### PULLMAN SCORED.

Gov. Altgeld Declares His Taxes to Be Ridiculously Low.

SPRINGFIELD, Ill., Sept. 27. - Gov. Altgeld was present at Tuesday's How Republicans and Democrats Figure meeting of the state board of equalization. The governor disclaimed which he had recently collected.

cording to the records in the secretary showing their claims and estimates: of state's office, has a capital stock of \$36,000,000. Mr. Pullman had testified before a commission, among other things, that this capital stock was paid in cash and had been enlarged from time to time during the twenty-seven years of

Mr. Pullman had further declared under oath that the company had no bonded debt and had accumulated \$25,-000,000 in undivided profits, the governor continued. Adding this \$25,000,-000 to the capital stock makes \$61,000,-000 which the stock of the Pullman company represents. The market reports show this stock to be worth more

than \$61,000,000. The governor continued to give facts and figures from the company's own reports and showed that the company's surplus had been upward of \$3,000,000 a year for many years. If the stock of the Pullman company were assessed like other property it would make an assessment of from \$12,360,000 to \$15,000,000. Instead of this it was assessed at only \$1,650,000 in the state, the company having represented that its property was assessed in other states, but failed to show

It appears that in sixteen states the company pays no taxes at all. In sevsessments are shown, and in seventeen the total amount of tax paid by the Pullman company is only \$21,425. In the remaining seven states the taxes paid are not given, but the total assessment is only \$1,104,359. The calculation based upon the ruling per cent. of taxation would place the total governor of Hu Peh. amount of taxes paid by the company at \$40,751 outside of Illinois. This in Chicago would pay the taxes on less than \$4,000,000 of property.

The governor estimates that the Pullman company pays taxes on only about \$2,000,000 in America, and that nearly \$60,000,000 entirely escapes tax- | Tsin. ation, and the company has now in its possession millions of dollars that should have been paid into the public treasury. The board could not, the governor said, reach back and compel the company to pay what it should have paid in the past; but it could assess the company as high in proportion to the market value of its property

Covered Literature.

MOUNT STERLING, Ill., Sept. 26 .-This city was the scene of a real and thrilling western style bank hold-up at 10:30 o'clock Monday morning. Ralph Conklin, aged 18, was the bold desperado. He is a native of Brown county, his parents residing a mile and a half northeast of Mount Sterling. Conklin, who is given to poring over such literature as "The Life of Jesse James," "Deadwood Dick's Last Shot," etc., left home with an old-fashioned muzzle-loading double-barreled shotgun Monday morning and started for Mount Sterling. On his way he met Mac Dunbar riding a horse. The boy bandit leveled his gun at Dunbar and commanded him to dismount. Dunbar slid off his horse and

Conkling mounted and rode into Mount Sterling. Going to the rear of the Bloomfield Skiles bank Conklin dismounted, and leaving a boy to hold the horse he entered the bank by the rear door, wearing a mask. Approaching the cashier, J. D. Milstead, he ordered him to put up his hands.

### A Thorough Revival of Party Spirit in Demand.

This year's campaign brings the voters back to a choice between the two conflicting and enduring ideas of free government and class govern-

Third, fourth and fifth parties have declined into insignificance. The mugwump can scarcely be heard. The populist is important only in the Rocky mountain states, where he promises to vote a market for bullion at the old price. The prohibitionist, who a few years ago foresaw the growth of a great national anti-saloon party, now expects nothing more than to hold his weakened organization together.

Mugwump, populist and prohibitionist have had time to prove that they are not capable of conducting to tangible results such beneficial reforms as they may support, even when they are intrusted with power for that purpose. Like amateur musicians, they can set up ideal standards for others and can rail at faults, but fall further below their standards and prove themselves less capable of sustained and pressed democrats that 1894 is not concerted action when brought to the test of public performance than the
