D. Ray Frans**New Soil Prac-
tices Ready for
Central Region****Farmers to Be Paid for Planting of
Certain Crops to Restore
Fertility of Soil.**

Washington.—The AAA announced a list of supplemental soil building practices for which farmers in the north central region will be granted payments under the new soil conservation program.

The AAA said the supplemental list had been approved by Secretary Wallace, following recommendations made by state committees and land grant colleges.

Payments on the new practices will vary from 75 cents per acre to \$3 per acre. These soil building payments are in addition to the soil conserving payments which are expected to average \$10 per acre throughout the country.

Among the newly approved practices are new seedings or perennial grasses on crop land or non-crop pasture land at rates varying from 75 cents to \$2 per acre, except created wheat grass for which the rate is .3 per acre.

Vetch, crimson clover, and annual sweet clover have been added to the

George A. Sites was called to Omaha last Saturday to look after some business matters.

Charles Hoback and family and Mr. and Mrs. W. A. Taylor were visiting with friends in Nebraska City on last Saturday.

Mr. and Mrs. Edward Lewis were visiting with friends and looking after some business matters in Plattsmouth last Friday.

Oscar Gafen of Plattsmouth, was a visitor in Union last Saturday and was meeting with a number of his friends as well as looking after some business matters for a while.

A. L. Becker with his driver for the truck, were over to Lincoln Monday of this week, delivering cord wood to some clients in the capital city, where it is used in a bakery.

Charles Land has been painting the interior of the garage and thus making it much lighter. It is adding to the appearance and value, as a good coat of paint is an insurance to any property.

Frank and Anna Bauer were visiting for the day last Sunday at the home of Mr. and Mrs. Harvey Schroeder of near Greenwood, where they enjoyed a fine visit and an excellent dinner.

George Clarke, son of Mr. and Mrs. Ira Clarke has accepted a place with the CCC camp at Blair, Nebraska, was a visitor in Union for over the week end, returning to his work at Blair on last Monday.

Ray Misner of Plattsmouth, district manager of Cass county and Superintendent Walker of Lincoln, for the Lincoln Telephone and Telegraph company, were in Union last Monday looking after business for the company.

Many of the farmers in the vicinity of Union have started corn planting and Reuben Hathaway said last Monday that he had to get at the work on Tuesday as he was getting restless as the other farmers were at the work, and why not him. The present conditions seem to justify getting the corn in, especially as there is a question of seed.

Plans Complete for Convention.

Mayor Edward J. Kelly of Chicago has issued a proclamation calling attention to the work and service of the American Red Cross which holds their annual convention there May 11-14.

There are many prominent speakers on the program for the four days and a good time is assured to all the delegates attending.

The Junior Red Cross have special programs all thru the week.

Railroads are giving rates of one fare plus one third round trip, and hotels are arranging to accommodate the many delegates who will attend.

Two delegates will go from the Cass county chapter. It is hoped others interested in Red Cross work will find time to take a pleasant vacation in Chicago at this time. You will know your Red Cross better.

Miss Augusta Robb of Union and Mrs. H. A. Tool of Murdock will depart Sunday.

Rally Day at Baptist Church.

Last Sunday at the parlors and in the basement of the Baptist church of Union was held a very enjoyable time as during the morning there was a large number at Bible school and which was most interesting with the excellent lesson. After which the Rev. L. Q. Morton, pastor of the church for the state, gave a very fine discourse which was greatly enjoyed. At noon time there was a dinner in the basement of the church, which was one of the delightful features of the day. A number were received into the church. The church is very active at this time and many new members have been admitted into fellowship and all are working with a good spirit for the betterment of the church and society.

The Early Bird Here.

This is not the one who comes and picks up the first fishworm which puts in its appearance, but the play of the Senior class of Union high school for 1936, and which was witnessed by a large crowd attending the show.

Visited Friends Here.

Mr. and Mrs. John Alwin of Plattsmouth who had been in Lincoln to take Mrs. Jesse Brady to the train, as she was returning to Casper, Wyo., after having attended the funeral of her sister, Mrs. Hugh Lockhart and where they visited an aunt of Mrs. Alwin, Mrs. Messersmith, stopped for a short visit with their friends, Mr. and Mrs. Phillip F. Rihn.

Here From the West.

Mrs. Dovie Buck, daughter of Mrs. Tabitha Smith who makes her home in California, arrived in Union last

week to visit with her mother, who has been very ill for some time and whose condition is far from the best at this time. The daughter came to see the mother and do what she could for her care.

Will Locate in South.

Word is received that A. W. Propst who has heretofore ben engaged in the automobile business in Nebraska City, and which business he disposed of early in the spring, will locate in the south, selecting Jacksonville, Fla. where he will engage in business and to where he departed early last week. Mrs. Propst was an over the week end visitor at the home of Mr. and Mrs. E. E. Leach of Union.

Home From a Visit.

Mrs. Jennie Frans, mother of D. Ray Frans who has been visiting at Unadilla with relatives and also with her son, Rue H. Frans at Syracuse, for the past three weeks, returned to Union last Sunday, being accompanied by Mr. and Mrs. Frans and the children, they visiting here for the day at the homes of D. Ray Frans and family and with Mrs. Frans' mother, Mrs. Rose Kendel and daughter, Miss Rachel.

Union Schools to Close.

The Union schools which have been operating with regularity, the students keeping at the work, have been making good progress, are to close in three weeks, or on May 22. There will be a goodly class of the students graduate and will go out in the world to make a place for themselves, being well equipped for the fight with the proposition of making a living and fitting themselves in the work of the world.

Met with Their Fellows.

The Senior class of the Union high school was over to Nehawka where with the senior class of the Nehawka high school and that of the Avoca school were enjoying a picnic together which is a very fine thing, as they are all to graduate and go out in the world to make a place for themselves. May you succeed, is our wish.

Burning Chimney Causes Excitement

As a demonstration of the effectiveness of the fighting force of the Union fire boys, when the flue at the home of Winnie Crowford was reported as being afire, the boys were right on the job and soon had all danger of its spreading past. Just a short time afterward a fire wagon, well equipped stopped on its way to Syracuse, a brand new one, which was parked while the driver secured a lunch. Many of the fire boys and citizens were admirers of the new wagon.

Win Over Nebraska City.

The Union baseball team who played a team from Nebraska City at the Hoback park southeast of Union last Sunday, won by the score of 14 to 5. The Union team will play the team of the CCC camp the coming Sunday.

Married at Nebraska City.

In Nebraska City last Friday was celebrated the marriage of Miss Dorothy Tigner, daughter of Mr. and Mrs. Fred Tigner, and Ralph Marshall. The ceremony uniting the lives of these two young people took place at the parlors of the Methodist church at that place. The young people will make their home in Union and have obtained apartments at the home of Mr. and Mrs. Charles Atteberry. The Journal joins with their many friends in extending congratulations and best wishes.

**Wilt-Resistant
Asters a Very
Hardy Race****Plant Them for Continuous Bloom
in Late Summer; They Are One
of the Showiest Flowers.**

Have you found trouble growing asters the last few years? If so, whether you know what caused the trouble or not, it will pay to try the wilt resistant strains this year.

These are families of asters which have been grown in soil infected by the wilt disease, and have shown ability to throw off the disease and survive where others die.

They have exceptional vigor, and seem to overcome all difficulties better than the standard bred strains. They are not resistant to any specific disease except wilt, and where the yellow disease is prevalent, not all the wilt resistant plants will escape the yellows. But some will, and in general it has been found that those who have trouble growing asters, get far better results with the resistant strains.

Nearly all the types and colors are now obtainable in wilt resistant strains. A succession of asters may be obtained in two ways—by starting the late types early in the house or in a frame and making successive plantings until they may be sown in the open ground, or by sowing early, mid-season and late types at the same time.

The giant branching type is perhaps the most satisfactory and the showiest of the asters. It makes a beautiful bed, and is fine for cutting, its huge, delicate blossoms being as soft and finished looking as the florists' cut flowers. They grow up to 3 feet in a wide range of colors.

The ostrich feather, or crego type, with their plume-like heads, resemble the chrysanthemum, and are almost as large. The petals are curled and twisted into a soft ball of delicate color, supported on a straight stem, which makes them ideal for indoor decoration. Like the rose, a single bloom will show off in a vase.

More sensational is the California sunshine type, with its daisy-like contour which belies the aster heritage. Their loosely placed outside petals usually contrast in color with the creamy yellow or blue centers, and they grow up to 3 feet tall.

Rose and pink with lavender and purples are good colors to mix with white asters; but as with other annuals, they show off better when planted in solid colors.

The seed should be sown thinly to make transplanting easy and save waste of plants in spindling, overcrowded seedlings. They should be transplanted from the original seed box or pot 1 inch apart as soon as the first true leaves are formed and grown until ready to set into the open ground.

It is well to bring them into bloom before the latter part of August or after that period as at that time comes the flight of aster beetles, which are so destructive, and eat the blooms and buds badly. Cultivate them frequently, and give them applications of tobacco dust to destroy the pests. Never plant asters on the same piece of ground two years in succession.

Inflated or ordinary dollars—either kind will still buy most if expended in your home community, where a part is retained to help meet the tax burden and other community obligations.

GARDEN TALK

You can shape the plant by picking out an inside or an outside bud.

Don't put manure in the hole; put it on top of the ground as a mulch.

There are just three easy-to-remember principles of correct planting—(1) Plant in masses; (2) Avoid straight lines; (3) Leave centers open.

Plant something. Your pride in your home and your community is judged by the way your place looks. Make it attractive.

Shade trees should be staked the first season after planting, and the soil pressed down firmly. If this is not done the trees will be loosened by wind storms and will lean slightly towards the direction of prevailing winds.

Don't forget to water thoroughly all trees and plants during the first summer after planting.

Evergreens are beautiful the year around but are especially effective in winter. They retain their foliage and liven up the landscape when other things are dormant.

The first cost of a tree or plant is a very small item compared to the value of the investment a few seasons later.

Hydrangeas should never be pruned in summer, for they bloom late in summer at the tips of the current season's growth. However, if winter pruning is directed to cutting back the tops of the bushes contrary to general pruning rules) this will result in vigorous branching and in a liberal show of bloom in the autumn. Thus Hydrangea is a partial exception to the rule of pruning shrubs from the bottom, although a comparatively frequent renewal from the base of each plant will, in the long run, be an advantage to this species also.

If your early flowering shrubs are to yield a maximum of bloom they should be pruned moderately and regularly every year directly after blooming. This pruning must be done skillfully and at the right moment.

Woody climbing vines usually make such extraordinary growth each summer that it is desirable, sometimes necessary, to cut out relatively large quantities of this wood each year. This pruning should be done very early in spring, generally in February.

It doesn't take a very great stretch of the imagination to consider your house and its surroundings as a painting when you exhibit it to a prospective buyer. In purchasing a home, as in buying a painting, the first impression has much to do in determining the decision. Certainly a house situated in the midst of a barren tract of ground will not carry the same feeling tone that the same house would if surrounded by a well-planted lawn and flower garden.

CARD OF THANKS

We wish to thank all of our friends and neighbors for their many acts of sympathy in our bereavement, as well as those taking part in the funeral services of the late Miss DeHart, and for the beautiful flowers.—Ward M. Whalen, Miss Della James and Family, Mrs. Olive Kayton, Mr. and Mrs. W. W. DeHart.

**Candytufts
for Cutting****New Snow-White Spikes Make Impo-
siting Display—Have Been
Greatly Improved.**

An old-fashioned annual that has been greatly improved, and in the hands of the florist has become a major greenhouse subject, is the candytuft. Under glass it makes imposing spikes which may be approximated by good culture in the garden. The usual difficulty that results in smaller spikes of bloom is crowding and lack of cultivation.

The huge spikes of snow-white bloom which you see in the florists' window are distinctly different from the old-time garden variety, and they may now be grown in the garden, although the smaller umbellata types are more satisfactory for color massing.

The candytufts grow about a foot high and like a position in full sun. They bloom in about eight weeks after sowing, but as the blooming season is rather short several sowings are needed to maintain a succession of bloom. They are very popular as edgings for taller annuals and perennials.

The common practice has been to sow the seed thickly in a row and leave the plants to struggle along. As they always give brilliant bloom they do not receive the attention they deserve. Each plant should have at least 6 inches of space.

While white is the most popular cutting variety the colored types are most valued for their fine effect in the garden. There are carmine, crimson, lavender, flesh-pink tones which are equally beautiful. The season is prolonged somewhat by cutting off the bloom as soon as it begins to fade to stop the formation of seed, but the best way is to sow crops two weeks apart.

The giant types, which have much heavier growth than the common garden sorts, should be given a foot of room, and applications of plant food to develop their beauty and large spikes of bloom. It is one of the hardest of annuals and may be sown as soon as the ground can be worked. Thin it and see how much better a plant it will become.

TO TEACH AT FT. CALHOUN

Mae Shrader, daughter of Mr. and Mrs. Homer Shrader of near this city, has been elected as a teacher for the coming term in the Fort Calhoun, Nebraska, city schools. She will teach in the sixth grade and also have art work in the grades. Miss Shrader has been teaching in the Cass county schools since her graduation.

DEATH OF BABE

From Tuesday's Daily
This morning the death of Freddie Ramon Gregory, infant son of Mr. and Mrs. Alvin Gregory, occurred at the family home in the south part of the city. The little one was born here on February 3, 1936.

The funeral services will be held on Wednesday afternoon at 2 o'clock at the home on South 9th street.

TOT DIES OF POISON

Holbrook, Neb.—Kay Grieninger, 2, son of Frank Grieninger of McCook, died here Friday at the home of his aunt, Mrs. Theodore Fetters from poisoning. Relatives said they did not know how the child obtained the poison.

It is with great pleasure that we wish to thank the many patrons who attended the grand opening of our new Meat Market in Plattsmouth last Saturday, and we hope to continue the same pleasant business relations in the future. We will strive to give you at all times the wonderful values and quality in every item purchased in the future that you experienced at our opening day sale. Thanking you again and hoping to please you again Saturday—Sincerely, MAYWOOD FOOD CENTER.
