

POLITICAL TOPICS

It is foolish and wicked to encourage men to believe that there is some other way to get money than to work and earn it.

REMEMBER the democrats are in favor of just as high a tariff, yes and higher, than the republicans. The only question is the manner of raising it.

If money is a measure of values it must necessarily possess value. You cannot measure distance, weight or anything else by fiat.

Nothing but natural simplicity and mental weakness can cause any man to believe that the cheap John demagogues who are advocating free silver, fictitious money, nationalism and every chimerical abomination, are wiser or more honest than the great statesmen who have brought this nation to the glorious position which it now occupies.

The record of the political parties in an open book. The republican party has always, from the beginning, been loyal to the common people.

Somebody, we think it was Horace Greeley, said: "All democrats are not horse-thieves, but all horse-thieves are democrats." This was not so severe an arrangement of the democratic party as it might at first sight appear to be.

Whitelaw Reid will run all right. Our democratic brethren need not waste any sympathy on him.

If the democratic Mills bill were the law instead of the McKinley bill the tariff, which the democrats tell us is a bar, would be seven or eight per cent higher than it now is.

After the eighth of November the democratic party will be confronted by a condition, and not a theory. It will be a pitiable condition, but one to which they are not unaccustomed.
