As Mrs. Norris is a great lover of

birds, and has spent a great deal of time studying their habits, she she brought to the club a large amount of information concerning their physical appearance, their habits, the time of the year in which we can expect them to arrive each season. Mounted cards, bearing the picture and history of the different kinds of birds to be found in this climate were displayed, and were of great interest. These had been prepared by Mrs. Fred Norris. Specimens of mounted birds were exhibited also. These were brought by Mrs. True Harmon, of Avoca.

Feeding shelves and bird baths for the yards were discussed also, with instructions as to how they are to be built, and information as to where literature could be found for the amateur bird lover.

Extra tables and extra chairs were carried in until there was not another available inch of room, and still they came, but they were a good natured crowd, and tried in every way to make each newcomer welcome.

After several games of Bingo, the girls gave a very excellent program of singing, whistling and tap dancing, which was followed by pumpkin pie and coffee, which was served to all.

Mr. and Mrs. Neil Munkres accompanied the body to Chadron, where the funeral was to have been held Wednesday afternoon, but a message to Mrs. Munkres' mother, Mrs. Young, said that the funeral would have to be postponed on account of a severe blizzard in that section of the country.

Mrs. Munkres came to Weeping Water several months ago, and took an apartment here, so that she might be nearer to Omaha and the physician who was treating her for cancer, but her health was failing rapidly and she soon had to go to the hospital, where she remained until her death.

Her suffering had been intense, but through it all she had a cheerful outlook on life, and she won many friends during her brief stay in Weeping Water.

**Dockage facilities make Plattsburgh an ideal factory site.** Welcome and a splendid opportunity to expand should be an inducement to those contemplating a change in location from the more thickly populated centers and flood areas of the east.
