

FARM AND GARDEN.

MATTERS OF INTEREST TO AGRICULTURISTS.

Some Up-to-Date Hints About Cultivation of the Soil and Yields Thereof—Horticulture, Viticulture and Floriculture.

LONDON LIVE Stock Journal says: Fashion doubtless has much to do with the color of horses, but it is nevertheless certain that the accident of a fashionable—and prepotent—sire being of a particular shade of jacket may materially influence the future of the breed to which he may happen to belong.

Sainfoin. Esparsette. Tourn.

This plant belongs to the clover family, and is a native of Europe and Asia. In some parts of the Old World it is very highly prized as a forage plant, especially in regions where chalky or gravelly soils prevail.

There are various modes for transplanting the vines. One of these is called sod planting. The sods containing cranberry vines are taken from cranberry meadows and placed in the new marsh.

Another method is called drill planting. A furrow is turned by the plow, and the vines are scattered thinly along, only one in a place, being leaned up against the perpendicular and partly covered by the hoe.

Small Farms and Egg-Raising. In such departments as egg-raising all the advantage rests with the small farmer. A correspondent of a provincial paper, who has knocked about the continent with his eyes and ears open, noted while there that the poultry kept by the peasantry rarely get any other food than house scraps and what they can pick up for themselves by the roadside.

Value of Milk for Hogs.—The Farm and Garden says that with hogs it is as a part of a properly balanced ration. A skim milk should be worth 20 cents per 100, or 2 cents a pound.

Setting Out Cranberry Vines.

As in planting or setting out various other kinds of vines and plants, there seems to be no particular time when it is absolutely necessary to have the vines set out. The cranberry vine is very hardy, and will live, even with a good deal of hard usage.

There are various modes for transplanting the vines. One of these is called sod planting. The sods containing cranberry vines are taken from cranberry meadows and placed in the new marsh.

Hill planting is also practiced. One great advantage of hill planting over sod planting is that only clean vines are set out, where with the sod, roots from other plants were necessarily propagated.

Another method is called drill planting. A furrow is turned by the plow, and the vines are scattered thinly along, only one in a place, being leaned up against the perpendicular and partly covered by the hoe.

MODERN GAMES, OLD.

INVENTED LONG AGO BY THE ANCIENTS.

Baseball Played by the Indians—Novelties in Games Rarely Catch on Because the Old-Timers Are Hard to Improve Upon.

FEW OF THE HUNDREDS of new games that are invented every year become popular. They may be seen in any toy store by the score—lawn games and parlor games, games of cards and games of ball, games for young and for old.

They are a melancholy sight, for not one of them will ever take the place of the old stand-bys of infancy and boyhood. Even the names of most of them will never be heard of by the majority of American boys and girls.

Another method is called drill planting. A furrow is turned by the plow, and the vines are scattered thinly along, only one in a place, being leaned up against the perpendicular and partly covered by the hoe.
