Distribution between city area proper and outlying suburbs is respectively 2,891,020 and 2,042,825. Those employed inside the city itself number 2,072,229, many of whom are commuters from the suburbs. The suburban area employs 857,703 persons.

Ramparts Are Dividing Line The division between city and suburban districts is clearly defined in Paris by the old ramparts which are being removed. This circular limit is girdled by a broad highway built on the foundations of the last city walls and forts erected after 1870. Four successive waves of growth can be seen on a street map of Paris by the highways built on the different walled areas which were successive city limits. Today, with the last walls down, Paris has started a big march into the surrounding country.

The largest classification of employed persons is that of merchants, clerks and office workers. Third in importance are domestic servants, with textiles and tailoring fourth, followed by transport workers, administrative workers, liberal professions and building workers, all grouping more than 150,000 persons each.

Workers live close in Industrial workers, led by the metallurgists are first in the Paris area. Industries including textiles, paper, rubber, leather and glass, together with metal workers total almost 600,000 workers, placing Paris far ahead among French industrial cities. Most of these workers live within the city limits proper, in the outlying ring of districts which has been named the "Red Belt."

Biggest change in recent years was the growth into the country of the suburban area. The municipality as a result, has begun a big scheme for the extension of all subway lines one to two miles beyond the present terminals at the old city wall limits.

Here with Her Parents. Mrs. Hazel A. Ford, daughter of Mr. and Mrs. Ernest A. Jamison who has been making her home at West Palm Beach, Florida, arrived home last Sunday, coming via Chicago and is with her father during his illness, which has been very severe. He is showing some improvement at this time, however. Mrs. Ford finds it impossible to remain but a few days.

WOULD EXPORT MEAT BEAUNOS AIRES, Oct. 6. (UP) Argentina will export meat to the United States to prevent a threatened shortage if Washington abolishes restrictive sanitary regulations, Minister of Agriculture Miguel Carcano said today. "The Argentina is interested in sales to the United States" he said. "Our cattle breeders would take the utmost care in satisfying American demands." "Argentina is actually in a position to carry out export to the United States" under similar advantages which we offer to the other countries who are customers and who now impose no restrictions on our produce."

Jobs are Held by 3 Out of 5 Paris Citizens

Metal Workers are First Among 3,000,000 Employed—Increase Under Blum Regime.

PARIS (UP)—Almost 3,000,000 of Greater Paris' 5,000,000 inhabitants are gainfully employed, statistics show. There was a perceptible increase after the Blum government took office, due largely, it is explained, by work on the Paris Exposition, both in production and public service branches.

The astounding fact revealed by figures is that Paris is one of the largest metal producing cities of Europe, and can lay claim to being the largest metallurgical center of any capital city. A total of 424,627 workers are employed in metallurgical factories inside the Paris area. Moreover, most of the factories are located within the city itself, and not in the suburban area of Greater Paris.

Distribution between city area proper and outlying suburbs is respectively 2,891,020 and 2,042,825. Those employed inside the city itself number 2,072,229, many of whom are commuters from the suburbs. The suburban area employs 857,703 persons.
