READ THE

JOURNAL

This Week.

It seems by the Crawford and Chadron papers that Crawford has a Luxow committee peaking into the business affairs of its citizens. Of course it is a kind of a Dr. Parkurst reform idea that has struck that wicked city.

After reading the proceedings of the different legislatures of the various states of the Union regarding the election of U. S. senators it ought to convince every voter in the land that the popular vote of the people is the only right way to elect U. S. senators.

Imperialism seems almost sure to be defeated in the final wind up. The treaty of peace between the United States and Spain, will no doubt be ratified either during the present session of congress, or at a special session of the Senate immediately after March 4th next. But, we believe the United States never ought to be permitted to annex the Philippine islands.

As stated in the columns of the JOURNAL some two or three weeks ago, we believed Lincoln was entitled to the next U. S. Senator and that Hon. David E. Thompson, was the logical man for that exalted dignity. We adhere to that belief still, while we are most emphatically opposed to the republican doctrine of expansion and trusts, yet we believe Mr. Thompson being a millionaire, and hence when he gets into the Senate, the trusts and monopolies which are creations of rebulianism,—more especially of the present administration—will have to pay more of their hoarded and illegotten wealth to buy Mr. Thompson, in order to pass trust and monopoly legislation.

Senator Caffery, of Alabama, declared in a speech on the floor of the senate last week in opposition to the ratification of the peace treaty (unless amended so as to prevent annexation) that if this government should undertake to control and govern the Philippine Islands, as a colonial government, that the home government would have at least \$275,000,000 more annual expenses than before the war with Spain. The export trade of the Islands, for any one year all told, amounts to but \$30,000,000. Thus the home government would be short only \$245,000,000 at the close of the fiscal year provided however, that we obtain the entire export trade. Can the United States afford to give so much boot in the trade? Think of it. How can sane men think of annexation?

It must be admitted by everyone who have ever read or heard of "Bob" Ingersol, that he is a smart, yet a brilliant man in his chosen profession—a lawyer—but when he steps aside from his element and goes on to the rostrum to proclaim to a dying world that there is no Savior of mankind, that heaven and hell are but a myth; then it is, we have brought to our mind most forcibly what the royal palmist says in the 14th Chap. and first verse. "The fool hath said in his heart there is no God," hence in Mr. Ingersol's infidelic lecture at Omaha, only last week, he undertook to make (the people who were so devoid of reason as to give him audience) believe Christ was not divine and the Bible a mere myth and that the bright prospects of the future described in that old, sacred book was a snare and a delusion to the children of men and was robbing them of true happiness in life, we cannot help but believe the Palmist was divinely inspired and saw with prophetic vision that such men as Ingersol would seek to pull down the Heavenly throne and destroy the book of books and its influence and supply nothing to take its place.

ABOUT TRUSTS

A Part of Governor Pingree's Message Delivered to the Michigan Legislature Just Recently.

A Complete Exposition Of its Business Destroying Methods and Influences.

There is no feature of our times that should so alarm the patriot, nor is there any so well calculated to drive the well-meaning legislator to despair, as that which confronts us on all sides in the rapid concentration of all the productive energies of the nation in the hands of overgrown corporations or multiple corporations, called trusts; or where more solid combinations cannot be effected, by means of inter-corporate agreements for the purpose of limiting competition and controlling prices.

The process began with the means of transportation and intercommunication—namely, the railroads, telegraph and telephones. In spite of the effort of the Federal Interstate Commerce law to check the tendency, it has continued almost uninteruptedly, and promises to continue in the future.

Indeed, the process of concentration of ownership and management has proceeded much more rapidly since that law was passed than before. Where purchases or leases could not be effected, traffic agreements have been entered into which accomplish the purpose almost as effectively. Where these agreements have been open and public, the commission has in some instances interposed a check, but such interruptions to the process have only driven the promoters to more ingenious and secret devices to evade the law.

It is no extravagance of despair to anticipate the time in the not distant future when the passenger and freight rates on every train traversing the country, when the charges for telegraph and telephone services in every state, and the ownership and control of every street car line and suburban railroad shall be centered in one great office in the city of New York, in the hands of one board of managers, and possibly in the hands of a man who may have the genius and the power to control his fellows.

It has invaded other fields with the power of a glacier and the rapidity of a torrent. One by one each of the great staples which form the necessities of life is falling into the hands of its special syndicate, or trust, or trade combine, which are but other names for a group of men, dominated by one man of superior force and genius, into whose single hand is concentrated more power than any king possesses, and in comparison to whom the robber barons of feudal ages were pigmies in their capacity for extortion and oppression.

THE FEDERAL LAWS ARE POWERLESS TO REMEDY.

The anti-trust laws of the Federal Government have fallen powerless before them. Constitutional restrictions have been interpreted by the courts so as practically to make those laws a dead letter. In deed, no period of our history has witnessed so rapid and noxious a growth of trusts and combines as the few years since the National Congress undertook to restrain and restrict them.

These combines formed or organized since the Anti-Trust law was passed by Congress in 1890, and controlled by a comparatively few men, who control a capital of nearly three and a half billion of dollars, equal to 20 per cent of the entire wealth of the seven millions of agricultural population scattered over more than four and a half millions of farms, a capital more than twice the aggregate of the entire circulating medium of the country. Nor is this by any means the sum of the trust and combine element in the country. Hundreds of articles are governed in their price by secret agreements which do not make their appearance as legally organized companies. If you enquire carefully you will discover that you can scarcely make a purchase in which the price is not dictated by a combination over which the merchant you deal with has no control.

Each of these great trusts has aims for the most part to control but one staple, although some of them reach out for many. The control of the iron and steel and of the coal, leads of the country is slowly drifting toward a single center. As the organizations grow more powerful, all related industries will be combined in one control for each great class, as in the case of iron and coal.

THE DEATH OF COMPETITION.

Even in the small retail trading of our cities the process of concentration is only too apparent. Our cities no longer present the once familiar aspect of miles of busy streets, occupied by thousands of small but respectable merchants, each doing a modest but respectable and satisfactory business and trade with his more immediate neighbors, and in a line to which he had been trained by long experience, looking forward to accumulate a modest competence for his old age, and to the transmission to his heirs of an honored name and reputation for fair dealing, which was as much of a family property as his house or his goods.

All around this great center, scores of small buildings, once the homes of honesty and thrift, have become empty and deserted, and monuments to a class once the bulwark of our trade, the conservative safeguard of our communities. Having no longer a stake in the community or the country, their very intelligence becomes a menace to society by reason of their degradation from a position they have no hope of recovering.

Ex-Governor Francis, of Missouri, has been chosen chairman of the executive committee of the Paris Exposition.

Judge Hayward, late candidate for Governor of this great commonwealth seems to be the leading factor for U. S. Senator, to succeed Hon. W. V. Allen, but present indications point to the fact that he has scored his full vote and will have to step aside for another.

The Grippe and Sulphur.

Here is what an eminent physician says:

In my daily papers of December 22d I find that there are supposed to be something like 100,000 cases of grippe in New York City, and that it is also prevailing largely in Washington, Philadelphia and other cities and is now threatening Boston. It is a fact when it was prevailing as an epidemic largely in our city a few years ago, I ascertained by inquiry at "Byam's Match Factory" that of the 41 persons employed there, not one had been trou-

bled by it.

I have at various times told the press how many at Memphis, Tenn. (including the agents of the Howard Benevolent Association) escaped the terrible epidemic of yellow fever there (as they claimed) by wearing powdered sulphur in their shoes—also the evidence of a distinguished German medical writer translated into English, that wearing sulphur in this way has proved a complete protection against cholera and other epidemic diseases,—also that those working the sulphur mines of Italy escape the malaria which prevails all about them,—also that sulphur worn in the shoes has cured various cases of rheumatism,—also that sulphur taken internally or worn in the shoes has sufficient power to pass through the body the clothing and the pocket-book, blackening the silver there.—Our Durab Animals.

We Need Our Money.

Parties who are in arrears on subscription to the JOURNAL for one and two years are requested to settle by January 1st next. It costs us money to run the paper and we feel the price of one years subscription \$1.00, is not much to pay for the JOURNAL and it will very materially assist in making the paper better for the next year. We hope to make some improvements in the machinery of the office the coming year and we will need what is due us to do so. We have over \$500, on our books and we must have them balanced up by the end of the year.
