protection of those who drive on the roads, not as a joke. When a sign says detour, it does not mean to go on through, it means detour, and is placed there for the safety of the public. Some people think a sign is placed on the road to inconvenience them and seem to think the world is coming to an end before they get where they are going. In the work of grading the highway through Murray, there is now a 30 foot jump-off for everyone who does not care to heed the warning signs.

A few days ago a car coming from the west was scattering dust and bits of sand, helter skelter and were sure trying to go where they did not want to go, that is the morgue, a near route to the cemetery. The car with a nonsensical drive whirled around the barricade near the lumber yard and tore over the newly constructed grade, and it was only when they came to the jumping off place that they saw, there was a grinding of brakes and shrieks of a car filled with women. Fortunately the new grade was soft and the car stopped almost instantly on the brink of the 30-foot jump-off. This should be a warning to this car load of people, but will it?

A Very Kindly Deed.

As my little daughter Louise was having some trouble with her glasses and I had to go to Omaha to have them changed, and by chance we missed Mr. Garnett, so the sheriff was so very kind in taking us up to Omaha and getting the eyes tested and glasses fitted. And now she can see much better for her school work.—Mrs. John Sheard.
