The way some of the old "hayseeders" handled such questions as sub-treasury, national banking, and school text book schemes would have surprised some of our leading lights in political lore. The national bank system is far preferable to State bank frauds. The State bank cry is a side issue to catch the Alliance with and thus enable the money power to keep its death hold upon the people. It is such a palpable fraud that we think it will not deceive many, but its intention is to deceive and rob the people.
