—The first of the week V. A. Hester and the editor of THE JOURNAL returned from the eastern part of the state where they had spent some days looking up matters pertaining to a creamery. Parties were met who are interested in such institutions both as stockholders and patrons and all agree that they are a great help to a community. The merchants of the towns where the creameries are located report that it is an advantage to them for it relieves them of a great deal of trouble in the handling of butter in which there was no profit to them and it increases the volume of their cash business and also makes it so that they can always have good butter with which to supply their customers. The farmers who sell milk or cream to the creameries all speak highly of the results and in localities where the crops were almost a total failure the past season the income from their cows is about all the farmers have to keep up on and the merchants of the towns in such localities say that were it not for the cash obtained from that source they would not be able to do business. There are two classes of companies, one is composed of those who went into it for an investment and the other is where the farmers are the stockholders and they pay so much for making the butter and the rest goes to pay for the milk. In all the investigations made there was not one man found who did not speak well of the institutions. Of course it is admitted by all that it is absolutely necessary that the affairs of such a company be properly managed, but because creameries at some points have failed is no reason why the whole system should be condemned any more than should any business be declared bad because of occasional failures. In a short time some written statements from patrons and those interested in one of the most successful creameries will be received that our people may judge from them of the benefits to be derived. It is also expected that some parties will be here in the near future to look the field over and if proper encouragement is given they will take hold of the project. All agree that a creamery at this place if properly conducted will certainly be profitable to both stockholders and farmers and that is the kind of an institution that is wanted.

PERSONAL.

Phil McCann sends us some cash to apply on his subscription.

THE JOURNAL is ordered out to J. W. Hartwell, Roanoke City, Va.

J. H. Cook was up from Agate Springs the first of the week.

Mrs. S. W. Hall was in town on Monday and called at this office.

H. Prieshoff and H. Pickenbrock were over from Montrose the first of the week.

A. R. Kennedy came up from Crawford on Wednesday to look after his interests here.

E. E. Livermore went to Crawford on Tuesday evening on an order to appear before the examining board for an increase of pension.

Bert Earnest and Harry Churchill have decided to take advantage of the Harrison school and are now regular attendants.

Chas. E. Verity returned the last of the week from his trip to Wyoming and it is reported that he contemplates going to Laramie City to take the management of a daily republican paper.

Mr. T. L. Poole and sister, Miss Addie, two enterprising teachers of Dawes county, returned to their schools Saturday, after spending Thanksgiving vacation with their friend Miss Minnie Smith.

J. H. Cook informed us a few days ago that he expects to bring a large lot of stock down from Montana in the near future to his Agate Springs farm.

In another column appears the advertisement of the *Weekly Bee*. It has been reduced in price to sixty-five cents a year which is the cheapest of any paper in the state.

Subject of the Sunday morning discourse at the Methodist Church "Our Requirements." There will be no services in the evening as the pastor goes to Bodare to commence a series of meetings.

It is reported that an effort will be made to organize a social club. There is no reason why very pleasant parties cannot be held during the long winter evenings and it is hoped that the promoters of the project will proceed to push it.

Henry Prieshoff, who on the face of the returns was elected commissioner, has filed his bond and will fill the office until the contest is decided. The hearing of the case will be some time next month before the county judge.

Squire Wilcox knows that the printer likes good things to eat and brought us some nice spare-ribs and sausage the first of the week. If there is any one who appreciates such things better than we do let him hold up his hand.

Some people who have made a success of nothing but failures seem to be afraid that some one else may make a success of some thing undertaken. A spirit of that kind never did any good to its possessor and does not do much harm to any one else, but what they expect to gain by such a course is a mystery.

A good deal of cattle stealing has been going on along the Wyoming line south of here for some time if the reports are to be believed and a few days ago a number of men were arrested. They claimed that they belonged in Box Butte county, and some of them set up the plea that they were compelled to steal to keep their families from starving.

We received a communication a few days ago which we would have gladly published but the writer failed to give any clue to his or her identity. It is a rule which cannot be violated that communications cannot be published unless the name of the writer accompanies them. Those sending anything for publication will please bear that fact in mind. It is not necessary that your name be published but it must accompany the communication. This rule is necessary for the protection of the publisher.

Some time ago some one stole a saddle from the barn of J. H. Cook. It was supposed it had been taken out of the country, but a few days, or rather nights ago, it was brought to the Earnest ranch and exchanged for a saddle belonging to George Earnest. The stirrups and cinch was changed for some reason when the saddles were exchanged. The owners of the saddles would like to interview the fellow who made the trade.

During an absence of nearly two weeks the editor of this paper traveled over a thousand miles and visited a number of towns and cities. At every point the cry of hard times was heard on every hand. There are more cases of want among deserving people than has been known for years and a great deal of suffering will be experienced before the winter is over. In almost every place the charitable people are organizing to assist the officials in providing for the wants of those who are unable to provide for themselves and those dependent upon them. The fraternal organizations are preparing to do all they can to carry out the intent of their orders and individual effort has plenty of opportunity for charitable work. The fact is that the people of this locality are better off today, taken as a whole than are the people in general in the older settled countries. With the free fuel here our people can defy the cold and there are none who will be in any danger of starving and there is much reason for our settlers to be glad that they are here.

Henry Covey has our thanks for a nice lot of turnips. A little turnip now and then, is relished by all printer men.

On last Tuesday the family of Mr. Schaefer arrived from Seward and on Wednesday Mr. Schaefer got here with two carloads of stock and goods which he is taking to his farm near Bodare which he purchased of J. G. Morris last fall. He is well pleased with his purchase and he is the kind of people who will help to develop the country as he has means with which to carry on his operations. There is room for a great many such men in Sioux county and the indications are that they will get here at a much more rapid rate in the future than they have been doing in the past.

PATENTS

FOR INVENTIONS

PREPARED BY THE

Press Claims Company.

Equal with the interest of those having claims against the Government is that of INVENTORS, who often lose the benefit of valuations because of the incompetency or inattention of the attorneys employed to obtain their patents. Too much care cannot be exercised in employing competent and reliable solicitors to procure patents, for the value of a patent depends greatly, if not entirely, upon the care and skill of the attorney.

With a view of protecting inventors from worthless or careless attorneys and of seeing that inventions are well protected by valid patents, THE PRESS CLAIMS COMPANY has retained counsel expert in patent practice and is therefore prepared to OBTAIN PATENTS, CONDUCT INTERFERENCES, MAKE SPECIAL EXAMINATIONS, PRESECUTE REJECTED CASES, REGISTER TRADE MARKS and COPYRIGHTS, RENDER OPINIONS as to SCOPE and VALIDITY of PATENTS, PROSECUTE and DEFEND INFRINGEMENT SUITS, ETC., ETC.

If you have an invention on hand send THE PRESS CLAIMS COMPANY a sketch or photograph thereof, together with a brief description of the important features, and you will be at once advised as to the best course to pursue. Models are not necessary unless the invention is of a complicated nature. If others are infringing on your rights, or if you are charged with infringement by others, submit the matter to us for a reliable OPINION before acting on the matter.
