SPORT IN WESTERN CANADA:

Have Plenty of Shooting. There is probably no country on the American Continent where the life of the farmer carries with it that assurance of comfort and success as does Western Canada. Nor is there to be found anywhere else such a pleasant combination. Game abounds everywhere and nowhere does it afford such perfect amusement. A noted sportsman writing of the favorite pastime says: "There is one particular spot where I saw a man drop seventy mallards one morning and bring them all to bag, too, for they dropped in open water or on flat prairie. At the right season of the year you can see black lines and triangles cut sharply out against the sky all round you, moving very swiftly, and you begin to wonder whether you have enough cartridges to hold out. You can hear the prairie chicken crowing like barn-door fowls, state urging that every effort be made and a little to the northeast is a bit of marshy ground, cattle-poached and that day. CAN'T HAVE HIS CHILD.

Court Denies a Nebraska Man Possession of Bis Own Baby.

NEW YORY, June 3 .-- Frank B. Weyant, the wealthy owner of a cattle | Consolidation of Transmississippi Interranch near Lincoin, Neb., made an unsuccessful effort in the supreme court here to obtain the custody of his infant child, Gladys. About a year ago Mrs. Weyant came to Brooklyn with his wife to pay a visit to his relatives. While here the child was born and the mother died a few days after the birth. Mr. Weyant returned to Nebraska to attend to his business interests there, leaving the child with his brother, Henry S. Weyant, and his wife, Lizzie. A few months later correspondence was opened with a view of having the child sent on to the father. but the brother sent word to the father

that he could not think of such a thing, and that the idea of having so young a child travel so long a distance was absurd in the extreme. Finally, Weyant came on, with his sister, Mrs. Lucy Armstrong, but was surprised to find that the brother refused to surrender the child. He then had recourse to the courts and the case came up before Supreme Court Justice Maddox, when the facts in the case were presented. Several physicians were called and gave it as their opinion that it was inexpedient to have a child sent on so long a journey. Other physicians testified that the child would not suffer from the trip. Justice Maddox began giving a decision in favor of the child's retention, when counsel for the father broke in and insisted on being heard. He cited numerous instances where invalids had traveled long distances with perfect safety, notably that of Mrs. McKinley.

Justice Maddox decided that the child should remain in the custody of the brother for a year, at the end of which his friends the assurance that they time the father might renew his applieation.

The Press will say that it is "able to announce on the highest authority that not only have the differences been settled between the Morgan-Hill fac-

tion and the Harriman party regarding the Burlington deal and the relations of that railroad and the Northern Pacific and the Great Northern with the Union Pacific, but that the St. Paul, Chicago & Northwestern and Chicago Great Western will be taken care of in the great harmonization scheme.

"The exact details of the harmony agreement are withheld until J. Pierpont Morgan arrives from Europe. He will sail for this country tomorrow (Wednesday). James J. Hill, who has been his representative in the Northern Pacific conflict and the management of the Morgan-Hill railroads, has remained 'incommunicado,' giving to must 'wait and see. Facts will tell

the tale 'n good time.'" In Mr. Hill's simple explanation is the whole truth in a nutshell. The agreement regarding the controversy over the control of the Northern Pacific means that the property will remain in the control of the Morgan-Hill faction, although the Kuhn-Loeb-Harriman-Gould faction and the Rockefeller and Stillman intersts own the majority of the common and preferred stock, and finally that the harmony agreement will result in a closer alliance between the great transmississippi railroads which extend from Chicago to the coast and have affiliations, to carry American products to

Hudson Maxim Sells Secret of His Invention to Uncle Sam.

NEW YORK, June 4.- The Press says: Maximite, the new explosive invented by Hudson Maxim, has been adopted by this country after a series of successful tests at the Sandy Hook proving grounds. The secret of the explosive has been sold to the government by the inventotr and the exrlosive, it is thought, may revolutionize warfare. It is said to be more deadly in its character than lyddite. yet so safely can it be handled that the danger attaching to its use is less than that incurred in transporting ordinary black powder.

In an interview, Mr. Maxim said: "Should the United States become involved in war with any other power we will be able to throw high explosive projectiles through the thickest armor of our enemies to explode inside their war ships, while they in turn would be able only to penetrate our armor with solid shot."

He thought the moral of these new developments is that the ponderous battleships must go and be replaced by the small, swift torpedo boats or torpedo gunboats and cruiser.
