

# OXYGEN: NATURE'S ANTIDOTE FOR HUMAN ILLS

To increase the Oxygen in the human body in addition to lung respiration, thus intensifying the combustion within the body, is the most natural and successful method yet devised by Therapeutic Science.

### Gall Stone and Kidney Trouble.

Omaha, Nebraska, January 12, 1900.

Gentlemen—I very gladly comply with your request for a statement of what the Oxygenor has done for my family. Mrs. Jackson has been in poor health for over three years, suffered greatly from gall stones. At first the attacks were about three months apart, but as time went on they increased until they were only a week apart. At these times the pain was very intense, and two physicians were unable to alleviate the pain.

In addition to the gall stones she was in constant pain caused by other troubles, and the only remedy, as claimed by the doctors, was an operation, and they urged that it be done very soon. In this condition she was induced to try the oxygenor, and I must say with the most gratifying results. Mrs. Jackson commenced to improve immediately, and in about three weeks time nearly all pain and discomfort, for which an operation was considered necessary, was gone.

It is now about three months since she commenced the use of the Oxygenor, but have not had any more gallstones, and is enjoying better health than for many years.

I am pleased to add my own experience in the use of this most valuable instrument. About two years ago, while on a business trip in the west, I was taken sick and not expected to live, and finally was able to come home, but since then my health has been poor and gradually getting worse, although under the doctor's care all the time, until it developed into a serious kidney trouble.

A friend advised me to try the oxygenor, but I refused, declaring that there could be no virtue in such a small device as the Oxygenor, but a few weeks later my wife was induced to try one, and I noticed such a marked change in her condition that I concluded to try it myself. I was astonished with the results of the first night's treatment, and after not more than three weeks use of the Oxygenor I am a well man. It is surely a most wonderful instrument, and it should be in every home. We feel very grateful to the friend for making known to us the great value of the Oxygenor. You are at liberty to make any use you please of the above testimonial.

ALMA JACKSON,

Jackson, Higgins & Co., Stock Exchange, South Omaha.

### An Operation Which Merely Treated the Effects Without Removing the Cause—The Oxygenor Cures by Removing the Cause.

Omaha, Nebraska, May 28, 1900.

Nebraska Oxygenor Co.—Gentlemen:

This is to certify that I, following a siege of pneumonia, was stricken by an attack of pleurisy with effusion. The exudate accumulated to such a quantity that the heart's action was seriously interfered with and I could scarcely draw my breath. In this condition I was advised by the physicians that the only hope to save my life would be by a surgical operation, to which I submitted.

In a short time the fluid again accumulated and this procedure had to be repeated, as the disease had become chronic. I scarcely weighed a hundred pounds, and, becoming very much discouraged, as a last resort I was induced to use the Perfected Oxygenor-King, and to my gratification and surprise this fluid was absorbed and all other distressing symptoms rapidly disappeared. This has been a year ago, and to this day I have not had a single symptom of the old trouble. Words fail to express the gratification and praise I have for this wonderful machine, as I am positive it saved my life.

Yours truly,

MRS. LUCY MESERAULL,  
1923 Dodge St., Omaha.

### Extract From an Article Appearing in the Nebraska Blizzard of June 15, 1900.

The Blizzard, before purchasing an Oxygenor, interviewed a number of people who had used the instrument and found that it is a successful treatment for rheumatism, neuralgia, nervous prostration, kidney trouble, female weakness, and indeed almost any disease of a chronic nature that flesh is heir to. Mr. Phil Sommerlad, bookkeeper at the Western Newspaper Union, purchased one and his wife used it for nervousness. She is now cured and Mr. Sommerlad says they would not part with it for any money if they could not secure another one. He had previously spent \$300 on doctor bills.

William Decker, a mail carrier, purchased one, and Mrs. Decker used it for rheumatism, and other members of the family have used it for colds and other minor ailments and are loud in the praise of its curative effects.

Mrs. J. Knott, 3105 R street, this city, was a sufferer from rheumatism and could hardly put her foot to the floor. Three hours treatment with the oxygenor afforded relief, and a few days treatment effected a complete cure and Mrs. Knott cannot say too much in praise of the little machine and its wonderful curative properties.

Secretary of State Porter bought one and the family used it for various ailments with the most satisfactory results. Mrs. Porter thinks it simply perfect in the cure of diseases generally. Dozens of other people in this city have used the Oxygenor and are unstinted in praise of its merits for alleviating pain and curing disease.

## How to Introduce Oxygen Into the Human Body

artificially, except at enormous cost, has been the constant study of eminent scientists for years. Various methods have been used with wonderful success, but at enormous cost, until within the last few years science has solved the problem, and what was once obtained only at a large expenditure can now be secured at a nominal price.

What was administered only by specialists of materia medica can now be applied by any one—even a child—by reason of the scientific operation and absolutely harmless mechanical device called "Perfected" OXYGENOR-KING.

With an OXYGENOR-KING at hand you can be as free and independent of disease, contagious and infectious, as though no such thing existed. By pouring into every capillary, vein, and artery the vivifying oxygen of the air you change disease into health in less time than is often required to procure a remedy.

Remember, with the Oxygenor treatment it is not "try this, and if it don't help we will try something else," but simply apply the Oxygenor and you will have a diagnosis and cure at the same time.

Lay aside your prejudice for new things which are not clear to you long enough to investigate the merits of the Oxygenor, and your skepticism and doubts will give way before the thousands of living witnesses of the life-saving, health-restoring and money-saving invention of the twentieth century.

Z. R. MOSES, Mgr. Nebraska Oxygenor Co.

## THE PERFECTED OXYGENOR-KING CURES WHERE EVERYTHING ELSE HAS FAILED

The Oxygenor is not a battery, not electricity, not magnetism, but simply a MECHANICAL DEVICE which, when applied to a human organism, causes it to absorb from the surrounding air the life-supporting force by which we live—oxygen. ### PARALYSIS—LOSS OF SPEECH.

Omaha, Nebr., April 11th, 1900. Nebraska Oxygenor Co.

Gentlemen: This is to certify that two years ago this day I was stricken with paralysis of the right side. I lost the power of speech and suffered untold agony with my throat. I tried many remedies and treatments—all failures, and I never expected to recover. I had heard so much about the Oxygenor-King that finally I was persuaded to give it a trial. I am pleased to say that it seemed to take immediate hold in my case, and after a few weeks use has enabled me to converse freely. I am now able to help myself and do much of the household work, and I feel confident that I shall recover the grand blessing of health again by continuing the use of the Oxygenor-King. This day is indeed a happy anniversary for me. With best wishes for your success, I am, yours truly, MRS. ELLA HYATT, 1916 Paul St.

### Asthma—Varicose Veins

Omaha, Neb., April 16th, 1900. Nebraska Oxygenor Co.,

Gentlemen:—It is with pleasure that I can testify to the great curative powers of the "Perfected Oxygenor-King. A year ago last November I had a severe attack of La Grippe, lasting several weeks. I had almost recovered when I was seized with hard breathing that seemed to almost choke me, which after considerable effort was finally somewhat relieved. However, from that time until a few weeks ago, I have been a constant sufferer from Asthma. I used many remedies and had been under the doctor's care for months with little if any improvement in my condition. I had taken so much morphine, and other strong medicines that my stomach was almost ruined, and could not digest my food and was greatly constipated. In this critical condition I was induced to try the Oxygenor-King. Your representative, Mr. Will J. Stevens, who de-

livered the instrument, informed me that asthma was difficult to control, as it was so easily effected by changing conditions of the weather, but he was confident that if I used the instrument faithfully, a cure would be assured.

A few days' use made such an improvement in my stomach that I could eat and enjoy my victuals. My strength increased perceptibly, but the asthma seemed at times to be worse. Remembering what Mr. Stevens had told me about the sensation I might expect, at times worse, then again better on account of the rapid changes the system undergoes by this treatment, I persevered with the result that I am free from that dreadful disease.—asthma.

I believe that the cure will be permanent, for a few days ago I caught cold, but it did not bring back the asthma. Not only has the P. O. K. cured my asthma, but also varicose veins on one of my limbs, which had given me much trouble, but it, too, has disappeared along with my other ailments. My daughter used the Oxygenor with splendid results, in fact, all members of the family used it, and we have gotten to that point in our estimate of the P. O. K. where we feel that we cannot get along without it. You are at liberty to make use of the above statement, for we believe that the instrument is all that is recommended. Sincerely yours, MRS. HENRY LAKE, 2203 North 20th St.

### Paralysis—General Debility

Crescent, Ia., June 2, 1900. Nebraska Oxygenor Co.,

Gentlemen:—I have had the Oxygenor-King but two months and although so short a time it has helped me wonderfully. My arm was paralyzed and always cold, before having used the "perfected" Oxygenor-King which is helping me in other ways as I have a good appetite and sleep well, and I feel that it is rebuilding my whole system. Yours truly, MRS. JOHN HUTCHISON.

### Kidney and Stomach Troubles

Albia, Ia., Feb. 28th, 1900.

Gentlemen:—In reply to yours of recent date as to what I can say for or against the Oxygenor-King, I most willingly endorse all that you claim for it, so far as I have tested its merits. Previous to using it, I was wretched in health—the result of long standing kidney and stomach troubles. Within two days after using the instrument, I began to feel benefitted, until now ham sandwiches and doughnuts have no terrors for me. I never felt better in my life than I do at the present time, and never invested a dollar to better advantage than when I bought an "Oxygenor-King." All that one needs to know, is that one is ill, put on the instrument, and it will do the rest without need of a diagnosis of the case. I am sincerely yours, A. B. BLY, Conductor C. B. & Q. Ry.

### Locomotor Ataxia

Gentlemen:—It is with pleasure and gratitude that I am able to be one of the many in Toledo to sound the praises of the "Perfected" Oxygenor-King. For some weeks prior to Nov. 20th, 1899, I had been in a helpless condition from the dreadful disease called locomotor ataxia. I was obliged to give up my work, being that of a carpenter, and became so helpless that I could not feed myself nor walk across the room. My condition became steadily worse under medical treatment and I had about given up all hopes of recovery. Mr. J. Cooper Price, of 314 Michigan Street, Toledo, requested me to try the "Perfected" Oxygenor-King. After seeing the instrument and having its method of application explained, I reluctantly gave up medical treatment that I might give it a fair trial, and you can imagine my surprise and joy when, after using the instrument seventeen days, I was able to walk three blocks, to feed and wait on myself, which I had not been able to do for many weeks. I have improved rapidly ever since and now am almost entirely free from any symptoms of the disease, and expect to go to work in a short time. Many of my friends and neighbors know of my former condition and regard this the most remarkable recovery they have ever seen. Yours truly, LEVI A. DES ROCHER, Toledo, O. 353 Avondale Ave.

### Paralysis

(From ex-sheriff Pottawattamie County.)

Council Bluffs, Ia., June 1, 1900.

Nebraska Oxygenor Co., Gentlemen:—I have been using the "Perfected" Oxygenor-King for paralysis and find it has benefitted me greatly as I am able to be up and around once more.

I am satisfied with the instrument as it has accomplished so much in such a short time. Thanks to the Oxygenor-King. Very truly yours, JOHN S. MORGAN,

### Dropsy and Muscular Rheumatism

Le Grand, Ia., Dec. 24, 1899.

Dear Sirs:—I am glad to testify to the efficiency of your Oxygenor-King as a remedial agent. As a health producer and nerve quieter. I have nowhere found its equal. My wife, sixty-seven years of age, has been sorely afflicted with dropsy until we had to bandage her limbs to prevent them from bursting. In addition to dropsy, for the last three years, her limbs (lower) were shrunken and half bent with muscular rheumatism. Her suffering was great. Our son-in-law procured one of your Oxygenor-Kings. We treated her constitutionally for two months. She is now free of these two diseases, for which we feel grateful. Yours truly, SAMUEL JAY, Minister of Friends' Church.

### THEIR FAMILY DOCTOR

Blencoe, Iowa, April 30th, 1900.

Nebraska Oxygenor Co., Gentlemen:—It is with much pleasure that I am enabled to testify to the great merits of the Perfected Oxygenor-King. Drugs and medicine has been done away with in our family since November, 1899. Since that time the Oxygenor has been relied on to keep our family in health, and not in a single case has it made a failure. The instrument has a good reputation in this locality, as there are quite a number in use and all doing for others just what it has done in our family. Very respectfully, MRS. IDA MOYERS.

### ASTHMA

(From one of the best known doctors in Central Nebraska.)

Nebraska Oxygenor Co., Gentlemen:—This is to certify that I have been afflicted with Asthma since 1885. While I have done my work all the time, yet I have been a constant sufferer with the disease named above. Last November I bought an Oxygenor-King, and I have been using it since that time with very satisfactory results. I have found great relief and it gives me great pleasure to recommend the Oxygenor-King.

Before using the Oxygenor-King I never allowed myself to be without some "asthma cure," which I found at best afforded but temporary relief. Since I have been using this machine I have discarded all patent medicines, and I believe that by continued use of the Oxygenor-King, that I will be permanently cured. I would not take a hundred dollars for my instrument if I could not purchase another. Yours truly, JAMES LEONARD, Pastor I. E. Church, Cozad, Neb.
