WOMAN'S COLUMN.

Shall Woman Have the Right of Franchise.

Probably one of the most serious questions that will have to be settled before another decade and one that will doubtless agitate the minds of our legislators as many of the great national questions are doing to day. One of the paramont questions to our minds is, Shall Woman be Accorded the Right of Franchise". We answer most assuredly yes, and then we ask the question why not? Is it not true that woman is more competent to vote on all matters pertaining to the government of our country and our home than thousands, ves, hundreds of thousands of foreigners. such as Italians, Hungarians, Russians, Polanders, and others who have never had the advantages of schools in their own country, come to our shores and almost the first thing they are naturalized and then voted, without the least idea what they are voting for. We do not say that this class of people will not make good citizens, but the contrary, after they have become acquainted with our laws and form of government they would doubtless make good law abiding citizens. Some one has said, -we forget who-"the hand that rocks the cradle rules the world". If that is a true maxim and we believe it is, then there can be no good reason given why women should not be permitted to have the right to the ballot. There are thousands L. T. Dont Re Sareastic.

Dear girls, if you want to be popular or if you want to have sincere friends, never indulge in sarcasm, for there is nothing toyable or attractive about a sarastic woman. She never has any friends but policy friends. The execustic habit grows upon a person very rapidily, so if vou are just a little sarcastic as girls you will some day, if living become sarcastic old women. Who loves or admires the disagreeable old person, who with her arrows of sarcasm wounds the hearts of
