Sentinels of Health

Don't Neglect Them!
Nature designed the kidneys to do a marvelous job. Their task is to keep the flowing blood stream free of an excess of toxic impurities. The act of living—life—constantly producing waste matter the kidneys must remove from the blood if good health is to endure. When the kidneys fail to function as Nature intended, there is retention of waste that may cause body-wide distress. One may suffer nagging headaches, persistent headaches, attacks of dizziness, getting up nights, swelling, puffiness under the eyes—let these nerves, all worn out.

Frequent, scanty or burning passages may be further evidence of kidney or bladder disturbance.

The recognized and proper treatment is a diuretic medicine to help the kidneys rid of excess poisonous body waste. The Doan's Pills. They have had more than forty years of public approval. Are endorsed the country over. Look up Doan's. Sold at all drug stores.

PRAISED FOR CHILD WELFARE

In speaking on "Child Welfare" before the district Legion convention at Nebraska City Tuesday, Department Commander Ted Metcalfe paid tribute to Plattsmouth Legion post or what he termed an example of outstanding work along this line. "If that isn't an example of unselfish community service and child welfare work combined, then I don't know what is," said Commander Ted.

Later, when cold weather sets in, it is the plan of the Legion trustees, administering the Community Building club funds to revive the shoe distribution so that no child will have to remain home from school on account of lack of footwear.
