Landon Asks for Recovery as the Foremost Need

Governor Whirled Thru Iowa with Crowds Greeting Him on Way; Takes Slap at Spending.

Aboard Landon Train En Route East.—Gov. Landon campaigned across Iowa from the rear platform of his train, contending that recovery and jobs are the fundamental issues, talking about crops and rain and shaking hands so hard he lost his Masonic ring.

The republican candidate's special departed from Council Bluffs a little ahead of schedule, but it lost time steadily as new stops were added and stops stretched out longer than scheduled. A blazing sun shone down throughout most of the day, but Governor Landon left his air conditioned car promptly as his train whistled into every stop. He waved his hat to the crowds, talked to them, smiled broadly and shook as many upstretched hands as he could before his train pulled on tagain.

He left orders that he was to be called so he could at least wave his hat should a crowd of any size form at stations along the railroad at which stops had not been scheduled. "Governor Landon," said Harrison Spangler of Cedar Rapids, assistant to the national republican chairman, "received a mighty fine reception in Iowa. It convinces me even more that Iowa will go Landon and republican this fall."

Hard Year for Agriculture.

"When we have a hard year for agriculture like the present one," the governor reiterated at several stops, "we realize our wants and our necessities. One of the fundamental principles of the republican party in this campaign is to promote recovery and provide jobs. If any measures will provide jobs I'm for it, and if there is any measure that will hinder recovery and hinder re-employment I am against it."

Governor Landon spent his second day of speaking in the state where he will meet his democratic opponent face to face Sept. 1 at the president's Des Moines drought conference with Governors of Iowa, Nebraska, Kansas, Missouri and Oklahoma. All, including Governor Landon, said they would accept the president's invitation.

The Kansas governor received his bid at Carroll, Ia., after a relay from Topeka, Kas. Earlley Landon said: "As I said before, I will accept."

Two of the men who will accompany him to the conference were named. They are Prof. W. E. Grimes, head of the department of economics and sociology at Kansas State university, and Dean L. E. Call of the university's school of agriculture.

STATE BELOW AVERAGE

Director Tolson of the state assistance committee has received a report from the federal social security board showing an average paid in June in 34 states for old age assistance was \$16.02. Nebraska for that month was listed as paying an average of \$15.33. Tolson said Nebraska's report for July, just compiled by him, shows this state paid an average of \$14.71 for that month. The federal report for June credits Nebraska with paying 20,583 persons a total of \$315,586 for the month. The total number paid in 34 states was 635,395 and the total amount for June was \$10,180,642. The June report shows payments and averages for old age by other states: Missouri, 15,449 persons, average, \$8.95; Iowa, 29,584 persons, average, \$14.54; Colorado, 7,983 persons, \$22.32; Wyoming, 2,243 persons, average \$21.01; Minnesota, 37,647 persons, average, \$18.53. Nebraska has paid old age assistance to 221 persons per 1,000 aged population 65 years of age or over, Missouri to 53 per 1,000, Iowa 142 per 1,000 and Colorado to 304 per 1,000.

Cash Farm Income in June Nearly Double

Including Benefit Payments, Says A. E. Anderson of State and Federal Division.

Cash farm income in Nebraska for June, including benefit payments, was 97 percent greater than in June, 1935, or nearly double, says the state and federal division of agricultural statistics. Farm income was 29 percent greater for the first 6 months of 1936 than for the same period last year. For the United States as a whole, farm income, including benefit payments, in June was 32 percent greater and for the first six months of the year, 9 percent greater than for the same periods last year.

Nebraska farm income for June totaled \$23,888,000 against \$12,145,000 in June 1935, a gain of 97 percent. This includes benefit payments in the amount of \$5,077,000. Deducting benefit payments, the gain in income for June was approximately 65 percent, and for the first six months of the year, the farm income was 44 percent greater excluding benefit payments.

This is a remarkable showing for Nebraska, said A. E. Anderson, considering that last year's corn crop was considerably below half of the average and of very poor quality, and that the winter wheat crop was about two-thirds of the average and oats and hay were the only crops that were nearly normal. The large increase in farm income shows how rapidly Nebraska can come back when farmers receive fair prices for their products. The returns so far this year do not show the effects of the present season's severe drought, which will be reflected in later income. Had this year's production been average, it is fair to say that Nebraska would have been in splendid condition. Altho the purchasing power of farmers' products is still 10 or 12 percent below that of the pre-war average, it is almost double that of a few years ago. Since 1934 was one of the worst crop years in the history of the state and since production last year was considerably below average, taking all crops as a whole, the improvement reflects the marked advance in prices of farmers' products, which are now within 10 or 12 percent of the so-called parity price.

For the United States as a whole the farm income for June was 28 percent greater than in June 1935, exclusive of benefit payments. Farm income for the first six months of the year, exclusive of benefit payments, was nearly 15 percent greater than during the same period in 1935.

NEW GYMNASIUM FOR DOANE

Crete.—In view of an unauthorized statement published in certain state papers Aug. 18, under a Crete date line, regarding the proposed new gymnasium for Doane college and containing certain statements that are both inaccurate and misleading, Acting President J. E. Taylor authorizes the following statement:

"It is true that on Aug. 1, a good friend of the college, recognizing the emergency, made a generous conditional offer toward raising a fund necessary to build a permanent and for some years to come, adequate gymnasium for the college. A vigorous campaign was immediately carried on and thru the generous response of many friends, pledges were secured to meet the conditional offer. Meanwhile, the architect was at work on plans and specifications, but obviously no definite announcement could be made until these plans were approved by the college authorities and bids were secured within the limits of the budget raised. The architect's plans are now in the hands of prospective bidder. It is expected that by the end of this week bids will be in hand. If the bids are within the budget subscribed, and if other conditions are acceptable, it is expected that the contract will be let and work begun within the coming week.

"Anyone who has known of the condition of the old gymnasium which was built some 20 years ago, largely by gifts and work of students and teachers, will understand the need of the new building and will share with us the hope that the proposed undertaking can be carried thru to completion before the coming basketball season."

Small factories will find splendid opportunities to expand here. Among them, forthcoming river navigation with its resultant low shipping costs.

TREATY HITS AUTO THEFTS

Washington.—A treaty designed to end the activities of automobile stealing "rings" along the Rio Grande border is under negotiation between the United States and Mexico. State department officials said the proposed anti-smuggling pact which may be signed in the near future was planned to prevent the driving of stolen cars across the 1,600 mile boundary between the two nations, and to facilitate the recovery of stolen cars transported across the border.

A similar treaty with Canada, in effect ten years, has resulted in a reduction of the number of stolen cars transported across this nation's only other land border, and expedited their recovery by eliminating much red tape. The federal bureau of investigation has reported that in 1935 it recovered 2,930 automobiles that had been transported across state lines. Many of the cars were stolen by organized syndicates that specialized in driving the machines to distant cities for sale.

Railroad Rates for Stock Shipment are Cut

Drought Impelled Reductions Affect 65 Counties in Nebraska and All in the Dakotas.

Washington.—Extending provisions of previous orders, the Interstate Commerce commission authorized six railroads to transport livestock at sharply reduced rates from areas in Kansas, Montana, Nebraska, the Dakotas and Wyoming to feeding points in nearby states.

The rates are 85 percent of the regular charge on livestock shipped from the drought areas, and 15 percent of the regular rate when it is shipped back.

Under the supplemental order, the rates will apply to all counties in the Dakotas, 65 counties in Nebraska, 52 in Kansas, 36 in Montana and 16 in Wyoming.

Livestock may be shipped to available feeding grounds in Colorado, Idaho, Illinois, north of the Illinois river, Iowa, Kansas, upper peninsula of Michigan, Minnesota, Missouri, Montana, Nebraska, the Dakotas, Washington, Wisconsin and Wyoming.

At the same time the ICC broadened the low-rate area, it extended from June 30, 1937, to Sept. 30, 1937, the deadline for reshipment of livestock from feeding areas to the drought territory.

Railroads affected by the order were the Santa Fe, Rock Island, Kansas City Southern, M. K. & T., Missouri Pacific and St. Louis-San Francisco.

The ruling covered the following counties in Nebraska:

Adams, Antelope, Banner, Boone, Box Butte, Boyd, Brown, Buffalo, Burt, Butler, Cass, Cedar, Cherry, Clay, Colfax, Cuming, Dakota, Dawes, Deuel, Dixon, Dodge, Douglas, Fillmore, Franklin, Furnas, Greeley, Hall, Hamilton, Harlan, Holt, Howard, Jefferson, Johnson, Kearney, Keith, Keyapaha, Knox, Lancaster, Madison, Merrick, Morrill, Nance, Nuckolls, Otoe, Pawnee, Perkins, Phelps, Pierce, Platte, Red Willow, Rock, Saline, Sarpy, Saunders, Seward, Sheridan, Sherman, tanton, Thayer, Thurston, Valley, Washington, Wayne, Webster, York.

FALLS DEAD AT HOSPITAL

Hastings, Neb.—Preparing to leave the hospital here, after a 21-day stay, Mrs. Charles Watts, 52, of near Nelson, dropped dead. Mrs. Watts underwent an operation three weeks ago and was talking to her doctor just prior to returning home when she suddenly fell dead. Her husband and six children survive.

RETURN FROM TEXAS

Mr. and Mrs. Glenn Woodbury, of Nebraska City, former residents here, returned to their home Thursday from Houston, Texas, where they were in attendance at a convention of court reporters. They also attended the centennial celebration at Fort Worth, before returning home. They report that the weather in Texas has been even hotter than in this section.

VISIT AT DRUCKER HOME

Mrs. Al Teniga and two children arrived from Chicago to visit with her parents, Mr. and Mrs. Fred J. Drucker about ten days. Mr. and Mrs. Guy Woodward and Miss Inez Drucker motored from Lincoln last night to visit also with the parents and sister at the Drucker home.

President Confers on Crop Insurance

That and Rural Credit Problem Taken Up with Master of National Grange.

Hyde Park.—A post election conference of farm organizations to study an effective approach to the problems of crop insurance and rural credit was suggested by President Roosevelt as he continued to survey drought relief needs.

Crop insurance and rural credit are two of the key items of the legislative program of the national grange, and Louis J. Taber, master of the grange, said they had been emphasized, along with drought problems, in an hour's conference with the president and Secretary Wallace.

"The president and Wallace," Taber told the reporters afterward, "suggested it might be a good idea to call a conference of farm organizations and other interested parties after the election to consider an intelligent approach to both these problems, crop insurance and rural credit. The president gave assurance that the administration was studying something sound in this regard."

The grange, Taber said, is advocating a crop insurance program carried out thru federal state co-operation at a cost of around 25 million dollars a year. The cost would be much lower than for the present method of drought relief, he said.

Wallace, who is expected to accompany Mr. Roosevelt on a trip to the drought parched midwest starting Tuesday night from Washington, conferred with the president privately about drought conditions, but had nothing to say for publication afterward.

The itinerary for the drought states tour was virtually completed during the day, but the president was holding up its announcement until all details were final. White house aides said they expected to make it public Friday and at the same time dispatch invitations to drought state governors for a series of conferences with the president on his swing thru the dust bowl. The president said some time ago that Governor Landon would be included, and the Kansan indicated he would accept.

Mr. Roosevelt planned to enter personally into the campaign for his re-election before starting for the Dakotas. James A. Farley, chairman of the democratic national committee, was expected at the president's home here Friday or Saturday.

TRUCKERS GIVEN WARNING

Commissioner Bollen of the state railway commission said: "There have been 600 applications to date for certificates of convenience and necessity made to this commission by truckers engaged in interstate business, having 'grandfather' rights under the commission's resolution 141. The commission is well aware of the fact that this is a very small number of the operators in Nebraska who are entitled to apply under the 'grandfather' provision.

"All truckers who were transporting for hire within the state of Nebraska on or prior to April 1, 1936, will automatically be issued a certificate of convenience and necessity to continue this business, providing application for such a certificate is received in this office not later than Aug. 29, 1936. It is very important for all truckers to take note of the fact that any applications received after Aug. 29, will be considered as new applications, even tho in fact the operator may have been in business for a considerable period of time.

"All such new applications will require a hearing and the applicant will be required to prove public convenience and necessity in order to receive his certificate. Furthermore, all persons desiring to do so will have an opportunity to object to the granting of such new applications. No fee is required at this time, and furthermore, under the commission's resolution 141, it is compulsory for all common carriers for hire by motor vehicle to obtain a certificate of convenience and necessity. Truckers should act at once and delay no longer. By so doing they will protect all the rights they now enjoy—otherwise the same might be lost."

MARRIED 50 YEARS OR MORE?

The program committee of the King Korn Carnival would like to have the names of all couples who have been married 50 years or more, or who will have been married 50 years by Sept. 25th, 1936. Please write or phone these names to Mr. Ed Schulhof, or call No. 150.

Wabash News

Wm. Rueter has added to his transportation equipment a new Chevrolet auto of very recent date, and will make them a fine family car.

Mrs. Henrietta Lawton, accompanied by Miss Myrtle Woods, was a visitor in Weeping Water Wednesday of last week where they were looking after some shopping and visiting with friends.

Mr. and Mrs. Fred Weyers were visiting for over the week end at the home of the parents of both Mr. and Mrs. Weyers. Mrs. Weyers also attended a meeting of the ladies society while there.

W. F. Langhorst has been afflicted with what some say is a benefit, but even if this is so, they are very inconvenient, for they are boils, such as the patriarch Job, had, and Mr. Langhorst when visiting with his friends at the store, continues to stand up all the time.

H. H. Gerbeling, notwithstanding the very dry weather, was making some repairs on the roof of his home, as with the severe hail of last spring the roof was not left in the best condition, and even with the slight showers of this summer, leaks appeared and Henry wanted to play safe and so is putting it in the best of condition.

Visiting Here with Father.

A. B. Stromer and wife of Alvo were in Wabash to visit with the father of Mrs. Stromer, Mr. John C. Browne before the started on their vacation. Mr. Stromer is rural carrier out of Alvo and they take an annual vacation, this time taking them to Estes Park and other points of interest in Colorado, where they have been for the past week, but are home now. They were also enjoying the companionship of the Orest Cook family on the trip.

Here from the East.

Miss Myrtle Wood has been enjoying a visit from relatives from the east, Mr. and Mrs. R. Parker Eastwood, the former being an instructor at Columbia University. They were accompanied by their daughter, Miss Grace Eastwood and are also visiting in Lincoln with relatives and friends. They will remain for the rest of the month, returning east in time for the opening of the school year at the university.

Assisted on Elmwood Program.

The concerts which are provided by the city of Elmwood, and which are attended from all over the western part of Cass county every Wednesday was made the better last week when the Wabash Quartette was over and rendered a group of numbers to entertain the large crowd.

Business Changes Hands.

Wm. Winkler who has been conducting the department store in Elmwood, has not been in the best of health for some time and with an offer of purchase of the business last week by Orville Quellhorst, he accepted and the business turned over to the new proprietor last Wednesday. Orville Gerbeling has been assisting in the opening of the business and until the new proprietor gets acquainted with the routine, as he has been engaged in other lines.

Does Your Car Go To School ?

When school starts, hundreds of cars will make trips to the school house each school day.

BETTER SAFE THAN SORRY

If your children are driving a car to school, see to it that you are fully insured. Call or see—

before. Mr. Winkler will take a rest for a time before deciding just what he will do in the future.

Accepts Change in Work.
Guy Hinds, who has been employed with the Missouri Pacific railway as a member of the extra crew on track work out of Wabash, with a vacancy on another section, Mr. Hinds was sent over to supply the place. This was agreeable inasmuch as the pay was greater, but he is compelled to be away from home.

Home from Vacation.
Mr. and Mrs. Harry Greene of Elmwood, who have been taking a vacation for the past ten days, had Mr. and Mrs. Albert Rueter care for the home in Elmwood. With the return of Mr. and Mrs. Greene they moved to a farm two miles west of Wabash where a cozy home has been prepared for the newlyweds.

Hurrying Hog House Along.
L. R. Stanley, who has been working along as best he could with the hot weather in his way to get the hog house done for the piggies, thinking there was a good bit of time before winter. Now when the thermometer dropped a few degrees in a day has employed Fred Shellhorn and Frank Reese and the work is going on very rapidly and we are expecting the hog house will soon be completed.

Sells His V-8
Warren T. Richards has disposed of his V-8 Ford coupe to "Preach" Moore and while he has heretofore been able to go where he wanted, he now has to depend on other means of transportation. But not for long, for Warren must have some means of transportation, and no doubt will.
