The blow aimed at the sugar industry of Nebraska by the democratic tariff measure known as the Wilson bill should be fought to the very end by every man who represents the state or any part of it in either branch of congress. It matters not if Bryan is a free trader on general principles or if the independent members are opposed to helping to build up great factories, the encouragement of the sugar industry is of a great dea more importance to the people of this state than the personal views of any man.

"I submit the within described invention in competition for the twenty-five hundred dollar prize offered by the Press Claims Company.

#### NO REANKS IN THIS COMPETITION.

This is a competition of rather an unusual nature. It is common to offer prizes for the best story, or picture, or architectural plan, all the competitors hundred dollars? If you would read risking the loss of their labor and the successful one merely selling his for the amount of the prize. But the Press Claims (company's offer is something entirely different. Each person is asked merely to help himself, and the one who helps himself to the best advantage is to be rewarded for doing it. The prize is only a stimulous to do something that would be well worth doing without it. The architect whose competitive plan for a club house on a certain corner is not. accepted has spent his labor on something of very little use to him. But the person who patents a simple and useful A patent strikes most people as an device in the Press Claims Company's ppailingly formidable thing. The report from Senator Stewart's great north and south railroad convention which he fixed up to be held at Topeka on Tuesday is reported to have been a failure the first day in point of numbers, but the promotors of the scheme looked for a good attendance at the laters sessions. No list of those in attendance has been found so it is not known whether Senator Stewart is there or not. If there is no contest which would enable him to make expenses it would be a costly trip for him for he is too great a reformer to accept a pass us a pass is a bribe and nothing but cash in that line goes with reformers.

Let the independent papers say what they may, there is no denying the fact that the party is on the down-hill road. It started out as the old grange movement, with the intention of having nothing to do with politics; but, like the first named, political shysters and wirepullers got hold of it, and now the end will be just like that of the grange-it will die a matural death. The greenback party was another of the same kind, in fact, was really the remains of the grange, and the independent party is built upon the ruins of both, which is rather an unstable foundatian -David City News.
