There has been a big time in New York the last few days in celebration of the inauguration of George Washington first President of the United States. This event occurred on the 30th day of April, but the celebration has been going on for several days.

There seems to be considerable misunderstanding among people regarding the admission of the new states, as they are called, North and South Dakota, Montana and Washington. The act providing for the admission of these territories was approved February 22 last, and many persons take it for granted that they are already states. Something remains to be done, however, in each of the four territories a constitution is to be submitted to the people at an election to be held on the first Tuesday in next October. If the constitution is approved by a majority of the voters, and the provisions of the act of admission complied with, the president will issue a proclamation announcing the result, and the territory will be in the union, on an equal footing with the other states. It is probable, therefore, that the proposed four states will be in soon after the first Tuesday of next October.—State Journal.
