against this class by ordering the jury commissioners to draw the segular panel of twelve, and then either four or six additional talesmen who can be called in to take the places of those of the regular panel excused by the court. The sheriff's declare that the professional jurymen become more numerous every year, and are most annoying, rendering a sheriff's position, especially in election years, most embarrassing.

WALKING ON AIR.

Eminent Authoritics Look to Its Possibility as a Reasonable Hope. Despite the immense amount of writing and talk on the subject of aeronauts, the question has always been; Will serial navigation be practicable within a time near enough to justify us in interesting ourselves about it? asks a writer. The decided affirmative answer of Professor Alexander Graham Bell, the creator of the Bell telephone, is worthy of consideration, Professor Bell says that human locomotion through the air will be achieved before long, although the principle of gas expausion, which constitutes the lifting power in balloons, will have no place in the practicable flying machine. What

is necessary for rising in the air, he says, is not a cumbersome balloon, nor an unmanageable imitation of a bird's or insects's wings, but a mechanical contrivance which can be operated by ordinary motors.

Buoyancy of the flying machine must be secured by motion of some of its own parts, and not by the whole machine having a specific gravity less than that of the air. A French machine called the helikoptes, Professor Bell thinks, approaches nearer in principle than any others the flying machine of the future. It simply screws itself into the air, a certain rate of revolution of the screw causing it to rise, a lower rate giving it more buoyancy, and a still further decreased rate making it sink gently to the ground. This device, it will be noticed secures only suspen sion in the air, but little is detracted from its value on this account, as buoyancy is the only problem, it being comparatively easy to obtain motion to and fro. Apropos of mechanics in a different

field, Professor Bell says that the electric roads, horseless carriages and bicycles will not relegate the horse to the fields, but will give him another and more effective sphere of acticity. "Man has invented the bicycle," he says, "to increase his powers of propulsion, and while I do not say that a horse could ride a bicycle, I am confident that a machine could be built whereby a horse could be taken off the ground and used as a motive power. With a propor system of gearing, great speed could be obtained."-Demorest's Magazine.

Trumbull's Manner.

John Trumbull, the American historical painter, is described as a man of aristocratic tendencies and associations; yet his apparent high-headedness was but a physical peculiarity. He was always ready to face any situation with pride and courage which render-

The reach very aptly applied the term to the newly discovered country from the physical peculiarities just mentioned.

New Orleans is discussing the feasibility of commemorating the purchase of Louisiana in 1803 by a grand exposition in 1903. At a recent meeting of the New Orleans Chamber of Commerce, called to consider the question, resolutions were adopted urging the desirability of such an exposition, and a committee of 100 was appointed to

formulate and devise ways and means. A method of silvering mirrors, producing mirrors of much greater brilllancy than those made by ordinary processes, has been discovered by Herr Hans Boas, of Kiel. It is based on the fact that when a heavy metal forms the cathode of a vacuum tube containing a trace of hydrogen, the electric current rolatilizes the metal, which is deposited as a firmly adherent and highly pol-

ished layer on the walls of the tube. The fact that Egypt is going to be nore fashionable this winter than ever before is shown by the number of bookings at the hotels. The hotelkeepers my that five years ago they had about 4,000 people in Cairo for the winter, nine-tenths of them English. Last year there were 8,000, one-half of them Americans. This year the hotelkeepers estimate that they will have at least 10,000, and the American influx will be larger than ever before.

A man who claimed to have seen Washington, and really believed that he had, no matter how other folks treated his assertion, died recently in Baker County, Georgia. He was a negro known as Jim Hall, and was reputed to be at least 125 years old. There is no doubt he was an exceedingly old man. He used to declare that he had driven his master to the polls to vote for General Washington on the occasion of his first election as President. He was in every way honest, and worked, supporting himself, up to the time of

his death. Judge James F. Harvey, of the Montcomery Circuit Court, Orawfordsville, Ind., is about to establish a new court rule which will practically do away with the "professional juryman," who

has been such an annoying curse to all courts in Indiana from time immemorial. Judge Harvey proposes to guard | Boston Courier.

hands; he noticed a sink in the ante- ing a spy. He was arrested and cast into prison, where he lived for nearly eight months, amusing himself by painting. When he was questioned as to his antecedents, he made the haughty reply: "I am an American, and my name is

Trumbull. I am a son of him you call the rebel governor of Connecticut. I have served in the rebel army. I have the honor of being an aide-de-camp to him you call the rebel George Washington. I am entirely in your power. Treat me as you please, always remembering that, as I may be treated, so will your friends in America be treated by mine.

Through the influence of the painter, West, and of such men as Fox and Burke, he was released and then returned to America.

His sense of personal dignity was one of his marked traits. When in 1777 the Continental Congress treated him with seeming neglect in not promptly sending him a commission for promotion he wrote to Congress:

"If I have committed any crime, or neglected any duty, since I engaged in the service of my country, if I have performed any action or spoken any word in my public character unworthy of my rank, let me be tried by comrades and broke; but I must not be thought so destitute of feeling as to bear degradation tamely."

The member of Congress who acted for him in the matter assured him that a mistake had been made, and advised him to write another letter, and ask for the commission, but the artist replied: "I have never asked any office in the public service nor will I ever do so. The very request would acknowledge and prove my unworthiness."

Training Sheep. To save labor with sheep, take a young ewe lamb and raise her as a pet near the house. When the ewe is grown place her with the flock. She can be called and the other sheep will follow her. If properly trained, she can be made very serviceable, and should a dog attack the flock she will run to the house. She may also carry a bell, if the owner so prefers. Conditions of Happiness.

Willey-I tell you, it's better in the end to be honest. Did you ever know a rogue who wasn't unhappy? Shalley-No; but, then, one would hardly expect a rogue to be happy when he is known. It's rogues who are not known that are happy .-- Roxbury Gazette.
