

The Glorious East.
"Out in Oregon," said a man from that state, "the air is so clear that you can see the peak of Mount Shasta in California, from the peak of Mount Hood in Oregon, a distance of two hundred and seventy-six miles."
"Here in the east we can see much farther than that."
"So come now."
"It's a fact. The moon is two hundred and forty thousand miles away, but we can see it on a clear night." Life.

THE ONWARD MARCH

of Consumption is stopped by Dr. Pierce's Golden Medical Discovery. If you haven't waited beyond reason, there's complete recovery and cure.
Although by many believed to be incurable, there is the evidence of hundreds of living witnesses to the fact that, in all its earlier stages, consumption is a curable disease. Not every case, but a large percentage of cases, and we believe, fully 98 per cent, are cured by Dr. Pierce's Golden Medical Discovery, even after the disease has progressed so far as to induce repeated bleedings from the lungs, severe lingering cough with copious expectoration (including tubercular matter), great loss of flesh and extreme emaciation and weakness.

Do you doubt that hundreds of such cases reported to us as cured by Dr. Pierce's Golden Medical Discovery were genuine cases of that dread and fatal disease? You need not take our word for it. They have, in nearly every instance, been so pronounced by the best and most experienced home physicians, who have no interest whatever in misrepresenting them, and who were often strongly prejudiced and advised against a trial of "Golden Medical Discovery," but who have been forced to confess that it surpasses in curative power over this fatal malady, all other medicines with which they are acquainted. Nasty cod-liver oil and its filthy "emulsions" and mixtures, had been tried in nearly all these cases and had either utterly failed to benefit, or had only seemed to benefit a little for a short time. Extract of malt, whiskey, and various preparations of the hypophosphites had also been faithfully tried in vain.

The photographs of a large number of those cured of consumption, bronchitis, lingering coughs, asthma, chronic nasal catarrh and kindred maladies, have been skillfully reproduced in a book of 160 pages which will be mailed to you, on receipt of address and six cents in stamps. You can then write those cured and learn their experience. Address: **WORLD'S DISPENSARY MEDICAL ASSOCIATION, Buffalo, N. Y.**

A BRIGHT STAR.

SKETCH OF THE MAN WHO LED MARY ANDERSON TO FAME.

Also Played Leading Roles with Booth, Barrett and Thorne. (From the St. Louis Chronicle.)

One of the most conspicuous figures in the Stage and America to-day is John W. Norton. Born in the seventh ward of New York city forty-six years ago, the friends of his youth were Thomas W. Keene and Frank Chasfrau. We find Keene a star at the age of 25 and Norton in the flower of early manhood, the leading man for Edwin Booth at the famous Winter Garden Theater. He was starred with Lawrence Barrett early in the '70's and alternated the leading roles with Charles Thorne at the Variety Theater in New Orleans. Early in the Centennial year, in Louisville, Norton met our Mary Anderson, then a fair young girl who aspired for stage fame, took her under his guidance and, as everybody knows, led her to fame. Mr. Norton is now the proprietor of the Grand Opera House in St. Louis, the Duquesne Theater, Pittsburgh, and one of the stockholders in the American Extravaganza Company.

One afternoon early in June he hobbled into his New York office on Broadway and encountered his business manager, George McManus, who had also been a rheumatic sufferer for two years. Not discarding his cane. Who cured you? he asked. "I cured myself," replied McManus, "with Dr. Williams' Pink Pills." "I was encouraged by Mr. McManus' cure, and as a last resort tried the Pink Pills myself," said Mr. Norton to a Chronicle reporter. "You have known me for five years, and know how I have suffered. Why, during the summer of 1893 I was on my back at the Mullapugh Hospital, in this city, four weeks. I was put on the old system of dieting, with a view to clearing those acidulous properties in my blood that medical theorists say is the cause of my rheumatism. I left the hospital feeling stronger, but the first damp weather brought with it those excruciating pains in the legs and back. It was the same old trouble. After sitting down for a stretch of five minutes, the pains screwed my legs into a knot when I arose, and I hobbled as painfully as ever. After I had taken my first box of Pink Pills, it struck me that the pains were less troublesome. I tried another box, and I began almost unconsciously to have faith in the Pink Pills. I improved so rapidly that I could rise after sitting at my desk for an hour and the twinges of rheumatism that accompanied my rising were so mild that I scarcely noticed them. During the past two weeks, we have had such rainy weather in St. Louis. But the dampness has not had the slightest effect in bringing back the rheumatism, which I consider sufficient and reliable test of the efficacy of Pink Pills. I may also say that the Pink Pills have acted as a tonic on my stomach, which I thought was well improved by the thousands and one alleged remedy I consumed in the past five years."

Blue Laws of Massachusetts. In regard to the so-called "blue laws" of Massachusetts, it is difficult to determine just where the line between act and fancy is to be drawn. It is claimed that the founders of Connecticut borrowed most of their laws and judicial proceedings from Massachusetts. Many of these laws were enacted previous to 1640, and a number were the orders and sentences of the Massachusetts court of assistants and general court.

Worth Its Weight in Gold. According to a letter to the Sterling Remedy Co., of Chicago, from N. P. Dunaway, of Wesson, Miss., one box of No-to-bac, which he purchased of his druggist, completely cured him of the tobacco habit.

Every drunkard's wife knows by bitter experience that wine is a mocker.—Ham's Horn.

IF IN NEED OF A REMEDY FOR A SORE THROAT, or a Bad Cough or Cold, use promptly Dr. Jayne's Expectorant, a useful medicine to keep in the house, because of its great helpfulness in all Lung and Throat troubles.

Mrs. Winslow's SOOTHING SYRUP for children is a safe, reliable, and sure remedy for colic, whooping cough, croup, and all other ailments of the young.

The Norwegian law prohibits a person from expending more than 2½¢ at one visit to a public house.

Rev. Dr. Parker is the beloved pastor of the Universalist church, at Fargo, N. D., and has also been a pastor in Providence, R. I., New York City and Troy, N. Y. He says: "I regard Hood's Sarsaparilla the best blood purifier and I have good reason for this opinion. I am now 80 years of age. Four years ago I was afflicted with rheumatism in my back and limbs, so badly that it was impossible for me to get my usual sleep at night. I had just partially recovered from the grip, which reduced my weight to 110 lbs. My appetite was poor and I felt languid and weak. In fact I was in a very debilitated condition. Having heard and read so much about the wonderful cures produced by Hood's Sarsaparilla I resolved to give it a trial. I followed the directions, and before the 6th bottle was finished my appetite was restored. I felt invigorated and strong. My rheumatic difficulty had entirely disappeared. I cannot but think very highly of Hood's Sarsaparilla." J. N. PARKER, Fargo, N. D.

NOTES ON EDUCATION.

MATTERS OF INTEREST TO PUPIL AND TEACHER.

Lack of Method in the Old-Fashioned Country School—Sanitary Conditions of the Schoolroom—Queries for Primary Teachers—News and Notes.

My Schoolgirl Sweetheart. Up to the old brown schoolhouse that stood on a hilltop high, Each day we went together, my little love and I. She was a winsome lassie, my sweetheart twelve years old; Blue were her eyes as heaven, shining her curls of gold; Light were her fairy footsteps, pleasant her sunny face, Carrying youth's prediction of woman's coming grace. Cheery, lovable, modest, how can her charms be told, My little schoolgirl sweetheart, my darling twelve years old.

I was her schoolboy lover, sitting across the aisle, Braving the teacher's anger for a whistle or a smile. Many a red-cheeked apple or pear of golden hue Quick passed in the hours of study, noticed by only two; I drew her sled in winter, and to her tiny feet I bound the flashing runners. Then o'er the frozen sheet We two would glide together, happy 'mid frost and cold. For was she not my sweetheart, my darling twelve years old!

Grey there a springtime blossom, soon was the flower here; To her came summer glories, and when the chestnut buds Opened their lips in autumn, showing their treasures brown, 'Neath the tree sat my sweetheart—I shook the treasure down. So passed the hours of winter, so sped the summer days; She has become a woman with gentle, graceful ways, I have attained to manhood, yet by our own sweet will, I am her own true lover, she is my sweetheart still. —Will Temple, in Farm and Home.

The Old-Fashioned Country School. They had no curriculum, no notions of "time allotments" and "harmonious development" and "logical sequence," and the rest of it, but only a simple and direct way of getting children to read, write and cipher at a very early age, and to be ashamed if they did it badly. Then—and here was the great unconscious principle that the country school was demonstrating—wherever any pupil had a point of individuality to work upon, some taste or some talent, there the teacher found his opportunity. The college youth, himself just waking up to the charm of literature or the fascination of scientific experiment, was led instinctively to pass on to his inquiring pupil some spark of the divine fire of original study. The close personality of the relation gave a power to the teaching which no mechanical system could ever attain. It was the method which the experience of the world, from Socrates down, has shown to be the only effective one—the method of direct impact of one mind on another.

Under the system, which was no system, the mind of the pupil blossomed out into the most vigorous growth of which it was capable. It never got the ruinous notion that a machine was going to do its work for it; there was no machine. If the teacher had anything in him it was called out by the fresh, unspooled enthusiasm of the "getting through" the country school. The pupil went there term after term, year after year, simply demanding, as did the pupils of ancient Greece and those of the fair early days of the medieval university, whatever new the teacher of the moment had to give. There was no "course," because there were no limitations of subject or of time. In that procession of active youth coming from the larger life of the college there was sure to be, sooner or later, some representative of every subject of study. The strain on the personality of the teacher was immense, and it produced a response. Individual answered to individual, and out of this give-and-take came originality.

Then there was a change. All this was found to be unscientific. The method must be made conscious of itself. There arose a being whose shadow has since darkened all the land, the "educator." To be simply a teacher was no longer enough; we must have educators, and that quickly. This hodge-podge of pupils of different ages must be broken up into "grades." Every pupil belonged in a grade, and there he must go and stay; if, at the given time, there was no grade in which he precisely fitted, so much the worse for him; away with him into the outer darkness.—Atlantic Monthly.

Sanitary Conditions of Schoolroom. Bad manners and English, if developed in the schoolroom, may be corrected and controlled at home, or a change of teacher or school be accomplished. But the effects of bad light or ventilation, of improper heating or furnishing requires scientific, and therefore expensive treatment to overcome, if it can be done at all. It is barbaric, the indifference in too many homes to the schoolroom and its surroundings and care. There are men and women going through life suffering from physical limitations due to the improper sanitary conditions of the room in which their school life began; they are the victims of ignorant or indifferent parents. The round shoulders and crooked backs that detract from the appearance of so many men and women are the results of sitting in chairs, hours at a time, with the feet hanging unsupported. Sight is

impaired because no one noticed that the light did not strike the page or the desk properly, or the map or blackboard was too far from eyes of limited range of sight. Lungs lack their full power because no one thought of the importance of lung room, and pure air to fill it. We have made great strides in education, but there are miles of road to travel before there will be that close and intelligent relation between the home and the school that there should be; before there will be that sympathetic interchange between parents and teachers that is necessary to the fullest comprehension of the child's needs and limitations. It is a disgrace to parents that their appearance in the school should be the cause of embarrassment to either teacher or pupil, and doubly disgraceful if their appearance is source of anxiety only because it means a complaint. If there is cause for censure only, the fault doubtless is due as much to the home regime as to the school; the failure or the success of the school life depends on the combination of the two. Neither is alone responsible for the health, or the progress, mental, moral, or spiritual, of the child. The child is the record of two forces molding his life, determining his future. This being true, success depends on their intelligent combination, not on the critical separation of the two or in indifference about either.—The Outlook.

Her Method. A young teacher who has had great success with a class of "ragmuffins" in the worst quarters of a large city, was asked at a school teachers' meeting to tell something of the method by which she had transformed the lawless street urchins into respectable little citizens in so many cases.

"I haven't any method, really," said the young woman, modestly. "It is only that I try to make the boys like me and I say 'don't' just as seldom as I possibly can in my work with them. They had learned to lie, steal and fight, but truth, honesty and courtesy were unknown terms. So I began by telling them a story every morning about some boy who had done a brave, honest or kind thing, and held him up for their admiration. And after a while I asked them to save up good things they had seen or done to tell at these morning talks. Their eagerness about it and their pride when I was pleased with their little incidents, showed me they were being helped.

"There was just one boy who seemed to me hopeless. He was apparently indifferent to everything; sat for weeks, during the morning talks, with a stolid expression on his face, and never contributed anything to the conversation. "I had begun to be really discouraged about him, when one morning he raised his hand as soon as it was time to begin. "Well, Jim, what is it you have to tell us," I asked encouragingly. "Man's hat blew off as I was coming to school. I ran and picked it up for him," he jerked out, in evident embarrassment at finding all eyes fastened on him.

"And what did the man say?" I asked, hoping that a "thank you" had rewarded his first attempt in the right direction. "You young scamp, you'd have made off with that if I hadn't kept my eye on you!" said the boy, in the same jerky fashion. "And what did you do then?" I asked in fear and trembling. "Didn't do nothin', but just come along to school," said the boy soberly. "I reckoned he didn't know no better; probably he hadn't had no teachin' as I've got," and he lapsed into silence with an air of perfect satisfaction.

"I think he had a pretty severe rebuff, but he has told a great many pleasant things since that day, so you see he was not disheartened. "Some people would say, I know, that I ought to tell them how bad stealing and lying and fighting are; and yet as long as they will listen to me while I say, 'Do be honest, do be truthful, do be kind,' I shall not keep the other things before their minds." The young teacher sat down as modestly as she had risen. It was unanimously voted that whatever might be said for other methods, hers—which she did not even call a method—had commended itself.—Youth's Companion.

Ten Queries for Primary Teachers. 1. Of the professional books read by you last year, which are proving most helpful to you in your primary work this year? Why? 2. Are you studying your pupils more, than you may give to each that which he most needs? 3. Do you remember that the little ones, just beginning school life, have always been in homes, and that the school room must be pleasant, the teacher friendly, if the children are to be given a favorable impression of school life? 4. What form of recitation—not busy work—do you use? Why? 5. Do you aim to make your busy-work not only interesting, but profitable? 6. Is it not possible for us as teachers to make our busy work of more use to the children? To make it more a supplement to some part of the daily work? 7. How do you secure good attendance during the first year of school life? 8. How often can you hear the chant class, the first reader and the second reader classes repeat daily? 9. How are the pupils in the classes just mentioned employed during the remainder of the school session? 10. What are you doing to cultivate a love for good literature in your primary pupils?—Florida School Journal.

A medical school for women is to be established by the Russian government at St. Petersburg, through the efforts, it is said, of Prince Wolkowski, who represented the government in matters of education at the Chicago Exposition.

Do You Wish the Finest Bread and Cake?

It is conceded that the Royal Baking Powder is the purest and strongest of all the baking powders. The purest baking powder makes the finest, sweetest, most delicious food. The strongest baking powder makes the lightest food. That baking powder which is both purest and strongest makes the most digestible and wholesome food. Why should not every housekeeper avail herself of the baking powder which will give her the best food with the least trouble?

Avoid all baking powders sold with a gift or prize, or at a lower price than the Royal, as they invariably contain alum, lime or sulphuric acid, and render the food unwholesome.

Certain protection from alum baking powders can be had by declining to accept any substitute for the Royal, which is absolutely pure.

No Saloons, No Police, Little Crime.

In the county Tyrone, Ireland, there is the district of sixty-one square miles, inhabited by nearly ten thousand people, having three great roads communicating with market towns, in which there are no saloons, entirely owing to the self-action of the inhabitants. The result has been that there is not a policeman in the district, the poor rates are one half what they were before, and the police magistrates testify to the absence of crime and disorder.

"Blamed if I see any fun in having to put up at a hotel," muttered Blinker to himself, as he handed his watch and chain over to the clerk as security for his board.—Bluff Courier.

He—I could believe that this was one of mother's own pies, dear. She—could you really, darling? He—Yes; it tastes as if it had been made about ten years ago.—Chicago Inter-Ocean.

No matter how good the deacon is, he will always look wise and pleased if anybody suggests that he was a pretty lively young fellow when he was a boy. Somerville Journal.

A girl isn't going to be married soon if a number of gentlemen call on her on a Sunday afternoon. When anything serious is in prospect, all the men except the one who is in earnest drop off.—Acheson Globe.

"Do you think," said the passenger on the front platform of the street car, "that it hurts a horse to dock its tail?" "Yes," replied the man who handles the break, "but not so much as it does a driver to dock his wages."—Washington Star.

He—Here I am in love. Will you be my confidant? She—Certainly. I am at your service. He—Would you advise me to propose to you?—Brooklyn Life.

He—How does it happen that none of you women have not come forward with a new currency plan? She—Oh, we have a perfect one. When we want currency, we just sit down and cry for it.—Washington Star.

Who Wins the \$300?

A novel way to obtain a suitable name for their great, yes, wonderful new oats, has been adopted by the John A. Salzer Seed Co. They offer \$300 for a name for their new oats; their catalogue tells all about it. Farmers are enthusiastic over the oat, claiming 200 bushels can be grown per acre right along. You will want it. Farmers report six tons of hay from Salzer's Meadow Mixture; 112 bushels corn per acre in a dry season, and 1,161 bushels potatoes from two acres. IF YOU WILL CUT THIS OUT AND SEND IT WITH 10¢ POSTAGE TO THE JOHN A. SALZER SEED CO., La Crosse, Wis., you get free their mammoth catalogue and a package of above \$300 Prize Oats. CNU

In Sweden a man seen drunk four times is deprived of his electoral vote.

A Hint from the Arabs.

It is said that the Arabs have two methods of estimating what will be the height of horses. By the first a cord is stretched from the nostril over the ears and down along the neck; this distance is compared with that from the withers to the feet. The colt will grow as much taller as the first distance exceeds the second. By the other method the distance between the knee and the withers is compared with that from the knee to the coronet.

To California in a Tourist Sleeper. The Burlington Route's Personally Conducted Excursions to the Pacific Coast are just the thing for people of moderate means.

Cheap, respectable, comfortable, expeditious. From Omaha and Lincoln every Thursday, through to Los Angeles and San Francisco without change. Experienced Excursion managers and uniformed Pullman porters in charge. Second-class tickets accepted. Cars are carpeted and upholstered and have springs seats and backs, mattresses, blankets, curtains, pillows, towels, etc. Only \$5.00 for a double berth, wide enough and big enough for two.

The route is over the "Scenic Line of the World," through Denver, Salt Lake City and Sacramento. All the wonderful canons and peaks of the Rocky Mountains are passed during the day. If you are going west you should arrange to join one of these excursions. They are the best, the very best, across the continent. Information and advertising matter on application to J. FRANCIS, Gen'l Pass. Ag't, Omaha, Neb.

The More You Say the Less People Remember." One Word With You, SAPOLIO

SAPOLIO

KNOWLEDGE

Brings comfort and improvement and tends to personal enjoyment when rightly used. The many, who live better than others and enjoy life more, with less expenditure, by more promptly adapting the world's best products to the needs of physical being, will attest the value to health of the pure liquid laxative principles embraced in the remedy, Syrup of Figs.

Its excellence is due to its presenting in the form most acceptable and pleasant to the taste, the refreshing and truly beneficial properties of a perfect laxative; effectually cleansing the system, dispelling colds, headaches and fevers and permanently curing constipation. It has given satisfaction to millions and met with the approval of the medical profession, because it acts on the Kidneys, Liver and Bowels without weakening them and it is perfectly free from every objectionable substance. Syrup of Figs is for sale by all druggists in 50¢ and \$1 bottles, but it is manufactured by the California Fig Syrup Co. only, whose name is printed on every package, also the name, Syrup of Figs, and being well informed, you will not accept any substitute if offered.
