It est, of \$2,400,000,000. These bonds seems an augury for the future. The reform forces of the metropolis ought to make this young man a candidate for congress next year. The election of so unknown and untried a man was not to be expected, and perhaps he was nominated to save .. the movement of the Thomas Jefferson democracy from annihilation. That he knows bow to campaign is evident from the election returns, and if the men who placed him in nomination are as wise in the future as they were in the past, we shall hear more of Henry George within a very short time. As for his successful rival in this contest, the great Van Wyck, his election is easily explained by the dis-gust of the people with the respectable regime of the Fifth Avenue millionaires. -Twentieth Century.

For some time I suffered from general debility and nervousness, so badly that I could not sleep. I would sit up night after night reading because I couldn't get to sleep. For fifteen years my sleep was completely broken up. Indigestion, of course, resulted, and my misery increased until it seemed I had nothing to live for. \$1,700,000 of Hold Bonds

We are enabled to give our readers as outline of the "monetary reform plan" of the McKinley administration. It may te slightly amended, and we have no space to go into the details at this time. The New Time has absolute authority for the information which is now made the Treasury Gage has reduced the plan to writing, and it was the privilege of the writer to examine a lengthy private communication from Mr. Gage written of the derised than the inderal judge's arbitrary assumption of omnipotence and infallibility. public for the Bruk time. Secretary of tie affairs. Here are the outlines of the plan as it will be presented to the comng session of congress:

The greenbacks and Sherman treasury

notes are to be retired. There is now outstanding \$847,000, 000 in four and five percent bods; \$490,-1907; \$61,000,000 of 5 per cent bonds

There will be issued \$1,200,000,000 24 per cent gold bonds, redeemable in fifty a large percentage of these will be offered for exchange with the new gold bonds.

With what remains after taking up these bonds and retiring the noninterest bearing debt, the government will pur-chase gold to "strengthen the treasury." It is thought there will be from \$150,-000,000 to \$200,000,000 of these onds, and Mr. Gage looks to the bank of England or the Rothschilds as prospective purchasers.

The national banks will then be authorized to issue as a circulating medium non-legal tender bank notes to the full amount of all gold bonds deposited by the banks with the government as se-curity. That is, the banks will exchange their coin bonds for gold bonds, their non-interest bearing money for 2% per cent bonds, deposit the same with the government and draw interest on them, and then issue bank notes to the full amount. Those that are lost or burned will never need to be redeemed.

That will put us on a "solid gold basis." How do you like the plan? This plan has been formulated and adopted by the administration while its

MEANS BRYAN IN 1900.

Mayor Harrison of Chicago Enthusiastic Over the Result of the Elections.

Mayor Harrison of Chicago, discussing the result of the elections says that it was everywhere a victory for the plain people. Referring to Mr. Bryan he said:

"The democratic victories everywhere indicate that W. J. Bryan will be the next president. The republicans cannot stop him. He is the idol of the people and his principles, embodied in the Chicago platform, have won the elections. The people want him and the people believe in his principles because hey are opposed to trusts and corporations. They carried out his ideas by casting their ballots for the democratic candidates in the country and either winning or cutting down the republican majorities.

I regard the result as showing that the people will no longer submit to the domination of bosses who control corporations and are combined solely for the interests of capital and not of the people."

To Cure Catarch.

Do not depend upon snuffs, inhalants, or other local applications. Catarch is a constitutional disease and can be successfully treated only by means of a constitutional remedy like Hood's Sarsaparilla, which thoroughly purifies the blood and removes the scrollous taints which cause catarrh. The great number of testimonials from those who have been cured of catarrh by Hood's Sarsaparilla prove the unequalled power of this medicine to conquer this disease. If troubled with catarrh give Hood's Sarsaparilla a fair trial at one lair trial at once.

CONSUMPTION CURED.

The Traffic of the Great Takes. The great lakes bear to-day a greater commerce in point of tonnage, than all the foreign trade which flows in or out from all the ports of the United States.

But so long as the lake freighter is balked by the wall of Niagara; so long as cargoes must be broken in transit and lifted over the Alleghanies to the seaboard, this nation's development is arrested and its approaching commercial supremacy jeopardized or deferred.

Another comparison may yet be more

striking. One of the great engineering feats of the century was the opening of the Suez canal. Its present traffic amounts to about 8,000,000 tons annually, and it cost approximately \$100,-000,000 to build. Another gigantic project which has deeply engaged the attention of this country is the Nicaragua canal; it is estimated that it will cost half as much again as the Suez canal—perhaps \$150,000,000. But even its warmest advocates do not compute for it an immediate traffic of more than 5,-000,000 or 6,000,000 of tons; it would probably have much less.

A single lock in the wilds of Northern

Michigan - that of the Sault Ste. Marie- the rates fixed by the Kansas statute and it is merely a connecting link between Superior and the lower lakes. It is estimated that the Detroit river bears each year a through traffic of above 26,-000,000 tons. The envire commerce of the Great Lakes must be between 30,-000,000 and 40,000,000 tons annually. This is a traffic equal to one third of all that carried upon the 200,000 miles of railway in the United States, a system that took \$10,000,000,000 or \$12,000,-000,000 to construct and equip.

The colossal commerce of these great inland seas is, in a broad sense, purely local; it is bottled up by the hitherto impassable wall over which leap the waters of Niagara. With these lakes open to the sea, to the Gulf, and, yet further, were it possible to bring down by water the produce of the great northwest, the trade which would be developed is beyond the powers of any man to calculate. But it is safe to say that there is awaiting the outlet from Lake Erie to the sea a traffic many times that of the Suez and Nicaragua canals combined.-"From the Lakes to the Sea," by Car Snyder, In American Monthly Review of Reviews for November.

STOCKYARDS IN KANSAS.

Courts in That State Decide That Legislature May Fix Rates

The excitement occasioned by the deision of Judge Foster of The United City stock yards case is so recent that it need not be recalled. The decision was so emphatic as affirmation of the rights of the people of the state as against the claims of a corporation, and as hold au The Ohio. News, the official organ of avowal of the right of the legislature to the attorneys of Ohio, in an article on fix the charges of public corporations that construction was created in all espitalistic circles.

Now comes a decision by Judge Thayor of the United States circuit court of St. Louis, aftrming Judge Foster's opinion at all points. The case appears to have come before this judge upon the question of continuing certain injune ions against the enforcement of the Kansas statute fixing the maximum of stock yard rates. In his opinion Judge Thaver affirmed the right of the Kansas ogislature to pass such an act, and also hold the charges fixed as reasonable and not confiseatory of the property. He denied that the stock yards were sugaged in inferstate commerce, holding their business to be merely an incident to in-Cascarets stimulate liver, kidneys and terutate commerce. What Will Platt Do?

If the assembly shall prove to be republican by the smallest margin, as now seems probable, Mr. Platt will still have the law-making, law-preventing, law-threatening, law-seiling power.

He can even pass a law legislating Van Wyck out of office, amending the charter to death, or repealing it. He can punish other cities that dared
