the position of an influencing factor in the campaign,—a factor of no mean proportions. Here, indeed, is a field for imaginative speculation.

Television will finally bring a new alignment of the elements now projected into the home. Yet, too many adverse factors, especially on the broadcasting end still stand in the way of the imminent practicality of the much discussed and much heralded home television. So, for a visual preview of the presidential aspirants, I fear we must still depend upon public gathering places.

Meanwhile, though "eye-appeal" must for the present literally be left out of the picture, all indications point to the prophecy that the 1936 political battle will in increasing measure be fought over the air. The attacks will be through the ear alone. The promisory oratory of the contending candidates will thunder dramatically into your home, and my home, and will recreate itself over hundreds of thousands of radio loud speakers.

# Find Out

From Your Doctor if the "Pain" Remedy You Take Is Safe.

Don't Entrust Your Own or Your Family's Well-Being to Unknown Preparations

BEFORE you take any preparation you don't know all about, for the relief of headaches; or the pains of rheumatism, neuritis or neuralgia, ask your doctor what he thinks about it—in comparison with Genuine Bayer Aspirin.

We say this because, before the discovery of Bayer Aspirin, most so-called "pain" remedies were advised against by physicians as being bad for the stomach; or, often, for the heart. And the discovery of Bayer Aspirin largely changed medical practice.

Countless thousands of people who have taken Bayer Aspirin year in and out without ill effect, have proved that the medical findings about its safety were correct.

Remember this: Genuine Bayer Aspirin is rated among the fastest methods yet discovered for the relief of headaches and all common pains—and safe for the average person to take regularly.

You can get real Bayer Aspirin at any drug store—simply by never asking for it by the name "aspirin" alone, but always saying BAYER ASPIRIN when you buy.
