WORLD'S FAIR GROUNDS, CHICANO, May E .- The report of the council of administration on the plano controversy was to the effect that the controversy was one of administrative detail, and consequently properly came before the council of administration for adjudication, that the question was one over which the national commission had no jurisdiction, and that the decision of the national commission should not be accepted.

Will Protect Plano Manufacturers. The council of administration, the report said, had thoroughly investigated the matter and would take measures to protect the interests of every piano exhibitor at the fair by a rule compelling the use of their instrument at World's Fair concerts. The report was adopted. In effect, the ruling of the council of administration is that while the instruments of exhibitors must be used at rehearsals, soloists will be permitted to perform on their favorite piano at concerts.

Paderewski Was There.

The first concert of the exposition orchestra, of 114 pieces, was given Tuos-day afternoon in Music Hall. Mr. Paderewski was present and performed on his favorite piano. The commencement was delayed about 15 minutes, owing to the action of the council in the piano controversy. The crowd was small, The opening number by Mr. Thomas' orchestra, an overture, "The Consecration of the House," by Beethoven, being loudly applauded. Mr. Paderewski was given an enthusiastic encore. He played two pieces, a concerto in A minor, by himself, and a nocturne, by Chopin. Both were well received. The concerts will be continued from day to day. It may be stated in connection with the decision of the council of administration in the piano imbroglio that none of the pianos received in Manufacturers' Hall, to be placed on exhibition, have been unpacked.

Did Life Begin at the Poles?

As a matter of fact this earth of ours has long passed its youth. It is now verging on old age, and with its poles covered by everlasting ice it may be likened to a body whose extremities are bleached and paralyzed with years. Even in the geological period which immediately preceded our own, and which is known as the postpliocene, or quaternary, great changes took place, and man has been a witness to them. The rivers of today are mere brooks compared to what they were then, and in North America we can trace the shore lines of

immense quaternary lakes which no

Trouble In the Board of Lady Managers of the Woman's Building.

CHICAGO, May 3 .- When the board of lady managers assembled in the Woman's building for their regular meeting there was a jolly row growing out of Monday's dedication ceremonies. Many of the ladies are intensely angry with the ceremonies committee on account of what they are pleased to call an unpardonable slight, and unless wise heads prevail, the whole matter will be officially brought before the board in the form of a vigorous protest, which will probably make trouble. The dissatisfied ladies accuse the ceremonies committe and Mrs. Marv Logan, as well as the president of the board in particular, with assuming to run the woman's deonly manual interest to the exclusion of the fron-huest complaint on the fact that none

The Mississippi at St. Paul at the Flood Stage.

ST. PAUL, May 3.-At 8 o'clock Tueswest side, east of State street, is under May 8, 1889, and at night fall a tremendous rain storm was raging. The Minnesota and Rum rivers are out of gallons of water in the Mississippi river every hour.

The residents of the Bohemian flats have been forced to take to boats or to the hills and nearly a hundred families in the east end of the Sixth ward have been forced to move. The saw mills on the levee have been obliged to shut down and the water has backed up to the doors of the stove works. The base ball park at State and Isable streets is under six feet of water.

If another rise of a foot occurs every manufacturing establishment will have to shut down and all the families living on the flats will have to move to the hills to the southward. Reports from up the Mississippi and Minnesota rivers are not reassuring. At 7 o'clock in the evening the Minnesota was out of its A. B.
