If General Miles lives to see this last wrong righted, he may well congratulate himself that although presidents may despise honor and violate promises, the people at last in some way set things right. We hope that Miles will make as brave a fight for the rights of Porto Ricans as he did for those of Chief Joseph.

Practical men who know the world and especially that portion who knew Webster Davis never put much faith in that he would resign his office so that he could work for the Boer cause. They all suspicioned that there was something else behind that move. It now turns out Mr. Davis will run for congress in a Missouri district which he hopes to save for McKinley. He will illustrate his love of liberty by talking against English imperialism in South Africa and for Mc-Kinleyism in Porto Rico and the Philippines He fancies that he can carry that district because there are a good many We must follow the example of the Germans living in it. The difference between a "sound great influence of America to bear in money" man and a populist lunatic is this: The "sound money" man believes in inflating the currency to the extent of \$800,000,000 through the banks. The populist lunatic believes in inflating the money to \$50 per capita without paying the banks interest on it, and therein appears the superiority of the wisdom of the sound money man.

There is no hero worship in the make up of the populist party. They do not put Bryan or any other man on a pinnacle and fall down and worship. They support Bryan, every man of them, because they believe in the principles which he advocates, and they have absolute confidence in his honesty and courage. He is their candidate and they will fight for him until the last vote is counted. But he is not a hero to worship. They don't engage in that sort of thing.

Senator Hoar made the same argu ment and quoted many of the same authorities that Gen. Weaver did in his speeches in the last campaign in regard to the transfer of the allegiance of a people by purchase or otherwise. There is no doubt that all authorities on international law are agreed that the allegiance of the inhabitants cannot be purchased with money or transferred by treaty. Such a thing was never claimed until the doctrine was proclaimed by the emperor of the Philippines, William I.

It has been their work that has redeemed that county from the republicans and gold standard democrats who formerly held sway there. That they have never received the slightest recognition for their work has not abated their ardor in the least. As one of them says in a letter, "they are for reform rather than for party." But the state of things that has existed there cannot go on forever. Those who have ignored them may find out that conditions may arise when the necessities of reform will not compel them to vote a solid democratic ticket in county affairs.

of Lincoln have so long been utterly disgusted with the editorial writing in the State Journal that they have ceased to protest. They take it for granted that aside from the press dispatches and some intelligent writing by the reporters who work on that sheet, they will find nothing but idiocy and let it go at that. Of late, however, some of the citizens of foreign birth have been compelled to read the paper because it is the only morning paper in town, have been protesting against its shameful ignorance and constant misrepresentations of facts, especially in regard to South Africa and other European matters. The other day one of these gentlemen sent to the editor of the Journal the following note:

"Editor of the State Journal:-- If you will look up an almanac you might be has been deposed since August 1876.
