F. S. A. RELEASING MONEY TO PAY HARVEST COSTS

The question of releases of money from sales of government-mortgaged grain is bobbing up all over Nebraska now that the 1939 harvest is getting under way, and Oteo and Cass counties are no exceptions, Leonard Hanks, county Farm Security Administration supervisor, said Wednesday. Like most counties, a considerable number of the farmers in these two counties are harvesting a crop this year solely because they co-operated in the FSA rehabilitation loan program. Government loan collection policies have been approved by State FSA Director L. A. White and the regional office, and were discussed by Mr. Hanks.

The FSA will follow sound business methods to assure continuation of the program's effectiveness. Costs will be held to the minimum and every effort made for the 1939 harvest to improve borrowers' circumstances.

"Rehabilitation borrowers have been able to put in a crop and stay on their farms because of farm plans financed by FSA loans," Mr. Hanks said. "Cutting costs and paying debts are evidences of good planning, and will show up in this harvest."

The FSA will release funds realized from sale of crops for the borrower to pay necessary current harvesting expenses. Those funds, together with increases from livestock and livestock products, are considered farm income subject to release for payment of farm debts, the supervisor explained. The FSA cannot approve expensive harvesting practices, and if the family can do the work itself cash outlays for outside labor will not be approved. Trading work among neighbors when possible is considered much more desirable than hiring threshing crews.

No recommendations will be made as to where or to whom the crop shall be sold; however, the FSA will inform a borrower of what his co-operative marketing benefits would be if a sound co-operative agency is operating in his territory. Borrowers' grain may be sold when threshed or stored for a reasonable time in a public elevator bonded as a warehouse, but it cannot be stored for prolonged periods for the purpose of speculation.

As a special service to grain buyers the FSA will furnish lists of borrowers as a safeguard against unauthorized sales of mortgaged property. The supervisor warned, however, that the lists might not be complete and urged buyers to investigate if they think the grain might be mortgaged. As further protection to buyers they will be asked to make checks payable jointly to the borrower and to the FSA. The agency can in no way guarantee payment of borrowers' debts. Creditors or prospective creditors are welcome to contact the local office if they wish to determine any point not already clear to them.

Plattsmouth Ladies Return from Southland

Lora Lloyd Kieck and Children, Mrs. Blanch Potter and Son and Mrs. Fred Lugsch Return.

A group of Plattsmouth ladies and their children have just returned from a very pleasant visit to the southwest and which took them for a journey into our neighboring republic of Mexico. The party comprised County Superintendent Lora Lloyd Kieck and children, Marylin and Billy, Mrs. Blanch Potter and son, Billy and Mrs. Fred Lugsch.

The ladies enjoyed a trip of some 3,500 miles and which covered a great deal of territory and the opportunity of seeing much of the natural beauty of the southwest and the south and the wild flower brilliancy that they found along the highways on their journey.

They drove from here to San Antonio, Texas, where they stopped for a visit with Mrs. Mildred Lloyd, a cousin of Mrs. Kieck, taking time to visit many of the places of interest there, Kelly and Randolph flying fields, the very beautiful Breckenridge park, one of the finest in the southwest. From San Antonio they drove to Laredo, where they made the crossing of the Rio Grande river to old Mexico. They journeyed to Monterrey, capital city of Nuevo Leon state, one of the largest cities of the republic. On their journey they passed through many of the villages and had the opportunity of seeing much of the peasant life, the picturesque adobe dwellings and while the residents were of the poorer classes all seemed busy. In this section they observed much use of the oxen in hauling carts and as a means of transportation for goods.

On the return the party came by way of Reynosa, back to the United States.

One observation was the large number of Jewish refugees that are coming to Mexico and which has created a great problem for the government as to their care and added burdens to the already large number of peons that are found in the country.

The party visited at Galveston and viewed the great causway that connects the island city with the mainland, as well as the ship harbor and the seagoing vessels that are anchored at the docks. Here they also saw the coast guard vessels and planes in their target practices. They also took a trip on an excursion boat out into the Gulf of Mexico that offered them a real treat.

The party on their return trip also visited the Rio Grande valley and viewed the citrus fruit and other crops along the route which are now at their best.

While at Galveston the party called on Mr. and Mrs. Emmett Mullen, where they were entertained most pleasantly by the former Plattsmouth family. The trip home was through Louisiana and Arkansas and through the Ozark mountains to home.
