Spain owes Rothschilds and other British money lenders two hundred million dollars, secured by the revenues derived from the island of Cuba.

The government can't issue good money; it should be restricted to endorsing the notes of corporations.

The census of the Hawaiian islands taken by the present government last year shows the inhabitants by nationality as follows: Hawaiians 81,019; part Hawaiians, 4,485; Americans, 3,086; British, 2,250; Germans, 1,432; French, 101; Norwegians, 378; Portuguese, 15,191; Japanese, 24,407; Chinese, 21,616; South sea islanders, 455; other nationalities, 600; total, 109,020.

Mr. Mallahan, ex-chairman of the republican state central committee and whom so many people thought was cruelly treated when he removed from the superintendency of the Kearney reform school, has been promising that he would explain his recently discovered \$6,000 shortage to the state, but up to date the public's ears have not heard the melodious sound.

State Treasurer Meserve's statement of the school monies collected by him during the year he has been in office presents some startling facts. The amount for this year shows a remarkable increase over the amount collected by his republican predecessor.

It is a terrible thing, to hear some people talk about poor Mrs. McKinley dying. But how about those poor Cubans who are dying at the hands of Wm. McKinley? Yes, not only dying but suffering the pangs of starvation before death.—Red Cloud Nation

The following "ad" of a Kirksville, Missouri, grocery firm is a good temperance sermon and needs no comment: "Any man who drinks two cents of whiskey per day for a year, and pays ten cents a drink for it, can have at our store 30 sacks of flour, 220 pounds of granulated sugar and 72 pounds of good green coffee for the same money and get \$2.50 premium for making the change in his expenditures."—Chicago Express.

THE NEBRASKA INDEPENDENT very pertinently suggests the folly of appointing Expert Heibig by the investigating committee, who has begun action to recover \$20 per day in addition to what the committee agreed to pay him.

NO FAITH CURE

About Stuart's Dyspepsia Tablets.

They Cure Stomach Troubles and Indigestion Anyway, Whether You Have Faith in Them or Not.

All physicians agree that the element of faith has a great deal to do in the cure of disease.

Firm belief and confidence in a family physician, or the same confidence and faith in a patent medicine, have produced wonderful cures in all ages.

This is especially true in nervous troubles, and no field offers so prolific a harvest for the quack and charlatan as the diseases arising from a weak or run-down nervous system.

Nevertheless, the most common of all diseases, indigestion and stomach troubles, which in turn cause nervous diseases, heart troubles, consumption and loss of flesh, requires something besides faith to cure.

Men's faith will not digest your food for you, will not give you an appetite, will not increase your flesh and strength on your nerves and heart, but Stuart's Dyspepsia Tablets will do these things, because they are composed of the elements of digestion; they contain the juices, acids and peptones necessary to the digestion and assimilation of all wholesome food.

Stuart's Dyspepsia Tablets will digest food if placed in a jar or bottle in water heated to 98 degrees, and they will do it much more effectively when taken into the stomach after meals, whether you have faith that they will or not.

that is, from plenty of wholesome food well digested.

It is not what we eat, but what we digest that does us good.

Stuart's Dyspepsia Tablets are sold by druggists at 50 cents for full sized package.

As exemplifying the magnitude of American commercial operations it is worth recording that Leiter Monday sold 5,000,000 bushels of wheat in Chicago, engaged freight cars on the Pennsylvania line to transport it to tide water, and chartered five steamships to carry a part of it to Europe. This is believed to be the largest operation of the kind that was ever made in any country.

It has been developed that the bill relative to pelagic sealing, which has just passed both houses of congress and is before the president, contains a provision of far-reaching importance that has thus far escaped attention. This places an absolute prohibition on the further bringing of seal skins into the United States from any source whatever. As the United States is the largest market in the world for seal skins, this complete stoppage of the trade in this country will be a severe measure against the British and Canadian industries which take and cure the skins and then dispose of them largely in the United States.

Governor Holcomb has approved claims on the trans-Mississippi exposition appropriation for space for the various departments.
