Has an Old Timepiece
Oscar McDonald has a watch that was made in England in the year 1755, being, of course, very ancient looking in both design and mechanism. It has a barrel type chain drive with the spring or propelling force encased in the barrel, which is so arranged that the chain travels around the outside of the barrel, one wrap of the chain passing above the other. Oscar is willing to stake this ancient timepiece against the more modern day watches when it comes to reliability.

The Manley parish has been served by a number of priests in the last few years, and all are hoping a permanent assignment has now been made by the Bishop of the Lincoln diocese.

Hallet Gildersleeve Named to Iowa-Nebr. Post

Appointment Made by President L. R. King—Succeeds the Late Stanley Taber.

L. R. King, president and general manager of the Iowa-Nebraska Light and Power company, announces the appointment of Hallet Gildersleeve, Lincoln, as assistant general manager in charge of merchandising for the company, filling the vacancy created by the recent death of Stanley Taber.

Mr. Gildersleeve, who has been with the company for the past nine

HALLET GILDERSLEEVE

years as sales supervisor of the Lincoln district, will now supervise merchandise activities of the entire fourteen districts of the company including Lincoln.

In announcing Mr. Gildersleeve's appointment, Mr. King said: "The company will continue its forward looking policy in carrying to the public messages of the latest and most practical uses of electric and gas appliances and equipment. The company reiterates its belief in sound, ethical merchandising methods and in dispensing tested and approved products of full value."

"In recent months," stated Mr. King, "several new activities have been started, among them being the development of a completely modern kitchen to be installed as a unit either in new homes or remodelled existing homes. Another important activity of recent origin has been the development work in rural areas. Every day, the benefits and conveniences of electricity are being made available to more rural dwellers at unprecedented low rates in the 25,000 square mile area served by this company in eastern Nebraska, southwestern Iowa and northwestern Missouri. It is planned to carry on these activities."

Mr. Gildersleeve first entered the utility business more than twenty years ago at LaPorte, Indiana, where he was employed by the LaPorte Gas and Electric company. Later he became floor salesman for the Northern Indiana Gas and Electric company at Ft. Wayne. In 1919 he joined the

Humphrey company in Kalamazoo, Michigan, and represented them in Iowa and Nebraska until his affiliation with the Iowa-Nebraska Light and Power company in 1928. His appointment is effective at once.

CIRCUS SLANG

Noting a scent of spring in the air and the departure of the circus from its winter quarters for its annual trek to the country, The Literary Digest lists a few highlights of circus slang:

The Big Rag—the main circus tent—the "Big Top."

Back Yard—the area behind the main tent, giving onto property tents, dressing tents and private tents.

Ducat Snatcher—the ticket taker. Shill—the gentleman who excitedly pushes you aside in his eagerness to get into a side-show or concession—employed by the concessionaire.

Waxey—a harness-maker and repairer.

Bible—the large program sold in the Big Top.

Bag Guy—balloon vender.

Annie Oakley—free ticket or pass—its punched holes are reminiscent of the bullet holes in playing-cards made by the famous marksman.

Croaker—slightly ambiguous term of endearment applied to staff physician.

Boss Windjammer—the band leader—the circus still prefers wind instruments.
