A number of patriotic payers have declared that they have concluded to support Bryan and Watson in this campaign. Just how a publication which pretends to be an American paper and a supporter of the Little Red School House can conscientiously support W. J. Bryan when it knows his record in congress is more than we can comprehend. Never since the day that W. J. Bryan was nominated has there been any question in the mind of the editor of THE AMERICAN as to who should be supported by patriotic Americans or who would receive the support of this paper. THE AMERICAN has been consistent since its first issue and it will be consistent in its last. It will not support any man, now or hereafter. who does not approve of the principles of the A. P. A.; and W. J. Bryan is on record as opposing that order. He is on record as opposing the introduction of the English language into the publie schools of New Mexico. He is on record as the special pet and champion of Romanists in Nebraska, and he is on record as having favored the introduction and adoption of an anti-A. P. A. resolution by the platform committee of the convention which nominated him. Consequently we have not and will not endorse the candidacy of Mr.

Bryan. On the contrary we shall contribute to his defeat by giving his record on the A. P. A. and Roman questions as wide an airing as possible each week. In order to do this we shall print and circulate a large number of extra AMERICANS each week. These papers cost you nothing; they will be as free as water, and we ask you to read them carefully, and decide for yourself who nearest represents that American idea. Another thing:

According to this, then, our circulating medium increased a fourth fasier than our population. In other words, if we had good times in 1873 and prior to that time when there was but \$18.04 for each man, woman and child in the country, and it was the supply of cheap money that made times good, how do you explain why times are not correspondingly better to-day than they were in 1873 since we have \$4.89 more for each man, woman free coinage how would it be? Silver worth half as much as their face said in this city. Hon. John M. Thurston, and child than we had in 1873? If it is an abundance of money-an increase in the circulating medium-that improves That would mean that a dollar con- 100 per cent and you would have to pay address the meetings. The county business, why in the name of common sense are times not better now than they were in 1873? We think we can cents. Then, if a silver mine owner, from 25 to 30 per cent on every dollar parts of this state and Iowa. explain this point to your entire satisfaction. From 1861 to 1865 this country was in a turmoil-war was raging;

improvements were being destroyed, fields were being laid waste, towns, cities and villages were being sacked and burned; hundreds of thousands of men, and millions of heads of live empty, the stocks in stores were run down, factories and shops were idle, and the whole people were impoverished. Suddenly a peace was declared. The farmer went back to his field, the carpenter to his shop, the smith to the printer to his case, the laborer to his work. On every hand a cry went up for men to do the work. From every quarter came a demand for the farmer's grain. The wheels of commerce were set in motion, the factories were reopened, the shops were in operation Do not consider the copy of THE and labor was employed. There were prosperous, and the farmer was prosperous because those two classes were

How is it to-day. Your country is in tell them to send in their name to- shops are empty, the laborer is idle, gether with a silver dime and we will the merchant is doing but little business while the farmer has no market We had hoped to be able to send out for his crop. Yet we have more money weekly 50,000 extra papers, but the than we had in 1873. More money for friends who had to raise the fund to every man, woman and child than we pay the expense found that on account had then. Surely, then, it is not the of the stringency of the money market scarcity of money that makes these they were unable to raise enough to times so hard. It must be something pay the expense of issuing the papers, else. It must be because the laborer is so but a very small portion of that unemployed. But how can he be employed? THE best paper that bas reached this office for many a day is Light, published in San Francisco, by W. E. Price. It is brim full of original matter, and every line contains a bomb for the hierarchy. May it always prosper.

Referring to Rame's methods of attempting to be "all things to all men," the Boston Transcript says:

"There are intimations that Dr. Mc-Glynn will not be placed . over a parish in New York, but will be transferred to the jurisdiction of Cardinal Gibbons or Archbishop Ireland, or some other 'liberal' prelate. Such a transfer would be quite in accordance with the policy of Rome. Dr. McGlynn; and Archbishop Corrigan would not eget along together very well, and there might be a renewal of differences at which the faithful would be scandalized. Wherever Protestants are in an overwhelming majority, the policy of the Vatican is too smooth over such; affairs as the McGivnn episode, and 'to stimulate an indulgent liberality. In this case the priest who has given trouble might well be put under superiors owho are personally popular with Americans, and who are, as well, men. of tact, not wheat exporting countries since 1870 inclined to the conspisuous severity of discipline which Archbishop Corrigan believes in. FIRST NOTICE.

It has become necessary for businessmen in all branches of trade to do a strictly cash business, and as that necessitates our paying cash for what we buy we have also concluded to go to a cash basis, and will, on and after November 10, 1896, discontinue sending THE AMERICAN to all subscribers who are in arrears. If their accounts remain unpaid at that time they will be placed in the hands of a collection agency for settlement. We sincerely hope no subscriber will neglect to pay his bill on or pefore November [10, Look up your receipts and if you are in arrears come in and settle. Don't neglect this matter. Attend to it to-day.

THE Omaha Republican city plimarles will be held October 9th and the city convention on the 10th.

IT IS not our intention, and will not or the sterling integrity of the A. P. A. who believes his duty is to assist in the election of Mr. Bryan. This is a and argument. free country. Every man has a right to his opinion and no man has a right to molest or make him sfraid, While this is true we shall endeavor to show in a gentlemanly and courteous manner the reason we think they are wrong. We shall not say they are anarchists, knaves or fools. We do not believe they are. We believe them to be sensible men, and we also believe 677,000 in 1873, that the circulating they will be with us if we can show them why Republican success this year is better for them than Democratic success; and this we shall attempt to do. In order to do so, however, we shall be compelled to do what we have atcompelled to discuss the silver and

He cannot get work while persuasion.

TARIFF AND FINANCE.

In an editorial in another column we our readers.

We begin the discussion with some misgiving, because these are questions

we have espoused the right cause, we shall devote to it our best effort and trust to an All Wise Ruler of the desbe, to question the honesty of purpose tinies of men and nations for guidance and aid in the presentation of the facts

> By common consent the year 1873 is accepted as the date from which this discussion should proceed.

The statistics which we have been able to gather both as to the price of products, population and money, show some very strange things.

In the first place we find that the United States had a population of 41,medium the same year was \$751,881,809. or \$18.04 per capita, and that the price of wheat was \$1.25 per bushel.

We also find that the money of the country consisted of \$25,000,000 in coin and bullion in the United States treas tempted to avoid doing. We shall be ury and \$749,445,610 in paper money. We also find that the population of the tariff issues-two subjects which are United States in 1895 was 69,878,000, hard to master, and which unscrupul- that the circulating medium was \$1,- tract.

who does not have a friend who would home market for his produce. How do enjoy reading THE AMERICAN during we know this to be so? Because we the United States currency statistics the remainder of the campaign, and have just demonstrated to you that quoted on page 38 of Sound Currency, there is no friend of the American flag, labor of every character was not idle, to \$213,000,000. In other words, for 78 of free speech and a free press who but was enjoying the fruits of its toil cannot afford to send THE AMERICAN during the years which the friends of of the United States produced but \$56,to that friend when it only costs 10 free silver tell you they desire to re- 000,000 worth of silver, while from 1870 cents for the balance of September and turn to. And the good times of those years were not the result of an abun-

P. money then than we have to day-a States produced \$717,948.72 each year A., when shid representative remon- great deal less, 26 per cent less, or, to up to 1870, and they produced \$6,541,strated with him for toadying to Ro- be plain, \$4.89 less for every man, wo- 666 66 each year from 1570 until 1894 man and child in this country.

It is not more money we need to make us prosperous. It is more work 1870, produced but one-ninth as much fit to the farmer is a man in the city money? Can he buy a peck of apples, flour or meat? No, sir; he cannot. to a silver tasis, because capital will United States for 24 years would raise there is any show of the country going not seek investment in enterprises now struggling to exist or in those, in conhave agreed to discuss the tariff and templation of establishment while this financial problems for the benefit of agitation for the free and unlimited coinage of silver continues.

Now, what is the difference between the way we have coined silver up until which have been ably handled by but a recent date and the way it would be few men; still, firm in the belief that done under the free and uulimited coinage plan?

Under the law that the last congress repealed, the government bought monthly 4,500,000 ounces of silver bullion of those having it for sale, prinwhich are the foundation of our belief cipally from the silver mine owners in the states lying west of Nebraska, Kansas, Texas and Oklahoma, at the same price those mine owners could sell their silver for to any other customer. Would the farmer want more from the government for his products than he could get for the same thing from a

private individual? Certainly not. But these mine owners do, and we will show you why in a minute.

Under the law that congress repealed the officials of the treasury department bought silver bullion at its graphs.

market value-so much per ounce, and as the market price of silver was but a ver? If you do not own silver, or a siltrifle over 92 cents per ounce the government would give the mine owner his pay in notes which were a legal or you will have to sell something. unless otherwise stipulated in the con-

years next preceding 1870, the mines to 1894-twenty-four years-they produced \$157,000,000 worth of silver. To Are you interested in the defeat of a dance of cheap money, for we had less be plain, the mines of the United And now, to further illustrate, the mines of the United States, prior to silver each year as they did from 1870 to 1894. Or, probably it would be plainer this way: The mines of the United States produced, after 1870, and up until 1894, \$5,823,717.94 more EACH YEAR than they produced each year prior to 1870. Do you wonder, then, why silver is cheap after reading these figures? Suppose each farmer in the nine times as much wheat as he raised this year, and the population of the country did not double itself once, would not the price of his product fall? Most assuredly it would. You could not consume nine times or even four and one-balf times as much flour each year hereafter as you are consuming to-day. And if you did not wheat would be a drug in the market, the price would go down, and the farmer would be compelled to stop raising wheat or sell it at the then current price. We venture the assertion that if such a state of affairs did exist you would not hear of the farmers getting up a scheme to have the government pass a law authorizing the purchasing and grinding of all wheat in order to keep that cereal at a stipulated price,

> doing to-day. the silver question to a greater length, but as this article has already exceeded the space we had allotted to it, we will

at 34 and in 1890-1 at 58 cents: wheat, No. 2 spring, on same market was quoted in 1860 at \$1.02 and in 1890 1 at \$1.03. But, after all, prices are better to-day than they were before the war when we were under the beneficent provisions of the act which was repealed in 1873, and this fact more than anything else convinces us that the war and not the statute which was wiped off the statute books in 1873, was responsible for the good times which we enjoyed at that time.

Lest some critic may say we have reasoned faisely as to the law of supply and demand in relation to either silver or farm products, we will say we have taken into consideration the fact that silver increased nine times while wheat increased less than one time. So from this we conclude that the secret of our prosperity was not in an abundance of cheap money but an abundance of work for all classes-when there was a market for all labor as well as for all products. Let us open the mills, and the shops and the factories, let us put the idle workmen back to work, let us enact a high protective tariff for his protection and for the protection of our farmers and our manufacturers, and we will have approached nearer the millennium than ever before.

Just one more thought, and then we will dismiss the subject for this week. Contrary to a general belief, the present silver dollar is a legal tender for all debts, public and private, of whatever amount, except where otherwise specified in the contract.

At some future time we shall take up We might carry this discussion of the question of "Ratio, Protection and Labor."

THE Kansas City dailles should have accused Rev. J. A. Dearborn with among Protestants, , the Protestant slugging and stabbing himself, and Reformation was a zgigantic mistake. with afterward pitching himself over and the millions of martyrs who died close, what you understand by free sil- the fence into the yard where he was for religious liberty and an open Bible tound in an unconscious condition, if died in vain. ing its pretensions.

"In the United States they conciliate public sentiment: in Spain they shape and direct the intensity of Spanish Catholicism for their own ends. The Spanish government is hesitating now as to authorizing the jestablishm ent of a Protestant church in Madrid. The papal nuncio in Spuin, has protested against it: so have many ["individual lay Catholics; but the .. example of the latter is not so much to" the point as that of the former, who, represents the Vatican. Spain is the only typical Catholic country in E mope. □ In 1887, out of her population of 18,000,000, only about 7,000 were Protestants. I Even in this year of progress, junder her present constitution, public Protestant worship is forbidden. Protestants may meet in private houses to worship, but all public notices, of their services are prohibited. The present premier, less bigoted than most of his countrymen, has been inclined to frelax the severity of the laws so far jas to authorize the establishment of a Protestant church, and all the ecclesiastics are up in arms against him. ; The contrast between the attitude of the Vatican in Spain and its attitude in the United States is instructive, but als anot 2 particularly startling to those familiar with the history of the Roman Catholic church."

Which-Is Right?

The Rev. J. B. Daly, in a lecture on "The Jesuit in Politics," pointedly says: "I have this to say to the Protestant who apologizes for [Romanish (and Romanism is Jesuitism): If Protestantism is right-Romanism is wrong, and if Romanism 'is right Protestantism must be wrong. Both [are the antipodes of religious opinion. If there must be apologies for [Romanism
