King George for Peace with Empire and U. S.

Pledges Dominions and United States to Dwell Forever in Peaceful Ways Like Canada.

By WEBB MILLER

WINNIPEG, Man., May 24 (UP)—Arbitration of differences between the United States and the British empire by force or threat is unacceptable, King George VI today told the world fervently in a dramatic broadcast on Empire Day.

His words—the most vital pronouncement on international affairs the king has ever made—were heard by scores of millions in his far-flung empire which covers one-fourth of the earth's surface.

The king said: "Canada and the United States have had to dispose of searching differences of aim and interest during the past 100 years, but never has one of these differences been involved by force or by threat. No man, thank God, will ever again conceive of such arbitration between the peoples of my empire and the people of the United States."

Thus the king, as king of each of the separate dominions, pledged them so far as he was able, to peace with the United States. He cited the example of the United States and Canada, living as good neighbors for more than 100 years without recourse to war. Today's incursion into the field of international politics broke another tradition in a series of smashings of precedent on the royal visit.

It seemed at some that the king and his advisers on the Canadian tour were entering a phase of a more "dynamic" conception of the duties of a constitutional monarchy than has existed hitherto.

AAA QUESTION BOX

Q. Can payments under the farm program be earned on a farm that is idle in 1939?

A. No idle farm can earn conservation or parity payments. It can qualify only for a soil-building payment in case the proper practices are carried out.

Q. Who determines whether or not a farm is idle?

A. County committees are instructed to regard as idle any farm on which normal cropping operations are not carried out during the 1939 crop year. If acreage in seeded and volunteer grain crops, summer fallow, grasses or legumes and temporary pasture amount to less than half the total soil-depleting acreage allotment, the farm is regarded as idle.

Q. Can corn planted in excess of the 1939 corn allotment be disposed of?

A. No. Planted corn is considered as harvested corn.

Q. Can grain sorghums be considered as non-depleting?

A. No. Grain sorghums planted will be considered as soil-depleting regardless of what use is made at harvest time.

WHEAT LOSS CLAIMS

Crop insurance claims amounting to 602 bushels have been submitted to the Federal Crop Insurance Corporation by Cass county farmers, who insured their 1939 winter wheat crop. Alfred Gansemer, chairman of the county agricultural conservation committee, disclosed today.

"These claims," Mr. Gansemer added, "have been approved here and sent to the state office and the Kansas City branch office for approval."

"In effect, payment of these indemnities means that these farmers who took out insurance on their 1939 crop will get a return on their investment that they would not have received if they had neglected to protect their crop with insurance."

The losses claimed covered partial or complete crop failure on 46 acres of land seeded to wheat last fall. So far, losses given preliminary approval cover insurance written under 7 policies out of the total number of 725 written in Cass county.

LOANS BOOST INCOME

Commodity loans on 1938 crops gave farmers of Cass county an income of \$71,907.07 more than they would have received if they had been forced to sell their crops at market prices. The Cass County Agricultural Conservation committee member in charge of commodity loans, reported today.

The difference between market price and loan value of commodities sealed in the county amounted to 20¢ on 1937 corn sealed, 17¢ on 1938 corn sealed and 15¢ on 1938 wheat sealed, the committeeman said.

In addition to increasing the net value of crops to producers, the 1938 commodity loan program brought about delinquent personal property tax collections of \$4,886 in Cass county, and increased the value of taxable property in the county by \$122,391.90 through keeping crops on the farms, where they are subject to taxation.

For the state, according to word received by Mr. Kaffenberger, 1938 corn and wheat loans had a net value to farmers of \$4,195,000 resulted in delinquent tax collections of \$313,000 and increased the value of taxable property by \$8,914,000.
