Last year our exports amounted to \$825,000,000, and our imports to \$672,-000,000. Adding the merchandise and the gold and silver movements together it shows that our excess of exports over imports was \$270,000,000. This undeniably represents tribute paid to foreigners and was our year's loss of wealth, for which no benefit was received. The government might have manufactured its own money, lent it to the people, and saved this vast sum to empty American markets and make that much more demand for labor.

Populists Look Out For Cuckoo Nests

The Tribune has reliable information, which comes to it both from friends and right out of the camp of the enemy at Washington, that a movement is on foot to organize a secret order inside the People's party whose object is to capture the national convention in 1896. This that city have taken their own lives, an information is conveyed to the Tribune by persons of character and national reputation, and we believe it to be absolutely unquestionable.

Organizers are being appointed and salaried by the Bimetallic League, out of funds furnished by the great silver owners and the railroads, who have joined forces to promote their business interests. The silver monopolists want to draw it is but one of many insurance companies that are eating up the liberties of the our two million voters out into their lately launched single plank party by 1896, and the object of the railroads is to increase the general prospority of the country for the sake of their earnings by increasing the volume of money, andwhat they count of more importance-at the same time so control the People's party leadership, clear down to county officers, as to render inoperative the demand for government ownership of railroads. The silver speculators fear that zens. this demand may grow to include government ownership of mines.

So much for the motives. The method is to organize a secret "machine" within the party, so arranged as to leave all the power of selecting delegates in the hands of the salaried organizers.

The Tribune has inside information of the organization of one of these cuckoo nests in Iowa. (The cuckoo lays its eggs in nests built by other birds, and leaves the eggs to be hatched by them.) The cuckoo organizer in Iowa (as we are informed almost straight out of the mouth of one of his employers at Washington) is one Muller, formerly of Illinois. are credibly informed, in addition, that Muller worked for the Democrats as their agent among Populists of the Ninth Iowa district at twenty dollars a week, last fall.

Populist papers should spread this information broadcast in every state and territory, as organizers have begun, or shortly will begin, their treacherous work in all. Forewarn, the brethren, and, like the one-plank movement, this euckoo-nesting business will die a-bornin.' With the light thus turned on, the Peoples' party has nothing to fear. Down with the cuckoos!

I hold that every city and town should be prepared at all times to furnish temporary work at low wages to those who are not able to obtain better work elsewhere, because men must live, and it is better they should live by earning than prepared estimates of future political by begging or stealing. Say nothing of the humanitarian aspects of the case, it is cheaper to provide even unprofitable labor than to build and sustain prisons and almshouses.

In many of our cities and towns public improvements are needed, and this labor could be made profitable. Whenever work is provided tramps and ablebodied beggars can be immediately employed, and will have no excuse for begging. But how shall we provide permanent work for our unemployed ablebodied men?

I answer: That there is but one way under the existing state of things in which this can be done. They must go on to and till the soil. No trade is so easily learned as that of a farmer. To plough and plant and hoe and sow and gather are things not difficult to understand. Put 10,000 people, the number of the Brooklyn strikers, on fertile lands, give them domestic animals, implements, seeds and provisions, and they will live and have plenty of work.

I say: Establish colonies. Put these

unemployed men on alternate quarter sections of lands; put up for them small houses, mills, shops, a savings bank and halls to be used for schools weekdays, for religious instruction on Sundays, and for moral and interesting amusements and instruction evenings; furnish them tools, transportation, money. Give each who desires it a constitutional deed of his lands and buildings, which on the payment of what has been advanced, with interest, shall vest in him a good title, provided he shall have sustained a good character.

If it be said that we cannot afford to provide labor for the unemployed and to establish these colonies, then I answer: We cannot afford not to.

If these colonies are well managed by think we still have a considerable stock in the country, there is no reason why the sums paid back by the colonists in purchase of their buildings and lands, together with sums received for the alternate reserved quarter sections and lots, should not pay eventually the whole, or nearly the whole expense of the colonization, and so make the cost little or nothing of transforming thousands of our able-bodied poor, liable to become criminals, into productive, law-abiding citi-

This is the plan. How can it be carried out? I answer: Not by individuals, talking, preaching or writing. These simply prepare the way. It must be accomplished as all other great political, religious and humane movements are, by organized action. If we seek to prevent poverty and crime, the first step is to form in our cities and larger towns organizations for the purpose of preventing them; which organizations I would call "societies or the prevention of poverty and crime."

They should be composed of both men and women. They should have, as other organizations have, offices, and paid officers constantly employed. They should gather and publish facts-go be fore city and town authorities and state governments, and if necessary before Congress, with petitions and arguments, and in all practical ways labor to carry out the purposes for which they are formed. VOICE OF THE PRESS

The One-Plank Foolishness as View ed by Leading Populist Papers

The man who looks to "practical politics" as the road to reform has an instinctive fear that the organization of a new party will interfere with his carefully alignments. He has "rubbed up against the practical side of affairs" and is not influenced by any sentimentality or by the vagaries of visionary and impractic-able theorists. He would adopt such a platform as would catch free-silver Democrats and free-silver Republicans. He overlooks the fact that Populism means more than free silver, or more even than currency reform, and that the party. as it now is, cannot be held together upon the narrow basis to which he would confine it. Let the "cranks" remain steadfast to their principles and leave "practi-cal politics" to the politicians.—Topeka

We do not object to the free silver idea, but we do most emphatically object to making that the only issue of a political party in this country. History admonishes us that no great party ever was created around one issue. Why should they ask a political party that polled nearly two million votes to disband? Why seek to disrupt a movement based on great principles in the interests of one issue? Either these men are fanatics or they are men who are designing for no they are men who are designing for no good purpose. The People's party will not be moved.—Progressive Age, Minne-

The People's party will not adopt Mr. Taubeneck's policy. That is the long and short of it. The People's party has made more rapid growth than any party ever did before in the same length of time, and it has done it without adopting the Taubeneck single-plank policy. The indications are that it will keep on succeeding at the same old stand. Taubeneck is old enough to know that he nor any other one man can run the People's party.—Southern Mercury.

"Srick to Your Press"

The newspapers of the Populist party are true to the cause and the platform. Some small-sized politicians in prominent places got very angry at the leading papers because they would not allow the party to be switched off into a one-prong trap, and not being able to say anything else the sapheads have been swearing at the newspapers that refused to do their bidding as "Socialists." The cause is all right as long as the papers are true, and there is not a single instance of a Populist paper having betrayed the cause. These "prong-buck" politicians, who are after boodle or an office, amount to nothing and will be brushed aside like a fly. They can't stem the great Populist tide and their efforts to change the platform are like a little fice dog scratching at a ground-hog hole. There are only a few of these traitors and they can do little harm if the people refuse to listen to them. Stick to your press and it will stick to you. Like a faithful sentinel it will sound the alarm when the enemy approaches, whether from within or without .- Nonconformist.

Solid Sense from an Ex-Republican

BELVEDERE, Neb., Mar. 22, '95. Editor WEALTH MAKERS:

I would like to give my impressions on the political situation in the past and present, and also touch the future somewhat. Being an old-line Republican till last year maybe my prejudice may be of some use to others. I have been for some years an ardent advocate of "Nationalism," foolishly thinking the Republican party would adopt those ideas after awhile. Last year gave up hope and joined with the Populists.

Now about recruits from the two old parties, I can only speak from a Republican standpoint.

There is nothing that a Republican hates worse than being classed as a Dem-

I am well satisfied that the Populists in the last election would have swept the state overwhelmingly if our candidates (some of them) had not been nominated by the Democrats too. I could hardly go that myself. I believe if those Populist candidates that were also on the Democratic ticket had withdrawn from the Democratic ticket the gain in Republican votes would have been tremendous; for they were ready, when Tom Majors was forced on them by the Lincoln ring, to bolt.

In this old Republican stronghold th vote was a tie, and I know of many Republicans that did not vote on governor at all. They could not go Tom Majors, and would not vote with their hereditary enemies, the Democrats, for Holcomb. In my mind the wisest policy to pursue

First. Keep in the middle of the road. Not allow either the Democrats or Republicans to endorse or nominate our cardidates. If they do, withdraw from their ticket. Second. Let Bryan and his one-idea

followers go after their false gods if they want to, but let them go alone. Third. Stick to the Omaha platform and keep educating the people; and I be. your orders. Nothing like it.

lieve victory is ours. If not now it is bound to come in the end. Very Respectfully, N. F. House.

It is my desire to enter at once upon the discharge of the duties of this position, and I ask the hearty co-operation of all Alliance members to the end that the greatest amount of good may be done during the coming year. It is proper to state in this announcement that the amended constitution of the national F. A. & I. I hope that officers of county or sub-alliances, or individual members of the order, that desire a visit from your lecturer, will write to me without delay and I will endeavor to arrange for a visit at such time as will be most convenient for all concerned and upon such terms as can be mutually agreed upon. The absence of political excitement during the coming year will make the building of our order on a business basis much easier than in a cam-paign year when politics absorbs the at-tention of the people. In the past the co-operative and business features of the order have been neglected and we have depended too much upon the social and educational work to keep up the roll of membership. This course has always been attended with unsatisfactory results and during the coming year it will be the chief care of our officers to perfect the business methods in their various lines so that membership in the Alliance shall be profitable, not alone socially, morelly and educationally, but financially as sell I wish to be fully informed of the needs of

Competition Cannot be Continued

"Liberty is but a means to the divine social end. If liberty is not fulfilled in unity, then liberty was the consummation of the supreme design of evil powers, And if liberty means no more than the right to strive with each other for mates. ial gain or intellectual superiority; if the state can do no more than foster a civilization founded in such a freedom, then the evolution of present civilization from feudalism was the irreparable ruin of the world. The conception that free dom consists in the protection of men from one another in social antagonisms, rather than in their association with each other in social sacrifice, can never bring forth any order but that of tyranny and slavery. The worship of Baal and Moloch was relatively no more degrading and dehumanizing than the conception of the state as a commercial compact and secular institution, with only police functions to procure individual liberty and protect property. If the state has fundamentally and finally any business that is not comprehended in the discovery and organization of society in the highest right known to man, and the redemption of man from all known wrong, then the state is a fraud and a tyranny, and has no right to exist and have authority over man.

Good Age of Consent Bill Passed

Friday ended the sixtieth day of the ssion, the constitutional limit, in the house. Hereafter members of that body will have to serve without pay, if at all. Instead of drawing on the public treasury they will have to draw on their patriotism; and as the bankable quality of this is probably rather small, it may be expected that the agonies produced by the twenty-fourth session of the Nebraska legislature will soon be over.

RELIEF BILL PASSED.

The bill appropriating \$200,000 for the purpose of buying feed and seed for indigent farmers has finally passed both houses, and ere this reaches the readers, will have become a law. The house refused to agree to the senate amendments, but a conference committee soon got the two bodies together. The bill was passed with the emergency clause, so that the cash will be available at once.

IRRIGATION.

Oneirrigation bill has passed the house and will probably soon pass the senate. The objectionable feature about it is that it gives a few men a practical monopoly of the whole irrigation business. The state irrigation society and nearly all the members from the drouth stricken counties fought to have it amended so the order in all parts of this district as quickly as possible, and to this end, ask all members as well as officers to write held in line to defeat the effort. Bill Paxton and other great land owners in the Platte valley have been down here with a strong lobby and have succeeded in get-ting the act into such a shape that it will be one of the worst monopolies ever known in the state.

What the Third Party Is.

The predominance of the few against the many is becoming more and more apparent. The tribunals of the law are practically failures. Ever since the war the people have been trying to work out a release from the domination of the old parties, which have proved themselves failures. Neither of them have given the relief to the people which they promised. The present third party, composed of farmers, professional men, work-men and small capitalists, is but a continuation of the Workingmen's party, which in 1870 nominated Wendell Phillips for the presidency. The third party is a movement the aim of which is the abolition of monopolies. - Henry D. Lloyd.
