THE BEST GRADE LIVE GEESE FEATHERS.

FRED. SCHMIDT & BRO.
921 O St. Opposite Postoffice, Lincoln, Neb.

They are in Line.

The Swedish American Bimetallic league held a meeting at the Bryan headquarters in the Fitzgerald block last evening. The hall was well filled with Scandinavians and others who are interested in the money question.

O. W. Palm opened the meeting and thanked the club for the honor of being made its president. The announcement that the Swedish club now numbered sixty members, a large part of whom until recently were republicans, was greeted with great applause. Mr. Palm then spoke to his audience in the Swedish language and from the applause his remarks brought forth he must have really pleased his listeners.

Mr. Morning was then introduced and gave one of the best, most conclusive and logical arguments for independent bimetallic yet heard in the campaign. He began his talk by discussing the simple fundamental principles underlying the money question. He illustrated the law of supply and demand in such a way that a child could understand its force when applied to the medium of exchange. He said one of the great dangers in this campaign was ignorance, not ignorance in general but ignorance on the silver question. Mr. Harrison's speech was quoted from to show that he contradicted himself in the same sentence. These errors must be pointed out and explained to the people. He pointed out the fact that when a man became converted to free coinage of silver that he very seldom went back to the other position—the conversions were always the other way.

The speaker then discussed the system of bimetallic and showed conclusively that it did not necessarily mean the use of both metals at one and the same time, but the right to the use of either one or the other. Bimetallic was compared to two railroads. Said he: "If but one railroad line ran from her to Omaha that road could almost set its own price when the passenger came to buy his ticket, but if there was another road or a water course they could not control the passenger or freight rates. So with gold and silver: when silver is cheap they will use that; if on the other hand gold becomes cheap they will use that, and bimetallic doesn't necessarily mean that both metals must be used at one and the same time, any more than that both roads must be used at the same time."

Speaking of overproduction he said, "that gold advocates never looked at the other side and learned that there might be an under production of dollars. What this country needs is a bigger crop of dollars."

Can the United States take all the silver that will come to us?
"If we have a certain amount of water in a barrel and there is an inch stream running in and an inch stream running out the water in the barrel will not increase or diminish." He clearly showed that the United States could take all the silver that could possibly come to us. The reason Mexico could not was that she was trying to empty the supply of

an inch stream with a gimlet hole. One reason the Mexican dollar is not at its face value here is that we do not trade sufficiently with her. We have no use for her money. An English sovereign is good here because we can easily use it when we trade with England.

Mr. Morning closed his speech by saying that until the St. Louis convention he was a McKinley man and belonged to the McKinley club but when McKinley agreed to stand upon a gold platform he ceased to stand for McKinley. "Before that St. Louis convention," said he, "you might walk up and down O street from one end to the other and would not find a republican who would intimate that he favored the gold standard. He would be indignant if accused of such a thing yet after the convention was over they say, 'we were in favor of a gold standard all the time.'" At the conclusion of Mr. Morning's remarks the club adjourned until next Monday evening at which time the club will make arrangements to participate in the Bryan demonstration the 8th.

Bow Valley, Neb., Aug. 31, 1896.—(Special to the NEBRASKA INDEPENDENT.)—Wilbur F. Bryant of Hartington addressed two thousand Germans at this place this afternoon on the political issues of the day. After he had spoken for about five minutes the stage broke down and he was precipitated headlong striking one of his auditors to the earth in his descent. He jumped to his feet and shouted, "That is the way McKinley will come down in November, Hurrah for Bryan!" and he continued his address to the close. Mr. Bryant spoke at Wausa one week ago.

A Strong Endorsement.
From the Democrat, Atlanta, Texas.

LINDEN, Texas, March 21, 1896.
This is to certify that my wife and son suffered from dropsy—my wife afflicted for six years and my son for two years. During that time I resorted to every remedy known to the medical profession in this section of the country. In my great anxiety and desire to alleviate their suffering I consulted two eminent doctors in New York, and after several months treatment I could discover no visible improvement, not saying anything for their recovery.

While in Jefferson, Texas, some two years since I happened to mention the condition of my wife and son to a leading physician and druggist. He advised me to try Dr. Williams' Pink Pills for Pale People. After considerable persuasion I reluctantly consented to do so. At first I bought two packages and by the time one package had been taken I saw a marked change for the better. I continued the use of them until twenty packages or boxes had been taken when to my surprise and great joy my wife and son had fully recovered and are today in fine health.

Too much cannot be said in commendation of Dr. Williams' Pink Pills. They are certainly a great boon to suffering humanity, and I take great pleasure in offering this testimonial. In connection with this I will state that two of our leading physicians treated my wife and son.

going, being duly sworn on his oath, says the statement he makes concerning Dr. Williams' Pink Pills is just and true.

C. A. EAST, Justice of the Peace.
Dr. Williams' Pink Pills for Pale People are considered an unfailing specific for such diseases as locomotor ataxia, partial paralysis, St. Vitus dance, sciatica, neuralgia, rheumatism, nervous headache, the after effects of influenza, palpitation of the heart, pale and sallow complexion, that tired feeling resulting from nervous prostration; all diseases resulting from vitiated humors in the blood, such as scrofula, chronic erysipelas, etc. They are also a specific for troubles peculiar to females, such as suppressions, irregularities, and all forms of weakness. In men they effect a radical cure in all cases arising from mental worry, overwork, or excesses of whatever nature. Dr. Williams' Pink Pills are sold by all dealers, or will be sent post paid on receipt of price, 50 cents a box or six boxes for \$2.50 (they are never sold in bulk or by the 100,) by addressing Dr. Williams' Medicine Co., Schenectady, N. Y.

UNSURPASSED IN HISTORY.

The Tremendous Ovation Tendered Bryan in Hanna's Home City.

CLEVELAND, O., Sept. 1.—The welcome given W. J. Bryan last night by the people of Cleveland was unprecedented in his campaign tour from New York to his home in Nebraska. Beyond doubt it was the most magnificent and gratifying reception ever accorded to the young candidate, exceeded in heartiness even the greeting of the city of Buffalo last Friday, and that was an ovation of which any man might well be proud.

Last night's affair was more than an ovation; it was something beyond comparison in the series of enthusiastic outpouring that have marked the progress of Mr. Bryan toward his western home.

It was considered remarkable from the fact that Cleveland is the residence of Mr. Marcus A. Hanna, and one of the places where his personal influences have presumably tended to strengthen the influence of Major McKinley.
From the time he reached Cleveland until he had said good night to his last audience, Mr. Bryan was given one continual round of emotional welcoming. Arriving at the Lake Shore station he found packed closely as anything short of actual suffocation would allow, in and about the station building thousands of persons whose impulse seemed to be to cheer and shout with all the power in honor of the democratic candidate.

All day long the interest of the vast crowds that thronged the streets had been whetted by political meetings on street corners, addressed by regularly assigned speakers, and the arrival of Bryan contingents from Canton and other places had augmented the already overcharged feelings of political interest. Fifteen sections composed one excursion that brought enthusiastic adherents to see the hear, and it is claimed that 7,000 people came from Canton alone, and included in this was the Canton Bryan and Sewell club, numbered 2,000 men. Many other Bryan and Sewell clubs came from towns in

Ohio and Pennsylvania, nearly all bringing bands of music.

Ten thousand people had gathered in and about the Lake Shore station to await the arrival of the nominee's train, and when it arrived they shouted with a vim that showed their earnestness.

Mr. Bryan later in the evening delivered three speeches at different places before an estimated total crowd of 20,000.

DRIVEN TO DESPERATION.

The Lincoln Republicans beg the School Ma'ams to Help Them

That the republican leaders in Lancaster county are driven to despair is proven by the following piteous appeal to the school ma'ams to please come and help them:

HEADQUARTERS REPUBLICAN COUNTY CENTRAL COMMITTEE, LINCOLN, Neb., Aug. 25, 1896.—Dear Miss: Allow us, as the representatives of the republican central committee of Lancaster county, to endeavor to enlist you in the corps of active workers for our party in this historical campaign which is to be one of education. The school teachers in our land are the real arbiters of the nation's destiny.

Furthermore, no single person exercises more influence in their immediate neighborhood than the school teacher. While this is true, it is also true that school teachers are not too well paid. This arises from the fact that the money paid them is raised by taxation. The united democrat and populist parties are now engaged in a desperate effort to place this country on a silver basis, which would give our dollar the purchasing power of 53 cents. Should this effort prevail your wages will be worth about half what they are now, and in order for you to receive your present wages it would be necessary to double the taxes on the school district.

Do you think this could be done? I refer to the effect on school teachers because you are familiar with the facts. The illustration may be taken from every wage earner in the land.

Ordinarily the school teachers are republicans. They read history and know that for over a century the democratic states of the south made a crime punishable by imprisonment in the penitentiary for a school teacher to teach a black man to read.

They know that the republican states spend two dollars for educational purposes where the democratic states spend one, even on a per capita basis.

But this campaign involves moral as well as material disaster, not alone the dishonor of the nation, the paralysis of business, the depreciation of currency, lowering of wages, but also the embarrassment of injury to the great work of colleges and churches. It would be a pestilential blight, destroying everything. Will you not exert your influence to the utmost to prevent it?

ATTEMPTED OUTRAGE.

Unknown Man Will Receive a Warm Reception if Caught.

Yesterday afternoon the seven year old daughter of Passenger Conductor A. K. Day of the Missouri Pacific had a very narrow escape from being brutally assaulted by an unknown man about twenty-two years of age whose name is unknown.

It seems that little Floydie Day, accompanied by her cousin, J. Maurice Thompson, thirteen years of age, went to the capital building to play and climbed up into the dome. They were to have met some of their playmates there but when about half way up they encountered the man aforementioned, who asked the little girl if she had ever been up in the dome before. She replied that she hadn't, whereupon the stranger suggested that she go up with him, telling the little Thompson boy to go down stairs and look after his companions. This was agreed to, but a moment later young Thompson heard the little Day girl scream and hastened back to her side. At the time the man held the girl in a firm embrace from which she was trying to extricate herself. When the villain beheld the boy he released his grasp and retreated down the stairway disappearing from view. The children ran to their home, 1134 C street, and soon after the matter was reported to the police who have a very good description of the man and will catch him if found in the city.

Ice Cream Made by a New Process.

I have an ice cream freezer that will freeze cream instantly. The cream is put into the freezer and comes out instantly, smooth and perfectly frozen. This astonishes the people and a crowd will gather to see the freezer in operation and they will all want to try the cream. You can sell cream as fast as it can be made and sell freezers to many of them who would not buy an old style freezer. It is really a curiosity and you can sell from \$5 to \$8 worth of cream and six to twelve freezers every day. This makes a good profit these hard times and is a pleasant employment. J. F. Casey & Co., 114 St. Charles St., St. Louis, Mo., will send full particulars and information in regard to this new invention on application and will employ good salesmen on salary.

A Dandy Windmill. Make It Yourself.

I have a neighbor who made one of the Peck's windmills, and I have been watching it closely; it is the best mill I have ever seen and anyone can make one for less than \$10. I am going to make two immediately and don't see why every farmer cannot have a windmill when he can make it himself for so little money. The mill is durable, powerful and runs easily. Any person can get directions and complete directions by sending 18 two-cent stamps to E. D. Wilson & Co., Allegheny, Pa., and any active man can undoubtedly make money anywhere putting these mills up for others, and I see no use of paying \$50 or \$60 for a mill when you can make one just as good for \$10.

That Wonderful Churn!

I want to add my testimony to the list of those who have used the Lightning churn. It does all that is claimed for it, you can churn easily in one minute, and get a large percentage more butter than with the common churns. I never took the agency for anything before but so many of my neighbors wanted churns, that I ordered 30 and they are all gone. I think in a year every farmer will have a Lightning churn, in fact they can't afford to be without one as they make so much more butter, and a good little bit of money can be made in every township selling these churns. By writing to J. F. Casey & Co., St. Louis, Mo., you can get circulars and full particulars about the churn.

Marry This Girl. Somebody!

I have been reading in your paper about several men and women who have been very successful selling self-heating flat irons, and I concluded I would see what a girl could do. I have worked 12 days and have sold 151 irons and \$218 left after paying all expenses. Every body is delighted with the iron and I sell one almost every place I show it, as people think they can't afford to be without one, as they save so much fuel and time and don't burn the clothes. I know I can clear five thousand dollars in a year. How is that for a girl?
Splendid! my girl, splendid! you are a true American girl. Anyone can get complete information about the self-heating iron by addressing J. F. Casey & Co., St. Louis, Mo. It seems to be a winner, as everybody selling it writes in this praise.
