Cass county has no bonded indebtedness, as, like the state, it has paid cash for its gravel roads and other improvements. That's a mighty good policy to pursue.

Eat up distance, but not your bearings

Get alloyed oil... and you'll get the difference

Ask your wife: The least little heat makes smoke out of some of the oily substances she puts in her frying pan. They vanish double quick, while others stay put.

That's the sort of difference your hilliest hot-weather drive will show you in Germ Processed, the alloyed oil. Patented.

It not only stays up around "Full," but stays right up in every working surface of your engine. Yes, the pistons, cylinders, valve gear, and any types of bearings ever used, can really take in this alloyed oil. You might say they become lastingly, smoothly "oil-glazed."

And you can see that this added sleek oil-surfacing, together with the high-durability Germ Processed oil-film, easily doubles your guard against summer grief. Now when you want to go farthest fastest, get Conoco Germ Processed oil—the alloyed oil. Continental Oil Company.
