A letter was received a few days ago from Phil Brinkerhoff which stated that he was employed on the Journal at Lincoln and had plenty of work and was laying up money. His many friends here will be pleased to hear of his good fortune. He is a good boy and deserves success.

Otto Tietze arrived home from Omaha on Friday which had been with a shipment of cattle. He says that when the people of this locality talk about hard times they do not know what they are talking about for people are a great deal worse off in the eastern part of the state.

Octave Harris was up from Running Water the first of the week and called at this office. He has been doing a good deal of work improving his place of late. He has several miles of irrigating ditches and has a shed for his stock which is three hundred feet long and he intends to build a new house in the near future. He made a deal a few days ago for fifty thousand shingles, from which some idea may be formed of what he is doing.

Next Tuesday, March 20th, is the late for the annual meeting of the assessors of the county. At that meeting the valuation of property for assessment is to be determined upon. Under the decision of the supreme court the improvements on homesteads are to be assessed, so that the meeting will be of more importance than usual. All assessors should be present as the statute provides that the office is vacant by failure to attend the meeting.

On account of an accident the fish car did not arrive until Tuesday. Those who had applied for trout were all represented and in a very short time the allotments were made. Something over a hundred thousand were planted in the waters of this county and if seeding is prohibited it will be but a few years until there will be fine fishing. Supt. O'Brien says he will have well-eyed pike and more trout to distribute the last of April or the first of May and any who desire to get a supply of either of those varieties can do so by making application.

The Creamery Matter.

There has been a good deal of creamery talk during the past week and the interest in the project is decidedly on the increase for all that any reasonable person needs to become an advocate of the enterprise is to have the plan explained to him. A meeting was held on last Thursday evening at which the subject was pretty thoroughly discussed and it was the opinion of those present that a company could be formed and a creamery established and a committee was appointed composed of D. H. Griswold, Lewis Gerlach, J. E. Marsteller, G. W. Hester and I. Richstein to get the necessary amount of stock taken.

The investigations and inquiries have brought out the following facts: By arrangement with the village trustees whereby the well, boiler and pump belonging to the town can be put in for about \$1,500. A man who is a practical butter-maker and who is well recommended, will take some of the stock, but how much has not been decided. The people of the town will take all they can afford to and the people in the country are expected to take the rest. It is proposed to make the shares \$25.00 so that people of small means can take an interest in it and by helping that will help themselves.

No bonus is asked nor does a dollar go to any unless there is value received and no one will have anything to say about its management except those who are interested in its prosperity. It is just the same for a farmer to take stock in the company as it is for him to invest that amount of money in any other kind of machinery which will enable him to carry on his operations more successfully.

The benefits to be derived are so apparent that but little need be said. With a cream gathering plant the people can sell cream to the institution who live within thirty miles of the town. It will give them a ready market for the product of all the cows they milk and for it they will get cash every month, and with the cash to pay for what he needs every one will feel better, do better and live better. Cows pay from two to four and a half dollars a month during the milking season. Putting it at a low estimate, say two dollars and a half a month for each cow and you can easily figure what your revenue will be. Then take what the product of your cows has been in the past and compare the two and you can see how much advantage a creamery would be to you and then go to the committee and help the work along by taking some stock and then tell your neighbors and get them to do likewise.

A great deal is said about doing something to help the farmers in this locality. Here is an opportunity for them to help themselves and they certainly ought to embrace the opportunity at once so that the construction of the creamery can be commenced that it may be ready for operation by the time the grass is good.

FOR SALE.—A first-class sewing machine, new. Inquire at THE JOURNAL office.

Should any of our friends call at this office to pay money or transact any business and find the editor out and a lady in charge they need not go away without carrying out their intentions, as Mrs. Simmons can attend to all such matters.

Word has been received that the officers of the Bank of Harrison and a representative of the state banking board will be on hand next Monday to adjust the affairs of the bank. It is not expected that a receiver will be appointed as that would be a needless expense, but the management will go on and settle the affairs of the institution under the supervision of the state board and the depositors will be paid in full in the near future.

PATENTS FOR INVENTIONS

PROVIDED BY THE Press Claims Company. Equal with the interest of those having claims against the Government is that of INVENTORS, who often lose the benefit of valuations because of the incompetency or inattention of the attorneys employed to obtain their patents. Too much care cannot be exercised in employing competent and reliable solicitors to procure patents, for the value of a patent depends greatly, if not entirely, upon the care and skill of the attorney. With a view of protecting inventors from worthless or careless attorneys and of seeing that inventions are well protected by valid patents, THE PRESS CLAIMS COMPANY has retained counsel expert in patent practice and is therefore prepared to OBTAIN PATENTS, CONDUCT INTERFERENCES, MAKE SPECIAL EXAMINATIONS, PRESECUTE REJECTED CASES, REGISTER TRADE-MARKS AND COPYRIGHTS, RENDER OPINIONS as to SCOPE AND VALIDITY OF PATENTS, PROSECUTE AND DEFEND INFRINGEMENT SUITS, ETC., ETC. If you have an invention on hand send THE PRESS CLAIMS COMPANY a sketch or photograph thereof, together with a brief description of the important features, and you will be at once advised as to the best course to pursue. Models are not necessary unless the invention is of a complicated nature. If others are infringing on your rights, or if you are charged with infringement by others, submit the matter to us for a reliable OPINION before acting on the matter. THE PRESS CLAIMS COMPANY, WASHINGTON, D. C. 618 F street, northwest P. O. Box 463. JOHN WEDDEBURN, managing attorney. Put this out and send it with your inquiry.
