

SENDS IN REPORT.

President Requests Congress to Carefully Consider It.

STILL HAS FAITH IN PEACE.

Believes That Spain Will Act Honorably in the Matter.

FINDINGS OF COURT OF INQUIRY.

Maine Was Wrecked by a Mine—Board Unable to Fix Responsibility For the Disaster—Captain Exonerated From All Blame.

WASHINGTON, March 28.—The president today sent the following message to congress:

To the Congress of the United States: For some time prior to the visit of the Maine to Havana harbor our consular representatives pointed out the advantages to follow from the visit of national ships to the Cuban waters, in accustoming the people to the presence of our flag as the symbol of good will and of our ships in the fulfillment of the mission of protection to American interests, even though no immediate need therefor might exist.

Accordingly, on the 24th of January last, after a conference with the Spanish minister, in which the renewal of visits of our war vessels to Spanish

BOARD OF INQUIRY.

waters was discussed and accepted, the peninsular authorities at Madrid and Havana were advised of the purpose of this government to resume friendly naval visits at Cuban ports, and that in that view the Maine would forthwith call at the port of Havana. This announcement was received by the Spanish government with appreciation of the friendly character of the visit of the Maine and with the notification of the intention to return the courtesy by sending Spanish ships to the principal ports of the United States. Meanwhile, the Maine entered the port of Havana on the 25th of January, her arrival being marked with no special incident besides the exchange of customary salutes and ceremonial visits.

The Maine continued in the harbor of Havana during the three weeks following her arrival. No appreciable excitement attended her stay. On the contrary, a feeling of relief and confidence followed the resumption of the long interrupted friendly intercourse. So noticeable was this immediate effect of her visit that the consul general strongly urged that the presence of our ships in Cuban waters should be kept up by retaining them at Havana, or in the event of her recall, by sending their vessel there to take her place.

At 5:45 in the evening, of the 15th of February, the Maine was destroyed by an explosion, by which the entire forward part of the ship was utterly wrecked. In this catastrophe two officers and 280 of her crew perished, those who were not killed outright by her explosion being penned between decks by the tangle of wreckage, and drowned

THE OHIO SENATE

Elects the Hon. John E. Smiley as Its Clerk.

A National Spring Remedy.

The distinguished member of the Ohio senate, Hon. John E. Smiley, in writing of Pepsin, gave it as his opinion that it is the greatest remedy of the age. In saying this of course he is but reiterating what thousands of other people are saying, and the chief interest which attaches to his statement is the authority which his position gives to it. Such men would not write such things except there was considerable enthusiastic belief behind it. He goes on to say that Pepsin is an excellent remedy for catarrh, especially catarrh of the stomach. As this happens to be a very prevalent disease in the spring of the year, this remark is especially timely. It is catarrh of the stomach that produces the indigestion of springtime, for which it is quite common to take some spring medicine. Pepsin does not temporarily relieve these symptoms, but cures them by removing the cause. Pepsin is not a phytic or a saline, or a stimulant remedy, but is a natural invigorator of the whole system. Mr. Smiley goes on further to say that, as a tonic, he believes Pepsin has no equal. His remark is entirely true. Pepsin is an ideal spring tonic, and is rapidly becoming the most popular medicine in the world for this purpose.

The Pepsin Drug Manufacturing Company of Columbus, Ohio, are sending free a volume of similar testimonials entitled The National Witness. Send for a copy of it before the edition is exhausted.

BE SURE YOU ARE RIGHT and then go ahead. Be sure you get Hood's Sarsaparilla and you may confidently expect it will purify your blood and give you appetite and strength.

HOOD'S PILLS act easily and promptly on the liver and bowels. Cure sick headache.

by the immediate sinking of the hull. Prompt assistance was rendered by the neighboring vessels anchored in the harbor, aid being especially given by the boats of the Spanish cruiser Alfonso XIII and the Ward line steamer City of Washington, which lay not far distant. The wounded were generously cared for by the authorities of Havana, the hospitals being freely opened to them, while the earliest recovered bodies of the dead were interred by the municipality in a public cemetery in the city. Tributes of grief and sympathy were offered from all official quarters of the island.

The appalling calamity fell upon the people of our country with crushing force, and for a brief time an intense excitement prevailed, which in a community less just and self-controlled than ours, might have led to hasty acts of blind resentment. This spirit, however, soon gave way to the calmer processes of reason and to the resolve to investigate the facts and await the material proof before forming a judgment as to the cause, the responsibility and, if the facts warranted, the remedy due. This course necessarily recommended itself from the outset to the executive, for only in the light of a dispassionately ascertained certainty could it determine the nature and measure of its full duty in the matter.

The usual procedure was followed, as in all cases of casualty or disaster to national vessels of any maritime state. A naval court of inquiry was at once organized, composed of officers well qualified by rank and practical experience, to discharge the onerous duty imposed upon them. Aided by a strong force of wreckers and divers, the court proceeded to make a thorough investigation on the spot, employing every available means for the impartial and exact determination of the causes of the explosion. Its operations have been conducted with the utmost deliberation and judgment, and while independently pursued, no source of information was neglected and the fullest opportunity was allowed for a simultaneous investigation by the Spanish authorities.

Findings of the Board. The finding of the court of inquiry was reached after 23 days of continuous labor, on March 21, and having been approved on the 22nd by the commander-in-chief of the United States naval force on the North Atlantic station, was transmitted to the executive. It is here-with laid before the congress, together with the voluminous testimony taken before the court. Its purport is in brief, as follows: When the Maine arrived at Havana she was conducted by the regular government pilot to buoy No. 4, to which she was moored in from five and one-half to six fathoms of water.

The state of discipline on board, and the condition of her magazines, boilers, coal bunkers and storage compartments are passed in review, with the conclusion that excellent order prevailed, and that no indication of any cause for an internal explosion existed in any quarter. At 8 o'clock, on the evening of Feb. 15, everything had been secure and all was quiet. At 9:30 o'clock the vessel was suddenly destroyed. There were two distinct explosions, with a brief interval between them. The first lifted the forward part of the ship very perceptibly; the second, which was more prolonged, is attributed by the court to the partial explosion of two or more of the forward magazines.

The evidence of the divers establishes that the after part of the ship was practically intact, and sank in that condition a very few minutes after the explosion. At frame 17, the outer shell of the ships, from a point 1 1/2 feet from the middle line of the ship and six feet above the keel when in its normal position, has been forced up so as to be now about four feet above the surface of the water; therefore, about 34 feet above where it would be had the ship sunk uninjured.

The outside bottom plating is bent into a reversed "V" shape, the after wing of which, about 15 feet broad and 33 feet in length (from frame 17 to frame 25), is doubled back upon itself against the continuation of the same plating extending forward.

At frame 18 the vertical keel is broken in two and the keel bent into an angle similar to the angle formed for the outside plates. This break is about six feet below the surface of the water and about 30 feet above its normal position.

In the opinion of the court this effect could have been produced only by the explosion of a mine situated under the bottom of the ship, at about frame 18 and somewhat on the port side of the ship.

Conclusions of the Court.

The conclusions of the court are: That the loss of the Maine was not in any respect due to fault or negligence on the part of any of the officers or members of her crew.

That the ship was destroyed by the explosion of a submarine mine, which caused the partial explosion of two or more of her forward magazines; and,

That no evidence has been obtainable fixing the responsibility for the destruction of the Maine upon any person or persons.

I have directed that the finding of the court of inquiry and the views of this government thereon be communicated to the government of her majesty, the queen, and I do not permit myself to doubt the sense of justice of the Spanish nation will dictate a course of action suggested by honor and the friendly relations of the two governments.

It was the duty of the executive to advise the congress of the result, and

in the meantime deliberate consideration is invoked.

(Signed.) WILLIAM MCKINLEY. Executive Mansion, March 28, 1898. In neither senate nor house was there any debate in reference to the president's message. It was referred to the committee on foreign relations under the rules. The house adjourned early out of respect to Representative Simpkins of Massachusetts.

MAINE BOARD'S REPORT.

Ship Blown Up by a Mine Exploded Under Two Magazines—Second Explosion, That of Port Magazine, Follows—Sigsbee Exonerated.

WASHINGTON, March 28.—The following is the full text of the report of the court of inquiry:

U. S. S. IOWA, KEY WEST, Fla., March 21.—After full and mature consideration of all of the testimony before it, the court finds as follows:

1. That the United States battleship Maine arrived in the harbor of Havana, Cuba, on Jan. 25, 1898, and was taken to buoy No. 4, in from five and one-half to six fathoms of water, by the regular government pilot. The United States consul general at Havana had notified the authorities at that place the previous evening of the intended arrival of the Maine.

2. The state of discipline on board the Maine was excellent, and all orders and regulations in regard to the care and safety to the ship were strictly carried out. All ammunition was stored away in accordance with instructions, and proper care was taken whenever ammunition was handled. Nothing was stowed in any one of the magazines or shell rooms, which was not permitted to be stowed there. The magazines and shell rooms are always locked after having been opened; and after the destruction of the Maine, the keys were found in their proper place in the captain's cabin, everything having been reported secure that evening at 8 p. m. The temperatures of the magazines and shell rooms were taken daily and reported. The only magazine which had an undue amount of heat was the after 10-inch magazine, and that did not explode at the time the Maine was destroyed. The torpedo war heads were all stowed in the after part of the ship under the wardroom, and neither caused nor participated in the destruction of the Maine. The dry gun cotton primers and detonators were stowed in the cabin aft and remote from the scene of the explosion. The waste was carefully looked after on board the Maine to obviate danger. Special orders in regard to this had been given by the commanding officer. Varnishes, driers, alcohol and other combustibles of this nature were stowed on or above the main deck and could not have had anything to do with the destruction of the Maine.

The medical stores were stowed aft under the ward room, and remote from the scene of the explosion. No dangerous stores of any kind were stowed below in any of the other storerooms. The coal bunkers were inspected. Of those bunkers adjoining the forward magazines and shell rooms, four were empty, namely: B3, B4, B5, B6. "A15" had been in use that day and "A16" was full of New River coal. This coal had been carefully inspected before receiving it on board. The bunker in which it was stowed was accessible on three sides at all times, and the fourth side at this time on account of bunkers B4 and B5 being empty. This bunker, A16, had been inspected that day by the engineer officer on duty. The fire alarms in the bunkers were in working order, and there had never been a case of spontaneous combustion of coal on board the Maine. The two after boilers of the ship were in use at the time of the disaster, for auxiliary purposes only, with a comparatively low pressure of steam, and being tended by a reliable watch. These boilers could not have caused the explosion of the ship. The four forward boilers have since been found by the divers, and are in a fair condition.

On the night of the destruction of

DOING GOOD EVERYWHERE.

A Medical Discovery That Effectually Cures Piles in Every Form.

For many years physicians have experimented in vain, seeking a remedy which would effectually cure piles and other rectal troubles, without resorting to a surgical operation. Many remedies were found to give temporary relief, but none could be depended upon to make a lasting, satisfactory cure.

Within a recent period, however, a new remedy, the Pyramid Pile Cure, has been repeatedly tested in hundreds of cases and with highly satisfactory results.

The first effect of the Pyramid Pile Cure is to instantly remove the pain and irritation generally present, and from that time on the cure rapidly progresses and before the patient is hardly aware of it is entirely cured. The remedy seems to act directly on the nerves and blood vessels of the parts affected as it comes into direct contact with them and sets up a healthy action, which in a perfectly natural way brings the parts to their normal condition.

The remedy does its work without any pain or inconvenience to the sufferer and is a justly considered one of the most meritorious discoveries of modern medicine.

Piles is one of the most annoying and often times dangerous diseases with which humanity is afflicted. It is suggested it frequently develops into fistula or some equally fatal or incurable trouble, whereas, by the timely use of this simple but effective remedy no one need suffer a single day from any form of piles unless they want to.

The Pyramid Pile Cure is perfectly harmless, containing no mineral poisons and is also very reasonable in price, costing but 50 cents a package. It is sold in drug stores everywhere. The manufacturers of the remedy are the Pyramid Drug Co., of Marshall, Mich., who have placed this excellent preparation before the public only after giving it thorough and repeated tests in the hands of reputable physicians. The results in hundreds of cases have convinced us that it will not disappoint you.

An Afflicted Mother.

From the Times, Paw Paw, Ill.

A resident of this town has lost two children during the past six years, by violent deaths has been utterly prostrated by the shock, and seriously sick as a result of it. One child (aged 9) was killed by a cyclone in '90 while at school; another, three years later, was run over by a Burlington R. R. train. That grief and misfortunes may so prey on the mind as to lead to serious physical disorders has been well demonstrated in this case. As a result of them, her health was shattered and she has been a constant sufferer since 1890. Her principal trouble has been neuralgia of the stomach which was very painful, and exhibited all the symptoms of ordinary neuralgia, nervousness and indigestion. Physicians did her no good whatever. She was discouraged and abandoned all hopes of getting well. Finally, however, a certain well known pill was recommended (Dr. Williams' Pink Pills for Pale People.) She supplied herself with a quantity of them and had not taken them two weeks when she noticed a marked improvement

in her condition. She continued taking the pills until seven or eight boxes had been consumed and she considered herself entirely cured. She can now eat all kinds of food, which is something she has not been able to do for years. She is not troubled in the least with nervousness as she was during the time of her stomach troubles.

She is now well and all because of Dr. Williams' Pink Pills for Pale People a complete cure has been made.

If any one would like to hear more of the details of her suffering and relief gained by the use of Dr. Williams' Pink Pills for Pale People they may be obtained probably, by writing the lady direct. She is one of our well known residents, Mrs. Ellen A. Oederkirk, Paw Paw, Illinois.

The Maine everything had been reported secure for the night at 8 p. m. by reliable persons, through the proper authorities, to the commanding officer. At the time the Maine was destroyed the ship was quiet, and, therefore, least liable to accident caused by movements from those on board.

3. The destruction of the Maine occurred at 9:30 p. m., on Feb. 15, 1898, in the harbor of Havana, Cuba, being at the time moored in the same buoy to which she had been taken upon her arrival. The forward part was completely demolished.

Upon the evidence of concurrent external cause the finding of the court is as follows:

There were two explosions of a distinctly different character, with a very short but distinct interval between them, and the forward part of the ship was lifted to a marked degree at the time of the first explosion.

The first explosion was more in the nature of a report, like that of a gun, while the second explosion was more open, prolonged and of greater volume. This second explosion was, in the opinion of the court, caused by the partial explosion of two or more of the forward magazines of the Maine.

The Condition of the Wreck. 4. The evidence bearing on this, being principally obtained from divers, did not enable the court to form a definite conclusion as to the condition of the wreck, although it was established that the after part of the ship was practically intact, and sank in that condition a very few minutes after the destruction of the forward part.

The following facts in regard to the forward part of the ship are, however, established by the testimony:

That portion of the port side of the protective deck, which extends from about frame 30 to about frame 41, was blown up aft and slightly over to starboard, folding the forward part of the middle superstructure over and on top of the after part. This was, in the opinion of the court, caused by the partial explosion of two or more of the forward magazines of the Maine.

At frame 17, the outer shell of the ship, from a point eleven and one-half feet from the middle line of the ship, and six feet above the keel, when in its normal position, has been forced up so as to be now about four feet above the surface of the water, therefore about thirty four feet above where it would be had the ship sunk uninjured. The outside bottom plating is bent into a reversed V shape, the after wing of which about 15 feet broad and 32 feet in length (from frame 17 to frame 25) is doubled back upon itself against the continuation of the same plating extending forward.

At frame 18 the vertical keel is broken in two, and the flat keel bent into an angle similar to the angle formed by the outside bottom plating. This break is now about six feet below the surface of the water and about 30 feet above its normal position.

In the opinion of the court, this effect could have been produced only by the explosion of a mine situated under the bottom of the ship at about frame 18, and somewhat on the port side of the ship.

6. The court finds that the loss of the Maine, on the occasion named, was not in any respect due to fault or negligence on the part of any of the officers or members of the crew of said vessel.

7. In the opinion of the court the Maine was destroyed by the explosion of a submarine mine, which caused the partial explosion of two or more of her forward magazines.

8. The court has been unable to ob-
