### EXTENSION WORK ON BALLOT

Cass county people next Tuesday at the general election will have one important side issue to vote on in deciding whether they wish to support agricultural extension work through the county agricultural agent's office. Approval will mean that more extension work will be carried on in future years.

On the ballot the question will read: "Shall an appropriation be made annually from the county general fund for the support of agricultural extension work?" Officers of the Cass county farm bureau, the organization through which the work is legally carried on, said this week the question is one of the most important upon the ballot.

In asking people to wholeheartedly support the affirmative, the farm executives from all parts of the county pointed out that extension work has been going on in the state since 1914 and is not a new agency. Likewise they said approval will not mean the expenditure of increased funds since levies under the county general fund are now at the maximum permitted by law.

Approval will mean that increased emphasis will be put on 4-H club work, seed improvement, women's project work, seed corn testing, pasture improvement, Clarke McNary tree distribution, bindweed eradication, farm and home accounts, livestock improvement, feed conservation problems, variety tests for corn and small grains and other similar activities. All such work has just been nicely started now and has shown material results.

Agricultural extension work is carried on through the county agricultural agent's office, headquarters for all agricultural activities in Cass county. The extension service is one of three divisions of the Nebraska college of agriculture and has for its purpose through better farm and home practices the object of "Making farming more profitable and farm homes more comfortable." Voters will not be casting a ballot on the county agent but rather upon extension work carried on through that office.

There was a very pleasant gathering last Thursday at the parlors of the Presbyterian church when a covered dish luncheon was served, each lady taking a covered dish. Some were older and some were younger, and much merriment was had, the real ages of the members present being announced.

### What Will It Cost To Do Your Share?

Approval of the question means \$2,800.00 is the maximum amount that could be appropriated in Cass county—or this would be 8¢ for each \$1,000.00 assessed valuation. This comes from the General fund. It means there would be NO increase in taxes!

# VOTE FOR William A. Metzger

## Non-Political Candidate for Legislature

### A FARMER AND STOCKMAN

### Born in Cass County - - The Son of a Pioneer Family

The basis of sound government is to see that taxes are never levied upon a people in amount beyond their ability to pay. Taxes have risen in the past 20 years out of all proportion to the income of the people of the State of Nebraska. The farmer and business man MUST have better representation in our legislature if we are to have economy and efficiency in our state government.
