Two Views of Twins.

"I never was so mortified in all my life!" she exclaimed. "What was the matter?" asked her dearest friend.

"My maid told me that my fiance was in the reception room."

"Yes. "And I threw my arms around him and kissed him twice before I discovered that it was his twin brother. Take my advice and never become engaged to a twin."

"On the contrary, I think I shall look for one. It just doubles the fun.' -Chicago Evening Post.

GROW RICH, EVERY FARMER.

The editor thinks it to be the wish of everybody to grow rich, not for the sake of the money, but for the good that can be done with the money. Now, there are three new cereals recently created that will make money for the farmer, One is Silver King Barley, the most wonderful creation of the age, yielding 90, 100 to 116 bu. per acre in 1895, and there are thousands of farmers who believe they can grow 150 bu, per acre therefrom in 1896.

Then there is Silver Mine Oats, vielding in 1895 209 bu. per acre. Every farmer who tested it, believes 250 bu.

Then there is Golden Triumph Corn. which produced over 200 bu. per acre, and 250 bu, is surely possible.

And potatoes, there is Salzer's Earliest, which was fit for table in 28 days in 1895, yielding tremendously, while the Champion of the World, tested in a thousand different places in 1895, yielded from 8 to 1,600 bu. per acre.

Now, in Salzer's new catalogue there is a wonderful arrayal of new varieties of wheat, oats, barley, rye, potatoes, grasses, clovers and forage plants, and the editor believes that it would pay every farmer a thousand-fold to get this catalogue before buying seeds.

If you will out this ou and send it with 10 cents on e to the John A. Salzer Seed Co., La Crosse, Wis., you will receive, free, 10 grain and grass samples, including above and their mammoth catalogue. Catalogue alone, 5 cents postage.

The rule still holds good that the bigger the seeve the more modish the garment. Much doing is not so important as well doing.

Gladness Comes

With a better understanding of the transient nature of the many physical ills, which vanish before proper efforts-gentle efforts-pleasant effortsrightly directed. There is comfort in the knowledge, that so many forms of sickness are not due to any actual disease, but simply to a constipated condition of the system, which the pleasant family laxative, Syrup of Figs. promptly removes. That is why it is the only remedy with millions of families, and is everywhere esteemed so highly by all who value good health. Its beneficial effects are due to the fact, that it is the one remedy which promotes internal cleanliness without debilitating the organs on which it acts. It is therefore all important, in order to get its beneficial effects, to note when you purchase, that you have the genuine article, which is manufactured by the California Fig Syrup Co. only and sold by

all reputable druggists. If in the enjoyment of good health, and the system is regular, laxatives or other remedies are then not needed. If afflicted with any actual disease, one may be commended to the most skillful physicians, but if in need of a laxative, | fertile soil, cheap fuel and low priced one should have the best, and with the well-informed everywhere, Syrup of Figs stands highest and is most largely used and gives most general satisfaction.

A SUGAR BEET BOOM.

NEBRASKA WELCOMES THE SACCHARINE VEGETABLE.

And Will Do What It Can to Encourage Growth of the Same-Much Enlightenment on the Subject by Men Who Have Made Sugar Beet Culture a Study-Beet Sugar Factories, the Bounty Question. Etc., Etc.

Nebraska's Coming Industry.

There was deep and absorbing interest in all the proceedings of the Beet Sugar convention held at Fremont. On the second day of the meeting the fir. matter taken up was selection of place for holding the next convention. Several points were considered, Grand Island finally being chosen. The date was left to the executive committee. with a recommendation that it be fixed at a time when the Grand Island factory is in operation.

Harry O'Neill, who represents the new method known as the Masse-Cuite process, intended for small factories for reducing the crop to raw sugar for the refinery was introduced. The clarified juice, he said, after being treated with lime and all the impurities taken out, is put through a copper cylinder, through which a current of hot air tured is \$886,623, which, after paying passes. An experiment was made at Grand Island on juice 8.6 per cent sugar and 91.4 per cent water. After passing twice through the cylinder the result was 8.5 per cent water and 91.5 per cent sugar.

With the assurance of a continuation of the bounty law the process will be rapidly developed. If the bounty law remains unchanged after the next legislature the company will be ready for operations.

In the discussion following Mr. O'Neill's talk it was brought out that a plant with the capacity of 100 tons experience from actual experience. a day would cost about \$30,000. The company will encourage co-operation and will not sell the machines.

Chairman Furnas of the committee on resolutions reported. The resolutions favor a state and national bounty ment received from the factory was so for the encouragement of the sugar industry; recommended the formation of to beets this season. county associations: indorse the trans-Mississippi exposition at Omaha; indorse the Nebraska club, the state irrigation association and the irrigation is to advertise the state and encourage fair at North Platte. A resolu- it upon its old footing. tion by Peter Jansen was submitted and adopted, thanking ex-Governor Furnas for his long and arduous labor in helping to build up Nebraska.

Superintendent Granger of the Utah ed the convention from the factory year 1851. standpoint. The first crop was raised in Utah in 1891, when 9,960 tons were produced and made up, and in 1895 38,000 tons were made up. The average of sugar per ton of beets was 190 pounds. The factory cost \$750,000. paid \$5 a day for their labor. Last year a dividend of 10 per cent was declared. The factory lost money at wagonette with pneumatic wheels will first, but the business has grown be a feature of the Fourth of July pasteadily. This is one of the factories rade in Sanilac Center, Mich. that is wholly American. The factory dard. No beets less than the standard are taken at any

and stirring address on the importance white. of the sugar question, of its vast consumption and small production in this country. His address was the most eloquent one of the convention. He reviewed at length the tariff legislation of the country, with an appeal for its application to the sugar and other manufacturing interests of the day. "The Possibilities of Nebraska" was

ably treated by R. M. Allen, president

of the association. The experience of Nebraska as a sugar-producing state countries, showing that they did not always meet with success. The crop in Europe was very rich. Their beets are firmer and contain more sugar than is possible in this country, which may be due to climatic conditions and to seed. Germany can produce four and a half more tons of beets to the acre, with 2 per cent more in raw sugar than is possible here. In Russia the industry is under control of the government and possesses all the elements that go to make sugar culture profitablelabor. Beets have been tested with as high as 35 per cent of sugar. To compete with these countries it is apparent that we need protection. We want a duty on sugar that is fair; not an exacting one. Mr. Allen gave his hearers an insight of all sugar-producing countries the world over and also as to the yield. Here in Nebraska we have a good field, the right altitude, rich soil, and with skilled labor and a study of this subject we may be able to save much which is now lost, and make discoveries of vast benefit to beet culture. J. S. Hoagland addressed the association on state legislation. If the bounty law only tended to the enrichment of the manufacturer it should be voted down, but if it was a source of revenue and made the state prosperous it should be sustained. He referred to school taxes and the wolf scalo bounty and proved that the law was beneficial. When the industry is established it will enhance the value of land and property, make a demand for labor and increase the population. He was in favor of amending the corporation laws so that large stockholders could not

trict factories and county associations. Hon. W. G. Whitemore of Valley read a paper on the subject "What Now?" He regarded this convention as the most important of any that has convened in this state since that which prepared our constitution. We may well congratulate ourselves and return to our homes with this sentiment, "Nebraska is the place and sugar beets the stuff." Men differ because the facts which form the basis of their judgment are not understood by them alike. He failed to see how those people who

crowd out the small. He would make

it so there was only one vote for the

man, not a vote for share of stock.

Under this basis he would organize dis-

kick because the company refused to take beets which did not reach that standard. He did not believe that the Oxnards would pursue a course which must inevitably lead to failure, and the kicking of certain parties he ascribed to the old tendency which began in the Garden of Eden. The other fellow did it. The discussion which had arisen here, he felt sure, would reconcile the differences existing between the producer and manufacturer. He ascribed the failure of the Valley beet syndicate to the fact that their beets did not ripen, and that the land was not in the best condition for their growth and development of their sugar qualities. The conventiou was unanimous on one question. That was that Nebraska is naturally and peremptorily adapted to the beet sugar industry. We want further supervision of the factories by having the analysis made by state chemists, who are in nowise interested in the factories. When this is accomplished, and the farmer has the same degree of confidence when he

industry would advance. E. M. Norton, state weighmaster of from his heels to his hat. the Norfolk factory, read a paper on the production of the Norfolk factory. Since the factory has been in operation it has paid for beets the sum of \$492, 427. It has paid to employes \$74,600, and the estimated amount it has received for the sugar it has manufacfor coal, coke and lime and other supplies, does not leave a very large margin of profit, though it shows that the factory is a success.

that he will receive the fair treat-

ment he would receive were he to take

a load of corn to an elevator then the

M. A. Lunn of the Beet Sugar industry addressed the convention on how to secure factories. His talk was relative to his experience in endeavoring to secure eastern capital to erect them with no subsidy other than the land on which the factory was built. They would do nothing without a guarantee of acreage. Mr. Lunn reviewed the ground covered by other speakers and told his
