Martin R. Bloom**
Candidate for
State Legislature

• My conception of the Unicameral Legislature is that it should function as a Non-Partisan Board of Directors for the State of Nebraska, meeting every two years, or oftener, as the needs may be, for the purpose of planning and arranging the fiscal affairs of the State, checking up on the operation of the various activities of State Departments, and passing only such laws as are deemed absolutely essential.
• It is a conceded fact that our State Government is top heavy with Bureaus and Commissions and that our Statutes are now overloaded. I favor fewer and better laws, curtailment of State Activities in the various departments, strict economy and the elimination of the side-show feature of our legislative sessions.
