

ATTENTION POPULISTS.

The Chairman and Secretary of The National Committee Issue an Address.

THE INDUSTRIAL LEGION

Recommended as The Best Means of Advancing The People's Movement.

An Earnest Appeal.

To the Executive Committees of the People's Party in the several States.

GENTLEMEN:

Time sufficient has elapsed for the dust and din of the great political battle of 1892 to pass over and for us to study our successes and failures.

We hope that all our workers have been greatly benefited by the experiences through which we have passed.

Several states will hold elections this year and we desire that each of these be helped by the states that have no election.

The democratic party is now reveling in its ill-gotten gain. The fight over the spoils is terrific and extremely humiliating to every lover of our republican government.

The democratic party finds itself in an awful dilemma. It has promised everything and is every day demonstrating the fact that it is totally incapable of giving anything.

Recent decisions of the Federal Courts prove clearly that ours is a government (as now administered) of the corporations.

When we contemplate the present situation, review the absolute stupidity of the powers that be and the universal discontent of the great common people, is it not an auspicious time?

No time should be lost. Plans for the work should be laid out, and the work begun at once.

The experience of your national committee, (and we dare say it is the experience of every State Committee) teaches us that we cannot look to the moneyed men or corporations for aid in this contest for human rights.

One says, are we not already organized? There are the Knights of Labor, the Farmers' Alliance, the Grange, the F. M. B. A., the A. P. A. of I. and others of like character.

We have naught to bring against either of them, for the good they have already done will live to bless humanity forever.

But there must be an organization to perform a specific work that neither of these organizations can perform. We cannot call upon either of these organizations to contribute in any way to the raising of funds, to carry on the work of the people's party, because they are composed of men of all parties.

are cared for and provided with good audiences.

With no money upon which to rely, our national committee after a thorough study of the situation, has come to the conclusion that an organization to perform the work is an absolute necessity.

With this idea in view the national committee evolved the Industrial Legion as the best plan to accomplish this work and now we appeal to the State Committees, and urge them to take steps at once to thoroughly organize our forces in each state into the Industrial Legion.

Let every one take hold and help and when the next campaign opens we will have a working force of which we will all be proud.

A JAPANESE LADY LAWYER.

The Flowery Isles Keep Up With Civilization.

Who will now say that Japan is not fully abreast of these times? Madame Tel Sono, of that country, dictated by her father on poetry and moral religion, married at 19 to an officer of the mikado treasury, and not entirely satisfied with her experience, has become a practicing lawyer.

For twelve years she has pleaded in the courts, and her name is well known throughout the mikado's dominions.

In her legal capacity she came to fully appreciate the position of Japanese women, and determined to study the woman question in a land where the sexes stood on an equality, she came to America in 1886.

She is a practical philanthropist, is small of stature and has winning manners. She speaks English well. She has discarded the native dress and wears the black satin of Western civilization.

The project has been received with great favor, and the school for higher education of woman in Japan promises to be a success.

A HUSTLING TOWN.

It has a Population of One and no Provision for Visitors.

An Eastern man who had been making a trip through the West got off the train at a quiet country station called Hustler.

"Is this the town of Hustler?" he asked of the station master. "Yes, sir."

"Is this all of the town?" "It is."

"Why, I read that it was a growing place."

"It has grown one house this year."

"I was told that it had great prospects."

"Lots of chances here, sir."

"But there is no town here—literally nothing to speak of?"

"They all have to begin, you know."

"Can I get anything to eat here?" "No, sir."

"What time does the next train pass?"

"Seven hours to wait."

"Will you tell me who named this town?"

"Yes, sir. It was the man who moved out of that cabin."

"What induced him to call it Hustler?"

"Because he knew that every one would hustle to get out of it. Sit down on the platform and make yourself at home while you have to wait."

A Mouth to Suit All Characters.

A dramatic artist named Lemahon, better known under the assumed appellation of Paul Bonjour, had great success as a singer of comic songs during the reign of Louis Philippe.

Round trips to the Pacific Coast. Short trips to the Mountain Resorts of Colorado.

The Great Salt Lake. Yellowstone National Park—the most wonderful spot on this continent.

And all reached via the Union Pacific System. For detailed information call on our address.

E. T. MARTIN, C. T. A., 1044 O St., J. B. SLOSSER, Gen. Agt., Lincoln, Neb.

WOMEN'S CONGRESS.

THEY OPEN THE SERIES OF WORLD'S CONGRESSES.

A MAGNIFICENT GATHERING.

President Bonney Delivers the Opening Address Before an Assemblage of Notables From all Parts of the Earth—Inaugurated Beneath the Colors of Many Nations of the World.

CHICAGO, May 16.—The Sovereign Providence of God has made us participants in the important and far reaching work that will be known in the history of mankind as 'The World's Congresses of 1893,' and we have assembled to begin the actual execution of the plans which have been prepared.

It was with these words that President Charles C. Bonney to-day in the new permanent memorial art palace on the lake front, opened the series of gatherings that will continue until the world's fair is at an end.

A rapid sketch was then given by President Bonney of the development of the world's congress scheme, pausing a moment for a tribute to the memory of advisory members who had been called to the nighting congress of the illustrious dead—James G. Blaine, Cardinal Manning, Tenyson, Whittier, Professor Emile de Laveleye of Belgium, George William Curtis and Bishop Phillips Brooks.

The congresses were inaugurated beneath the colors of many nations in one of the large auditoriums. Long before the hour set the halls and corridors of the spacious Art building were thronged.

In each township in the United States FREE! Give express office and number of hops. A trial only costs you the express charges and a report of the result of using the medicine.

Among those on the platform were the commissioner general of Russia, Carlos R. Gallardo, president of the Argentine commission Dr. Theodoroff, Russian imperial delegate; Anton von Holtzschek, LL. D. Austrian commissioner; Alexander Popporis, LL. D. Assistant Austrian commissioner; Baron Goerges von Pilchias, Russian imperial delegate; M. L. Dinischa, and Gustave Neiderling, Argentine commissioners.

An hour after the dedication of the congresses as a whole, the women's congress, the initial meeting of the great series of world's fair gatherings, assembled in the Hall of Washington, another part of the Art palace, and an address of welcome was delivered by Mrs. Palmer, president of the woman's branch of the world's congress.

In the afternoon there was a public reception to which all those attending the congress were invited. The president and vice president of the woman's branch of the world's congress auxiliary, with the committee of arrangements of the world's congress auxiliary, received in the offices of the woman's branch the foreign representatives forming part of the reception committee.

Missouri has sent to the Mines and Mining building 6,000 pounds of lead ore, all in one piece. Missouri's marbles show twenty different varieties, besides onyx and building stone.

Michigan displays the models of two copper mines, one being the example sent to the Centennial and the other being intended to show the improvements which have since been introduced.

In the Mines and Mining building Canada shows a block of nickel weighing 4,500 pounds, worth \$1,500; a block of mica ten inches thick, weighing 1,400 pounds and specimens of zinc, copper, lead, iron and a little gold and silver.

The cold storage house, an adjunct of Machinery hall, is 254 feet long, 130 feet wide and five stories high. In it is preserved the food used in the restaurants in the grounds. The upper floor is a great skating rink and the ice will be kept in perfect condition all summer long.

WORLD'S FAIR NOTES.
