Once Honored.  
 Once before being placed in his tomb  
 every Parisian may be the recipient of  
 homage as profound as would be giv-  
 en to a potentate. It is when going to  
 his own funeral. Men uncover their  
 heads and devoutly cross them-  
 selves as his hearse is passing. This  
 is true even of the drivers of tram cars,  
 'duses and drays, and of the maids in  
 white caps.—New York Sun.

I think if the women were to vote  
 for a national drink as well as for a "na-  
 tional flower," they would name ice.

Wee Pet—Kitty doesn't like my dolly.  
 Mamma—Why do you think so?  
 Wee Pet—Wen I put 'er in dolly's  
 lap, she doesn't purr a bit.—Good News.

The old fetish that woman is the  
 slave of man or that man is "the lord  
 of creation" is inspired by no loftier  
 sentiment than that which would drive  
 the one and not the other as beasts of  
 burden to the field that the superior  
 sex might enjoy all the fruits of their  
 common husbandry. It is repugnant to  
 American institutions and the Ameri-  
 can idea of equal rights and ought not  
 to prevail anywhere.—Woman's Re-  
 corder.

## "August Flower"

Eight doctors treated me for Heart  
 Disease and one for Rheumatism,  
 but did me no good. I could not  
 speak aloud. Everything that I took  
 into the Stomach distressed me. I  
 could not sleep. I had taken all  
 kinds of medicines. Through a  
 neighbor I got one of your books.  
 I procured a bottle of Green's August  
 Flower and took it. I am to-day  
 stout, hearty and strong and enjoy  
 the best of health. August Flower  
 saved my life and gave me my health.  
 Mrs. Sarah J. Cox, Defiance, O.

 ALL THE ILLS  
 That Cough, Sore Throat, Hoarse  
 Voice, etc. Cause. Sold by druggists.

## FARM DEPARTMENT.

**Eggs or Broilers—Which.**  
 Which pays the more—eggs or broil-  
 ers—is a frequent inquiry. The fact is  
 both pay best. If you expect to make  
 eggs pay, and not keep the egg-pro-  
 ducing breeds, you will not be so suc-  
 cessful. But which are the egg-pro-  
 ducing breeds. They are those breeds  
 that are kept in full exercise, and are  
 not over-fed, and which are hardy ac-  
 cording to the climate. Do not lose  
 sight of that one quality—hardiness.  
 The best breed for New England is not  
 the best breed in Florida. The best  
 breed for confinement is not the best  
 on the range. Where the winters are  
 cold and long such breeds as the  
 Brahmas, Cochins, Plymouth Rocks,  
 Langshans, Wyandottes, and even  
 Leghorns, will serve well, and in more  
 moderate climates the Leghorns, Ham-  
 burgs, Games Black Spanish and  
 Minorcas will give good results, but in  
 cold climates, with good care, they will  
 also be profitable. The man who finds  
 no money in eggs is the one who does  
 not improve his stock.

Do broilers pay? Yes, for the food  
 required to produce one pound of  
 chicken meat costs only five cents. But  
 something depends on the man. If  
 you rely on the regulator entirely, and  
 expect to escape work broilers will not  
 pay. You cannot make a hen sit in  
 winter, and she could not raise a brood  
 even if she hatched them. The in-  
 cubator is the only hope for early  
 broilers and best prices. Get a small  
 incubator now, and practice, so as to be  
 ready for winter work. Learn the how  
 and the why by practice. Broilers pay  
 well, but they do not pay unless you  
 learn. You can read all the literature  
 you wish, but the best teacher is experi-  
 ence. Make a specialty of eggs the first  
 year, but practice with the incubator,  
 and you can then make a specialty of  
 broilers.—Ex.

**Butter On the Farm.**  
 Scientific methods are prescribed for  
 the factory plan of a dairy, but the  
 average farmer's wife is expected to  
 produce good butter without rule, or  
 any of the facilities which make pos-  
 sible a system for a perfect process  
 from the milking, setting, churning,  
 working and salting, but all is uncer-  
 tain and haphazard, for better or for  
 worse, as to results. These are matters  
 of importance and every farmer should  
 study them and assist the housewife to  
 bring the dairy methods up to a per-  
 fect system.

**Pullet's Eggs.**  
 Eggs of a young pullet are gener-  
 ally longer and more pointed at the  
 smaller end than those laid by the same  
 bird either later in the season or the  
 next year. These early pullets will pro-  
 duce on an average about the propor-  
 tion of six cockerels to four pullets.  
 Eggs laid early in the season by older  
 hens are also, as a rule perceptibly lon-  
 ger and more pointed than those laid  
 later in the season. It is well known  
 that cockerels oftener predominate in  
 early broods, and pullets in later ones.

**When to Break the Colt.**  
 The age at which horses should be  
 put to work has nothing to do with the  
 breaking of the colt. The best horse  
 handlers aim to get the colt accustomed  
 to the halter and the hand just as soon  
 as they are straightened up and can  
 stand on their feet. The breaking of  
 the colt to be gentle and easily man-  
 aged about the stable is not only quite  
 a convenience where the mother is  
 used in harness, but often prevents  
 accidents and injury to the colt. The  
 colt may be handled, harnessed and  
 broken to the bit before it would be  
 prudent or safe to put it to work in the  
 team.

The age at which horses should be  
 put to work depends a good deal on the  
 size and general temperament of the animal.  
 The draft horses are less liable to  
 strain themselves in getting used to  
 hard work than the smaller, ambitious  
 nervous animals, consequently they  
 may be placed in the team at a younger  
 age and with less liability of injury.  
 The spirited animal should be handled,  
 broken to harness, but not put to tire-  
 some, fatiguing labor until it is ma-  
 tured. Handle the colts at an early  
 age.

**Care of Young Fruit Trees.**  
 We should give as close attention to  
 our young fruit trees as any other crop  
 if we expect to realize any profit from  
 them. The softening of the ground by  
 rains and the power the wind has  
 against the broad tops of young fruit  
 trees at this time of the year makes it  
 a matter of importance that we see after  
 our young trees immediately after  
 every storm before the ground freezes  
 and straighten all that lean or that have  
 been blown over. We have a young apple  
 orchard protected on the north by a  
 forest but the western winds every Fall  
 blow some of the young trees over, es-  
 pecially if the ground has been well  
 cultivated. Our plan is to push the  
 young trees back in position while the  
 ground is still wet, pull up the largest  
 corn stubble we can find, place the root  
 end against the tree, stamp it tight  
 with the foot, then throw a few shovel-  
 fulls of dirt on the corn stubble to hold  
 it firm. They seldom blow over the  
 second time.

One advantage with sheep is that  
 they will pick up a good living in  
 places where cattle would nearly  
 starve.

## Sheep Department.

A well kept sheep will shear a better  
 fleece than a poorly kept one.  
 If you have sheep that are old fat and  
 market them.  
 A sheep that shears only four or five  
 pounds of wool barely pays expenses.  
 One advantage with a small flock is  
 that the owner can give them better  
 attention.  
 Ewes that are suckling lambs should  
 be fed a little longer than the other  
 sheep.  
 The sheep that shears a good fleece  
 and furnishes a fine carcass is the kind  
 to raise.  
 A ewe that is thin and poor and is  
 allowed to run down in condition  
 rarely raises a good lamb.  
 For the small farmer, sheep are not  
 only suitable, but with good manage-  
 ment can be made a very profitable  
 stock.

**Poultry Pickings.**  
 Do not use coal oil for lice on chicks.  
 Manure piles are good for gapes in  
 chickens.  
 Whenever a rooster's comb falls over  
 he has had health.  
 Ducks can stand out in a hard rain,  
 but dampness induces cramps.  
 As the weather becomes warmer care  
 must be taken in shipping not to  
 crowd.  
 Chickens should not be allowed to  
 run with the old hens after they are  
 full feathered.  
 It is often a good plan to put the hen  
 with a brood of chickens in the garden,  
 confining the hen in a coop; the chick-  
 ens will destroy numbers of insects.  
 It is only in exceptional cases that a  
 turkey can be induced to lay in a  
 poultry house, they prefer to steal nests  
 out and must be watched or a consid-  
 erable number of eggs will be lost.

**Dairy Dots.**  
 The cow wants to see an improved  
 breed of dairymen established.  
 If you don't own a dairy of 400-pound  
 butter cows don't be discouraged. Test  
 each one, know what she can do, con-  
 demn the poorest to sacrifice, when it  
 will damage you the least, breed to  
 blooded bulls of excellent practical  
 merit and save the best cows' calves.  
 Three or four years will find you look-  
 ing up smiling.

**How To Wash A Fowl.**  
 Washing is so simple and so easy,  
 and yet so many spoil their birds by  
 only half carrying out the operation.  
 They fear that they may damage the  
 plumage or wet it too much, or that  
 they may be unable to get the soap out  
 or to dry perfectly the feathers, and  
 thus scores of birds are ruined in ap-  
 pearance by only partially cleansing  
 when it would have been better to have  
 left them untouched.  
 Birds should be washed two or three  
 days before wanted for show, and our  
 favorite time for tubbing is when the  
 sun sets; then the birds are more docile  
 and likely to be quiet.

**Testing Love.**  
 Southern children have a very pretty  
 way of "telling fortunes" with the dod-  
 der vine or love vine, as they call it. A  
 piece is broken off and twisted around  
 the head three times, then dropped or  
 a bank behind them. If the sweetheart  
 is true it grows. If it dies, he or she is  
 false.  
 The mullen stalk is also used to learn  
 the constancy or the fickleness of the  
 lover. The stalk is broken, but not de-  
 tached, and if it continues to grow the  
 absent one is constant, or vice versa.—  
 New York world.

To take off wall paper previous to  
 painting or papering, wet the old paper  
 thoroughly with a long handled brush  
 dipped in warm water. Let it rest un-  
 til the water has penetrated it and the  
 paper blisters and loosens, when you  
 can peel it off with your hands. Do  
 not wet too much at a time.—New  
 York Journal.

**The Rattlesnake's Young.**  
 Does the rattle snake bring forth its  
 young alive? I have seen young snakes  
 run in the old snake's mouth, making  
 a singing noise; and upon killing the  
 old snake and cutting it open have  
 found the young packed away side by  
 side, not in the stomach proper, but in  
 what seemed a place for them.—Cor  
 Forest and Stream.

Eggs are gathered by hucksters, who  
 in turn sell them to what the dealers  
 refer to as the shippers, by whom they  
 are sent to New York. After the eggs  
 get here they are again handled by the  
 commission merchants, and finally they  
 reach the grocer, who disposes of them  
 to the consumers.—New York Evening  
 Sun.

Cheese making in Canada has enor-  
 mously improved within recent years  
 as a result of the method of instruction  
 which has been promoted by the gov-  
 ernment in sending competent instruc-  
 tors among the cheesemakers.

A white cashmere or chudda may be  
 nicely and easily cleaned at home by  
 using soap bark, which may be obtained  
 at any druggist's.

The color of meerschaum has nothing  
 to do with the quality, and ranges  
 from pure white to a light yellow or a  
 bluish white.

## Highest of all in Leavening Power.—Latest U. S. Gov't Report.

# Royal Baking Powder

ABSOLUTELY PURE

**Bismark's Former Cook the Quickest.**  
 The fastest cooking, authentically  
 attested, was done not long ago by  
 Prince Bismark's former chief, who is  
 now chief cook in a famous restaurant  
 of Berlin. He had made a bet with a  
 regular guest of the place that he  
 could kill, dress, cook and serve a  
 chicken in six minutes. The exploit  
 was to be performed before invited  
 spectators.

At nine o'clock on the appointed  
 evening the cook appeared with his  
 gas cooking stove on a platform in  
 sight of all in the room. He waved  
 the chicken around his head and it  
 cackled loudly. Decapitating the  
 fowl with one blow of a glittering  
 knife, this gastronomic expert within  
 sixty seconds had removed every  
 feather from it. The gas stove was  
 already lighted, with a broiler upon it.  
 The fowl was cut open and drawn in  
 one other minute and placed upon the  
 broiler; a hot dish garnished with  
 watercress was at hand, and it lacked  
 just a second of the six minutes when  
 the chicken was served.—Pittsburg  
 Dispatch.

**Deafness Cannot be Cured**  
 By local applications, as they cannot  
 reach the diseased portion of the ear.  
 There is only one way to cure Deafness,  
 and that is by constitutional remedies.  
 Deafness is caused by an inflamed con-  
 dition of the mucous lining of the  
 Eustachian Tube. When this tube gets  
 inflamed you have a rumbling sound  
 or imperfect hearing, and when it is en-  
 tirely closed Deafness is the result, and  
 unless the inflammation can be taken out  
 and this tube restored to its normal con-  
 dition, hearing will be destroyed fore-  
 ever; nine cases out of ten are caused by  
 catarrh, which is nothing but an in-  
 flamed condition of the mucous surfaces.  
 We will give One Hundred Dollars for  
 any case of Deafness (caused by catarrh)  
 that cannot be cured by Hall's Catarrh  
 Cure. Send for circulars, free.  
 F. J. CHENEY & Co., Toledo, O.  
 Sold by Druggists, 75c.

**Worms Eat Lead Pipes.**  
 In The Gesundheits Ingenieur the  
 fact is communicated by a correspon-  
 dent that when tracing the leaky  
 places in a lead pipe there was found  
 in one of the leaks a live woodworm  
 with its head protruding in the wall of  
 the piping, the outer opening of the  
 cavity being of oblong form 7 by 4  
 millimeters, and the inner surface of  
 the same showing fine indentures.  
 That similar cases have been occasion-  
 ally met with appears to be the case,  
 the fact being stated in one of the  
 best known Overman text books of  
 technical chemistry, that certain wood-  
 worms—sirex gigas—perforate sheet  
 lead, the holes produced showing a  
 rough surface, with fine indentures—  
 in one instance holes up to 6½ millim-  
 eters diameter being found in sheet  
 lead, the latter affixed to some timber  
 work.

Fifteen natives on the east coast of  
 Australia, suffering from fever, put  
 themselves in the hands of the Maori  
 tohunga, or doctor, who prescribed  
 After taking his physic they were told  
 to go and "sit in the creek" until the  
 tohunga released them. Thirteen out  
 of the fifteen died.—Exchange.

**The Only One Ever Printed. Can You Find  
 the Word?**  
 There is a three-inch display advertisement in  
 this paper, this week, which has no two words  
 alike, except one word. The same is true of  
 each new one appearing each week, from the  
 Dr. Harter Medicine Co. This house places a  
 "crescent" on everything they make and pub-  
 lish. Look for it, send them the name of the  
 word and they will return you BOOK, BEAUTI-  
 FUL LITHOGRAPHS or SAMPLES FREE.

A singular idea has taken shape in  
 England in the formation of a home  
 for ladies deprived through bereave-  
 ment of support. The funds for its  
 maintenance are provided by those  
 who wish to show respect for deceased  
 friends otherwise than by expending  
 money on costly funeral flowers.

The "Rose of virtue" recently con-  
 ferred by the pope upon the queen of  
 Portugal, is properly supposed to bring  
 misfortune to the recipient of the  
 honor, and this queen is no exception  
 to the rule. She is suffering from a  
 feverish attack, which is popularly  
 supposed to be a form of "rose cold."

The Herreshoffs are now building  
 for Mrs. Newberry, a rich widow of  
 Detroit, a large steam yacht on which  
 she can cruise on the lakes, and among  
 other luxuries it is to have a mahogany  
 dining room on deck.

**Trout Fishing at Night.**  
 Do trout feed in the night during  
 the full moon? In answer I would  
 say no. Can you catch them better  
 during the full moon? To this  
 I would also say no. The best time to  
 catch them at night is early in the  
 evening before the moon rises, or  
 after it sets in the morning. Only in  
 the darkest night do trout bite best.  
 They don't feed on the same ground at  
 night that they do in daytime. You  
 will find them in shallow water above a  
 pool or below, where it is best to use  
 a dark fly, and getting close to your  
 fish, and make your cast as delicately  
 as in daytime. Never use bait with  
 your flies. I never have had luck  
 with a white miller.—American Angler.

**Your Car Fare Paid.**  
 There is no better way to educate yourself  
 than by travel. If you are thinking of attending  
 school the coming year, write to the  
 Western Normal College, Lincoln, Neb., Wm. M. Chase,  
 Pres.; W. J. Kingsley, Sec'y. If you attend  
 their school they will pay your car fare, hence  
 distance will make no difference to you, and  
 will have an enjoyable trip, get to see much of  
 the West, spend a few months in Lincoln, the  
 beautiful capital city of Nebraska and at the  
 same time obtain a thorough, practical educa-  
 tion at that greatest of great schools—the West-  
 ern Normal College. This is no catch, a BONA-  
 FIDE offer. Write for particulars.

**The Growth of Lunch Clubs.**  
 As an outgrowth of the labors of  
 Miss Grace Dodge lunch clubs are  
 being established in many quarters in  
 the immediately neighborhood of  
 factories, where the girls can procure  
 wholesome food at reasonable rates.  
 It is not possible for these to be self  
 supporting at the very start, but as  
 soon as they are so the association  
 turns over the management to a com-  
 mittee of the girls themselves. In a  
 few of these, besides the lunch room  
 proper, there is a cheerful sitting room  
 in which are found books, lounge,  
 rockingchairs and perhaps a piano.

The most novel thing in this line is  
 the step which has recently been  
 taken by a large Boston dry goods  
 establishment—that of providing a  
 hall and a piano for the recreation of  
 their employees. Two teachers of  
 gymnastics have been engaged, and  
 between the hours of 5 and 6 p. m. the  
 girls are relieved from duty in classes  
 to enjoy the exercises. This is doubt-  
 less a means of making the store  
 exceedingly popular, for there are  
 many women who would give the  
 preference in buying to a store which  
 took such practical ways of making its  
 employees happy.—Brooklyn Eagle.

**A Sore Throat, Cough or Cold,**  
 if suffered to progress, results in serious  
 pulmonary affections, oftentimes incurable.  
 "Brown's Bronchial Troches" reach di-  
 rectly the seat of the disease, and give  
 instant relief.

**A Rest for Hard Working Woman.**  
 Miss Ida C. Clothier, of Boston, who  
 for five years has been actively en-  
 gaged in the work of the young wom-  
 en of the Women's Christian Temper-  
 ance union, and also in the Young Peo-  
 ple's Society of Christian Endeavor and  
 the King's Daughters throughout the  
 country, has undertaken the added  
 work of providing a "rest" for young  
 women.

She has secured a cottage at Maniton  
 Springs, Colo., and will invite those  
 young women who from force of cir-  
 cumstances cannot afford to take  
 needed rest for brain and body. Her  
 idea is not a cheap boarding place or  
 sanitarium, but a real home, where she  
 will entertain from twelve to fourteen  
 guests at a time.

Miss Clothier asked those who are in-  
 terested in this need among the class  
 of young women who are brain workers  
 and who are dependent upon their own  
 exertions for their support to aid in  
 providing this rest. If sufficient funds  
 are secured nearly 200 young women  
 can thus have two or three weeks' rest  
 among the Rockies.

Mrs. Livermore is in hearty sympa-  
 thy with the work.—Boston Letter.

A correspondent asks these pertinent  
 questions: "Why do restaurants for  
 women always charge more and give  
 less than restaurants for men? One  
 can get a substantial meal in the latter  
 for a sum that makes no impression in  
 a 'Ladies Cafe.' Sandwiches are only  
 half as large and double the price. Coffee  
 cups are smaller, price larger, etc."

It is safer to judge a man by his walk  
 and conversation with a woman,  
 rather than by the warp of his walk or  
 the woof of his conversation alone.—  
 Good Housekeeping.

# DR. PRICE'S

## Cream Baking Powder

Used in Millions of Homes—40 Years the Standard.
