Dr. Miles' Heart Cure, Cures Heart Disease.

Mr. Geo. L. Smith, of the Geo. L. Smith Mantel Co., Louisville, Ky., writes Feb. 26, 1804: "For about a year I was a terrible sufferer from heart trouble, which got so bad I was obliged to sit up in bed to get my breath. I had to abandon business and could hardly crawl around. My friend, Mr. Julius C. Voght, 5.5 car leading pharmacists, asked me to try Dr. Miles' Heart Cure. I had used little more than a bottle when the pain ceased and palpitations entirely disappeared. I have not had the slightest trouble since, and today I am attending to Calness as regularly as ever."

NEBRASKA CROP REPORT.

FINE RAINS AND GREAT CROPS

Excellent Crop Prospects is the General Rule.

The Week Ending Monday, July 27, 1896.

The past week has been cool, the temperature averaging five degrees below pormal. The maximum temperature for the week has been below 95 in the great-er portion of the state and on most days the maximum temperature has been below maximum temperature has been de

Rainfall for the Week.

The rain fall has generally been above the normal, and has exceeded an inch over a large area in the western and northeastern portions of the state. Along the southern border and in localities in the central portion it has been less than half an inch.

The harvest of small grain is about completed over the greater portion of the state. Threshing is general and the reports indicate that as a rule the small grain crop will be below the average. The oats will be a very light crop. In many places fall plowing has commenced.

The corn has generally grown well, the stalks are large and they are earing in a way that indicates a very large crop. In some few localities, however, the crop has been somewhat retarded by the lack of moisture and in the southwestern counties the corn has suffered permanent injury from the dry weather.

The hay crop is an unusually good

one. Pastures continue good.

REPORT BY COUNTIES.

A young man hired a rig at Bryant's livery barn, Yutan, last Saturday morning, saying he wanted to go see his best girl, and wanted the best team, buggy, lap robe and whip that the barn could furnish. As he seemed to be acquainted around town he was given the best rig in the barn. He said he would return in the evening or the next morning. He has not returned yet and no trace can be found of the team. Yutan seems to be getting her share of confidence men, thieves and tramps these days.

One can feel assured that when he sees two or more men on the street that an earnest appeal is being made, and the best means put forth to save our country. It sometimes requires loud oratory to make an impression but the crowd grows with it. " Should this earnestness continue we will hear some talking regardless of anyone present. One thing, let people talk, and learn of each other, avoid being personal or abusive. Nothing is gained by it and one is apt to lose his best neighbor's friendship.

Populist Congressional Convention.

Lincoln, Neb., July 13, 1896. EDITOR INDEPENDENT:-I enclose you a call for the people's independent congressional Convention, to be held at Tecumseh, Aug. 11, 1896.

I do this as acting chairman, as our candidate for coagress two years ago was empowered to select his chairman, and secretary, and he selected Charles Mayberry as chairman, and A. L. Emerson, of Lincoln, as secretary. The chairman refused—by silence—to act, and I took charge. The secretary lives in Colorado, and I have no list of county committeemen; hence I send this notice to you, and ask for its publication in some reform paper. As many counties have elected delegates, based on Mr. Maxwell's vote, I make the same apportionment. Yours very trbly,

M. Howe. Acting Chairman.

The change from July 30 to Aug. 11 was made by the delegates at Grand Island July 15th, and M. Howe empowered to issue call for August 11th instead.

Hunting the Wild Goat.

The white goat, or Rocky Mountain goat, as it is indiscriminately called, is a species of big game rarely hunted by sportsmen. This is not so much because of the difficulty of killing the animal, nor because of its actual rarity. It is a stupid animal, easily shot when once found. It is not, however, found in the usual hunting grounds, as are bear, deer, elk, etc. It is remote from the common localities, but where found is in goodly numbers. It ranges very high up in the mountains, above timber line usually, among rocks and cliffs. This requires great labor to get at it, but once there, the hunter will get his game nine times

out of ten. If you care to read of a goat hunt made in the Bitter Root range in Mon-tana, in the fall of 1895, send six cents to Charles S. Fee, General passenger agent, Northern Pacific railroad, St. Paul, Minn., for Wonderland '96, which recounts such a hunting expedition.
