A strike of gigantic proportions is in progress at London, Eng., among the dock hands and other laborers. The number of men out is reported as having reached 110,000, as many labor organizations have joined the strikers. The report also states that cattle are being shipped from pastures where carcasses are lying by hundreds, the exposed cattle being considered good enough for stealing mail from the Madison, Wis., canners' stock. This should have the prompt attention of the authorities for it is endangering the health of the people as well as exposing to the disease the healthy cattle of the north.

> Last Monday was labor day as created by act of congress and it was observed by the mechanics and laborers in many cities. It seem that holidays are becoming quite numerous and if care is not taken it will not be long until the law-making power will be called upon to establish days on which men shall work. Drugs, rather than days on which they shall not work. Too many holidays will prove a curse rather than a blessing. If the mechanic, laborer, merchant or professional man can have a holiday which does not stop his business it is all right, but for him to pass the day idly and spend his good money to celebrate, and at the same time have his income stop, is apt to work a hardship on him and those dependant on him.
