superiority of this article, and of its and a bay for hay! If the cellar were indispensableness to modern cookery, dry, hogs could well be kept upon the manure stored there. Our illustration Fig. 1, shows a perspective view ground plan -American Agricultur-

Alds at Beef and Rog Killing Time.

At butchering time the greatest ifficulty is usually experienced in levating the car ass, whether it is beef or pork. By the use of a derrick or tripod, as shown in the illustration, this heavy work may be done e peditiously by the aid of two men. Three poles about fourteen feet in Two of Swedenborg's works, "Heav- length, are boited or chained tomen elevating a large beef with ease, At hog-killing time a large barrel containing the scalding water is placed almost directly under the pul levs The bog is elevated and easily

FOR PACILIATING BUTCHERING.

water until the bristles are easily removed then lower to the platform adjoining, the end reversed and the bristles all removed with but little trouble or heavy lifting, and no danger from the splasning of sculding hawel trouble, water. When ready for hanging it is disay spells, also elevated by the rope and pulleys, and very sick turns run off on a pole placed at right of stomach, with angles with the tropod and at the beating and proper height. This contrivance will throbbing of prove convenient for heavy ill tion; chest and head, and for loading of unloading boxes and barrels

When will the public wake up to is seemed the a this important change? Nut notil there is a law to compel those who. use parrow tires to make the change. I have a large amount of road to repair and I find it impossible in cerone the city of Winfmantic and there is no railroad, excepting one on the west side; consequently all the number and suppress from the north and east of the towns ad oning are hauled through Willimantic Some teams carry one pounds with twoour inch tips and those carrying a jounces of beeswax and one and oneand be lept in good condition. In gether and run into sticks califies where the wide tire is used. If is said that oil spilled on a car-It could be readily brought about by le sistati ve enantmenta. V. D. Stearns.

ton, ... cow that will cat, digest, and ass millate the most food and pay for it in the milk pail. You will find her if ou look in every breed. When you have found her tie to her and do not stand, on the order of doing it, of inquire about breed color or edigree, nor whether her horns are

or the contents. The average American consumer wishes to bave his fancy pleased, and, if he is willing to pay fancy prices for fancy packages, furnish them for hims and remember one thing. . . . In spite of the presence or atsence of oleo, no matter whether the market be gigtted with it or not there wil alway be a paying price for the best brands of butter.

flanhazard methods must not pre-

rail if we would fattenswine unickly and economically. We should feed all the fat-producing food that can be properly digested and assimilated, but there is great danger of excess in this direction. Too much will cause the hogs to become cloved, the will lose their appetites, the digestive organs will be overworked and a general inaction of the animal's functhose will ensue, resulting in a loss of weight instead of a gain, and thus deleating the feeder's purpose of course corn is the usual fattening | ami" grain but it is so highly carclusively the difficulties mentioned above are almost sure to appear. Hogs will est and profitably digest more corn if one-fourth of the grain ration is composed of wheat bran. Koots must not be forgotten; turnips, beets, potatoes, or carrots, when smashed or sliped, afford a most desirable supplement to a diet of corn They are cooling and laxative, and materially aid and promote digestion. I have no doubt that swine and at less cost when allowed a little bran and a few roots daily than when confined to a diet of corn. The seaanimals is the moderately cool food which srequired to maintain the do it for the little fellows." He passed animal heat -M. S. Perkins, in on, I suppose the lieutenant had re-Farmer.

Clearing a Field of Stumps.

After the harvesting comes a period of cleaning up and reciaiming waste of the old barn, Fig. 2 of the im- lands. For removing stumps the cut, proved barn, and in Fig. 3 is seen the from Farm and Home shows a simple from Farm and Home shows a simple method. Two stumps or trees act as levers by means of a rope to which a

horse is hit hed. Having dug around the roots, start the horse and with an ax at hand, cut the roots or dig the dirt from between until the stump is finally drawn out.

For the Little Fellows It was down in Virginia, says a vetbarn and was taking it easy when a celebrated aurist, "by giving the follieutenant came along, probably to see lowing advice to many of my friends. have saluted him, but I didn't. Soon I the patient lie on the bed with the saw a large, nice-looking man coming painful ear uppermost. Fold a thick toward me. He were a nice uniform, towel and tuck it around the neck; and I noticed as he approached that he wore a lieutenant's straps, I wasn't going to pay any further attention to fifteen or twenty minutes; the water will fatten much more rapidly him, but when he came quite near to will fill the ear orifice and flow over on me I saw that there were two stars in the towel. Afterward turn over the side those straps. I jumped up and head, let the water run out, and plug son best adapted to the fattening of presented arms as quickly as I could, the ear with warm glycerine and cotfor I saw that it was Maj. Gen. Hanweather of autumn, avoiding the cock, "Never mind that for me," waste necessary to severe weather said he with a wave of his hand, "I invariable cure, and has saved many caused by the increased quantity of don't care anything about, but always cases of acute inflammation. The ported me, and he came down to see about it.-Lewiston Journal.

How to Make Dripped Coffee.

The coffee pot, dripper and all, should e scalded with boiling water before using. Then put in the upper division one coffee cup full of ground coffeethe coffee should be parched a cinnamon brown and ground rather fine. Pour over the ground coffee one coffee cupful of boiling water and place the coffee pot where it will keep warm, but not boil. Let it stand until the grounds have entirely absorbed the water; when that has dripped through water. This makes three cups of strong, good coffee.
