At this time the action of my heart was giving me great auxiety. Its pulsations were weak and uncertain, with paipi ation and very alarming symptoms upon the least excitement o over-exertion. Exginess and head-

In a very short time after beginning treatment with the pills I began to feel heir effect. The sum ness became infrequent and less severe, when locomotion was easier. Truble from palpitation decreased and I experienced a twenty years younger. I felt so much better when the six boxes were gone that I discon-

Opium smoking in China, according to the Chipese histories of the matter, had its origin in an attempt of a Ming emperor, who reigned from 1628 to 1644, to suppress tobacco smoking. He failed to get rid of tobacco, but he established the practice of opium smoking. When the East India Co. took the orium trade into its hands the drug had been a legal import for upward of three bundred years, - Chicago Evening l'ost.

HIS WITS SAVED HIM.

An Incident in a Lawyer's Career

"A man who has his wits about him." remarked a learned judge, "Is greater than he who conquers a city, or words to that effect, for he is always sure of getting there,"

"In respect of what?" was the in quiry, made with the ulterior purpose of drawing the judge out, for he knew a good many things worth the telling.

"In many," he went on, "but in this particular case I refer to an experience I had when I was practicing for two or three years, and had an idea that Coke, Blackstone et al. were scarcely in it with me in the ordinary business of the courts. There were a lot of young fellows at our bar, and I am free to confess that we did not always maintain the dignity of the law which is one of its strongest points. Sometimes we even exceeded the limits, and now and then somebody had a fine to pay for contempt. We had fun at times with visiting lawyers, and the best practical joker in the lot was always slergyman, "I've lost a good deal of withering sarcasm when she was talk-

"Then they got a boy to bring the message into the court room, and they sat around the bar to see the old man fall dead when he read the dispatch. The boy came in all right and the sheriff promptly delivered the message. "This was an entirely unexpected turn to the affair, and of course the jokers were powerless to change the current. . They simply sat dumfounded, while the old fellow was asked to finish his speech. He finished very briefly, but it was to the point, and when my turn came to end the business I was not in it with the grief-stricken man by my side, and the jury gave the case to my opponent without leaving

the room. "After it was all over the old lawyer called one of the crowd aside and said something to him with a mild sort of a smile that resulted in his taking up a collection among us sufficient to pay for a fine dinner for the entire bar."-Wash-

Nearing the Age of Glass. A North Carolina Inventor, C. W. McLean, has patented a number of curious devices. Among them is a ginss coffin which is guaranteed proof against decay and rats. So long as no deliberate attempt is made to smash it. it ought to last forever. Another contrivance is a staircase made wholly of glass, steps, landings and newel posts being all of that material. Yet another is a glass barrel. But perhaps the most remarkable invention of Mr. McLean is a billiard table of glass. Glass bricks are now being made and the time will come perhaps when glass houses will not be much of a curiosity.

A Clever Cat.

William Gilen, of New London, threw some lobster meat to his cat. Cats are very fond of this delicacy, so what was William's surprise on seeing Grimalkin lowing her, he found that she had placed it carefully in front of a large rat hole as a balt. Then she lay in wait behind a barrel until an unwary rat came out and snapped the bait, when pussy pounced on him and broke his back with a single shake.-Hart wheel?"
